Using Paris Green.

The following hints are given in the Paint and Oil Trade Journal, for the benefit of those who use Paris green for potato bugs:

As the handling and using of dry Paris green, especially by persons un-accustomed to its use, is attended with considerable risk and often followed by serious consequences, we make the following suggestions founded on our experience as manufacturers:

All packages, whether large or small, should be plainly marked poison. There is great danger in the mixing of this green for potato-bug and cottonworm poison, owing to the fine dust which arises in the process, which is inhaled, and also rapidly absorbed by the pores of the skin, especially if the person using it should be in a state of perspiration. To guard against this, the hands and face (particularly nostrils) should be protected as much as possible, and should be carefully washed after working in it, or in any of the preparations of which it is an ingredient. As it penetrates and poisons wood—gets into the seams and crevices of articles made of metal and even into earthenware that is at all porous; all household utensils, or anything in barn or stable (which cattle or horses could have access to) in which the articles may have been mixed, or from which it has been used, should be carefully set aside, and never again

used for any other purpose. Malignant sores are not infrequently caused by scratching the skin when itching or irritated from handling the green. It should be constantly borne in mind that it is a more dangerous to exercise the utmost care in using it. Remedy for the Poison.-The free use of milk as a beverage is recommended, but we have found hydrated per-oxide of iron (a simple, harmless remedy) the best antidote. Sores caused by the green should be well covered with it, as with an ordinary salve, and a teaspoonful in a wine-glass of water, should be taken twice a day internally, while working with the green. This remedy can be obtained from any druggist or chemist.

How to Drain Begs. paper read before the Farmers' Club was in answer to a letter from H. S. Sigourny, of Milton, N. Y., who desires to know the best methods of reclaiming bog meadows, which John B. Sands, Vails Gate, Orange county, N. Y., gives in substance as follows:

Keep your drains well opened. See to it that the descent is sufficient for good drainage. The cultivated grasses will soon die out in this land. The best grasses for this purpose in what is called in Orange county the foul meadow grass, it yields a heavy crop and makes a fine quality of hay. Cattle prefer it to any other. I would recommend for the working of this meadow the Burlington plow of New Jersey. It is made of steel, and being ground sharp cuts through the strong roots and turns the furrow slice complete. I also recommend a good dressing of well rotted manure, if not bone-dust. Sow timothy, red top, and foul meadow grass, twice the quantity you would use on uplands, so as to get a stiff sod. After mowing never pasture such ground, as the aftermath will save the grass from heaving out during frosty weather. The depth to plow I leave to each man's judgment. I plow from five plow much with one horse, the horse walking by the side of the furrow. Another farmer, who knew nothing of the plow mentioned by Mr. Sands, said a steel plow of some kind must be used. Still another thought the great trouble in renovating these bog meadows was that they were not suffi-ciently worked after drainage to develop their fertility; should be much cultivated. A crop of corn was good for fertilizing then.

Butter Factories. The American Grocer says: Perhaps three-fourths of all the butter marketed might be made, with proper care and system, worth twenty per cent. more, and at actually less expense than it is now produced; and something of this sort the butter-makers must do to compete with the artificial product. in our judgment, be accomplished by the farmers adopting some plan of co-operative butter-making, as is done by cheese factories. We do not say that the same plan may be suited to every locality, but the principle, in some form, is equally applicable to every section. Where the population is sufficiently dense, the regular butter factory, taking the milk directly from the farmer, may be adopted. Where the difficulties of transporting the milk are too great to admit of this plan, the farmers might churn their cream and carry the raw butter itself to a central factory to be manipulated by some such method as is proposed by the Dake pro-cess, by which all the different grades of butter could be thoroughly worked over, and a uniform quality and color obtained. Factory butter, like factory cheese, now commands an extra price.

Preserving Posts. Over 30 years ago I set some white oak posts sawed 5x5 inches. They were thoroughly seasoned. Part of them I painted with coal tar at the ground end; with others, I put around the exposed part a shovel full of leached wood ashes from an old ashery. I had occasion to examine the posts after being in the ground more than 30 years, and found hose protected by the ashes and by the tar equally sound, and to appearance good for another generation. I have tried many experiments to insure the durability of fence posts, but none were so satisfactory as those mentioned. If gas tar is used it is very important that the timber be thoroughly seasoned. If I had a new post and rail or board fence to build, I would go to the trouble of gathering wood ashes, and put a good shovel full around each at the surface of the ground .- T. C. Peters, Kings Co., N. Y.

Cross-Examining.

The veteran counselor, Caldbeck, one day cross-examining a country fellow witness, asked him in several ways what he thought a particular person to be, from his own knowledge, hearsay or belief, but could get no other an-swer that that "he did not know, and could not tell."

"Come, fellow," said the counselor, answer me on your oath : what would you take me to be, if you did not actuyou take me to be, if you did not actu-ally know my person, and should meet me in the street?"

the plain abounded. One of these

ally know my person, and some in the street?"

"Why, then," said the fellow, "since you ask me, I will tell you, sir. By virtue of my oath, if you had not that wig and gown upon you, I should take wou for a little ould peddler." The thin, John?" "Do you know this red cloak, John?" The man didn't talk has favorites.

A PICTURE OF THE FLOOD.

Thrilling Picture of the Mill River Valley after the Disaster.

A correspondent of the World, writing from the Mill River Valley in tearing rents at the base of the dam, and, as Cheney ran for his horse, had swept through in a semi-circle, and then it was really too late to do anything but ride away like the wind and try and save a few lives. Now there is left of this dam an embankment of earth and walls swept and snapped off short on eitherside, and a broken tower of stone near the middle.

Well, the dam broke away, and the

neglect and greed have begun a work which all the knowledge and care in the world cannot stop till it is thor-oughly done to the end. Yours be it to save the lives which ignorance and neglect and greed have put into so terrible a danger. Ten minutes hard gallop, good horse, over the mountain road. Ten minutes-but where will the water be in ten minutes? Where is it when Cheney on his weary horse is shouting to the families of Williamsburg to arise and get them to the hills for their lives? Behind him? yes, it was-one second ago. Now it is abreast of him and has passed him, and is playing a terrible game among the little white cottages that looked so farmers, planters, and others, when purchasing, should be duly cautioned graveyard at the turn in the road. The wall of mud-blackened water is upon them. Will anything, anybody escape that fearful flood which has brought down from its hills great fragments split from the gneiss rocks, and is hurlng along ten ton weights of stone as boys kick on a foot-ball. There is a house now standing unharmed, on every side of which are the shaven cellars of houses whose fragments are seven miles away. Here there lived a livery stable man, who was sitting at breakfast with his wife when the roar of the flood reached him. Up they went to the roof hand in hand, not hoping to escape, yet just hoping. Crash went a whirl of boulders through the house above. Then there was a sharp cracking to the east, and their barn was in kindling wood. The water was almost upon them. Had it but touched the house with them. Had it but touched the house with its edge only, they had been shaken off into its grasp. They waited for it, and kept waiting in agony. An eddy swept round below them and took off a house with a family in it. They were between flood above and flood below, and still waiting. "Bell," says I, "I think the water is gen' down as leatly think the water is goin' down a on that house above." She didn't say anythin', but jest gripped me, an' then-I s'pose it was about ten minutes-an' I was sure it was goin' down, an' by George it did go down an' didn't touch our house, an' there we was, safe, Only we see our neighbors that was an' their houses carried off down the stream. I'spose we were on the roof half an hour." Half an hour. No village of the four that lay in the track of the flood was exposed for more than half an hour to the tremendous thrust of the burdened waves. "I tell you," continued the livery stable man, "Ive continued the livery stable man in the though respects before and floods before, but nothin like this. Years in plowing such ground, the off ago, down at Winstead, I was caught in horse or ox being liable to mire in the the water, and rode on a tree over the water, and rode on a tree over furrow. On the Chester bog meadows, where they raise so many onions, they other fifteen, an' I tell you I was

mad. But this time, I don't deny it, I was scairt." In an hour and a half from the beginning the last house had been upset or torn into bits. Quick and terrible work. Williamsburg, Skinnesville, Haydenville, Leeds, pleasant little towns, with white cottages arranged in straight rows and rectangles, and with a wide spread of green meadows to the south or west; little feudal hamlets; busy little places, with plenty of factories, plenty of bustling life and hard work; pretty, clustered villages, clinging each around some tall chimney, all standing on the broad flats, with hills of more and more gentle slope, down and down the valley, not hemming hem in, but making way for them from out the bold mountains above. Such was the valley before the storm of water, loosed by neglect, fell upon it, and turned the flats into deserts and the gentle hills into the barriers of such a deluge as Massachusetts had never seen before. At Williamsburg the torrent was as deep as it was wide but here it reached the plain and spread into a flood. The flood went straight down the valley. It attacked Skinner-ville, not with water merely, but with the bones of Williamsburg, great timbers and tree-boles, and the stones which it lifted and whirled along. It attacked Haydenville with weapons caught up from both villages above, and was here a torrent thick with dead bodies. Here there is a sudden bend eastward and a narrowing in the old stream-bed just above the first dam. The flood, thus for a moment contracted, raised into a wall in its very front the spoils of the bridges, orchards, it had swept away. It hurled before it a great boiler picked up at Skin-nerville, and descended headlong on this third village. It made a sieve of the brick factory, tore out another boiler, laid hold of two great iron safes, and added these to its weapons; piled house upon house-top, drove two houses nto one, cut one house into two, splintered others, turned an island meadow into a desert of sand, smooth as a billiard-table, except where strewn with tree-trunks and stones, and carried sixty bodies on towards Leeds. Leeds it struck on the northwestern corner and broke for itself a straight path through till it landed thirty dead in a

twisted mass of rubbish against the hill

below Warner's flats. The loss of life was terrible, but undoubtedly far less

than it would have been but for milk-

man Collins Graves, who carried the

news of the flood just a breathing space

ahead of the flood from Williamsburg through Skinnerville to Haydenville.

Is it any wonder that all this ruin

should be a Mecca of sight-seers day

after day? So men had come quietly

to look upon something great, some-

thing worth seeing and worth telling of

for years. There were very few women,

except those of the valley, or friends who had come to help lay out the dead,

and no ill-behavior, except among some stray visitors who looked on while the

gangs were working to get out the dead

He shook his head and worked on. Finally when they were nearing the bottom of the heap, and a bit of mudstained white cloth with tatting sewed upon it had been fished out and discussed and laid aside, up came a strange Massachusetts, says: The dam gave way at the bottom, while Cheney, the gate tender, had gone to breakfast after an examination of it. The stream, "as big as a man's arm," had become a stream as big as a man's waist, and was tearing rents at the base of the dam. as one shakes off a fly, but without a word, and by and by the curious stranger went his way, leaving the man who hadn't found his wife tossing off timbers from the heap, dreading the discovery he longed for because he would at least give his wife's body a

funeral service before burial. As curiosity brought many of the visitors, their visit, if inopportune, was pardonable because of the grand and awful sight there was to see-a desert water behind it. A dead weight of milof water, of things strange and uncouth; wrought into shape like nothing on earth lions of tons became in an instant a hammer stroke of millions of tons. -a pandemonium wherein the presiding Hurry now, Chency! Ignorance and chance worked out the most rent has scooped out strangely winding gulches in the earth whose edges are already eroded and worn smooth under the water which was at once plow and harrow. Groves of young trees are bent to the ground and left flattened with their limbs tangled in drift and debris. Stronger trees, if they were in the full swing of the current, are uproceed or snapped off. If they were at one side the flood has left with them stacks of timber, of tree trunks, of iron scraps, of clothes, of rocks, of earth. Away up in a tree-top oftentimes is a shapeless something that was the wooden side of a house or its tin roof, and then down again in the track of the flood are the broken houses, of which you know by their dilapidation that the life has been shaken out of them and turned into death in the abyss of the stream. And of all this seven miles, from Williamsburg to Northampton a railway embankment sapped and guttered and sucked away, a bridge gone, an immense factory roof lifted over an immense factory roof li gulches in the earth whose edges are

XLIIId UNITED STATES CONGRESS. IN THE SENATE.

THE FINANCE BILL. Mr. Wright's amendment to the Finance bill, to strike out fifty per cent, as the propor-tion of legal tenders to be retired, as new

tion of legal tenders to be retired, as new national bank notes are issued, and insert in lieu thereof twenty-five, was agreed to. Mr. Wright moved to amend by striking out five per cent, as the rate of interest which bonds issued to redeem present United States notes after January, 1877, should bear, and insert in ieu thereof four and a half per cent. Agreed to—yeas, "2; nays, 15. The Finance bill was then read a third time and passed—yeas, 25; nays, 19.

PENSIONS. PENSIONS.

Senator Pratt, of Ind., from the Committee on Fensions, reported adversely on a large number of petitions of soldiers in the war of 1812, and the widows of such soldiers, for pensions. He said the reason of these advorse reports was that the majority of the Committee on Pensions a few days ago directed him to report favorably on the House bill, which provides for a pension of \$8 a month to all surviving soldiers of the war of 1812, without reference to the time of sarvice, and it also

Senator Edmunds, of Vt., submitted a resolution that the President protem, of the Senate and the Speaker of the House of Representatives declare the two Houses of Congress adjourned sine die on the 22d of June next, at 12 o'clock noon. Ordered to be printed and laid

BILLS INTRODUCED. Mr. Frelinghuysen, of N. J., introduced a bill to encourage and promote telegraphic com-munication between the United States of America and Asia, authorizing a company to

lay a submarine cable. DILLS PASSED. The bill to relieve ships and vessels from compulsory pilot fees in certain cases was pass-

Mr. Chandier, of Mich., from the Committee on Commerce, reported back the bill amenda-tory of the act of Aug. 18, 1856, "To regulate the diplomatic and consular system of the United States." Passed.

BILLS INTRODUCED. Mr. Wright, of Iowa, introduced a joint resolution proposing an additional amendment to the Constitution to provide that all claims and demands against the United States shall be presented or prosecuted within ten years after they accrue or arise or else be foreve

The Senate passed the Legislative, Judicial, and Executive Appropriation bill. As finally amended there were reinstated nearly all of the elerical force in the several departments of the Government which the House proposed to curtail, besides authorizing the Secretary of War to detail enlisted men for duty in the Adintant General's office.

Adjutant General's office. IN THE HOUSE

BILLS INTRODUCED. For the creation of a court for the adjudication and disposition of the Geneva award. Or-lered to be printed and recommitted.

To secure anti-monopoly ocean cable commu-nication between Europe, America and Asia by Wm. Cornell Jewett and his associates. For the establishment of an ocean mail steamship service—American built iron vessels— between the United States and England. SUFFERERS BY FLOODS. Mr. Hayes, of Ala., moved to suspend the rules and pass the bill authorizing the President to furnish army rations and clothing to the starving and destitute people on the Tombigbee, Warrior, and Alabama rivers. Mr. Willard, of Vt., suggested that the sufferers by the late inundation in Massachusetts be included, but Mr. Hayes declined to include them. The bill was passed, 141 to 68.

THE MOIETY BILL. The Moiety bill, as amended by striking out the ecction for the seizure of books and papers enacted in 1863 as a war measure, was passed. During the discussion of the bill Mr. Beck said the Collector of New York has a salary of \$6,000; the Naval Officer has \$5,000; and the Surveyor has \$4,500; and yet during this Administration the Surveyor has search for the surveyor has \$4,500; and yet during this Administration the Surveyor has search for the survey has search for the surveyor has searc ministration the Surveyor has received for his share of penalties \$159,000; the Naval Officer \$162,000; the Collector, \$174,000; and the informer, \$491,000; making a total of \$986,000 that has been paid to informers and officials. Mr. Dawes said it had cost the Government \$6.87 for every dollar of derelict taxes collected in New York, and \$14.98 for every dollar. in New York, and \$14.98 for every dollar col-lected in Boston. The amounts paid to the New York Custom House officials since 1869 as their shares of fines and penalties aggregated \$336,731. The bill as passed by the House cuts off the moiety division by the Govern-ment.

Any one who thinks, and many who do not, must know that in every class of society there are men who may say or do things with impunity, if not with applause, for which another would be vilified or ridiculed. In fact, society

NEWS OF THE DAY.

Ex-Gov. Seymour declines to be a candidate for the Governorship of New York State.... A special dispatch to The Daily Advertise says that the assets of the estate of the late Oakes Ames have depreciated to such an extent that the executors have concluded to represent the estate as insolvent The wife of John-Bargland, of Scott County, aged fifteen, and married but six weeks, died suddenly at her father's house in Glencoe, Linn.-it is supposed from the effects of poison taken to produce abortion. She would have become at mother in three months. Her husband has been arrested as accessory to the alleged poisoning..... The coal shipments from Picton mines are dull this season in consequence of the long blockade of ice in the St. Lawrence. All the companies in the Picton Districts have large stocks of coal on the banks..... A committee of the Pennsylvania State Agricultural Society have selected Easton, Penn., as the place for the next exhibition, which is to be held from Sept. 29 to Oct. 2, inclusive..... President Grant, in conformity with a decision effects of grouping eye has looked on outside the various landscapes along the Yellowstone. Over the green of the meadows is laid two feet of sand or proclamation became known the wildest exof gigantic gravel, every stone of which is a boulder. The plough of the torthe history of Little Rock was there such general rejoicing. Crowds of men, women and children thronged the streets, stores reopened,

self, and to end it at Northampton a railway embankment sapped and guttered and sucked away, a bridge gone, an immense factory roof lifted over an embankment into a mud-covered and rubbish-laden flat below, with washings to fever miles of ruin all around, and ninety minutes was enough to make an innety minutes was enough to make such chaos as this out of a New Eng-lution foreshadowed a partial restoration of the franking privilege. ... It is now estimated that this resolution foreshadowed a partial restoration of the franking privilege. ... It is now estimated that the reservoir that 145 persons lost their lives by the reservoir tard. has been destroyed to the value of \$1,000,000.

> A Suggestion. - Washington McLean, of Cincinnati, has made the following suggestion:—Let all the country towns at the time of the celebration be connected with Philadelphia by telegraph, so that all parts of the countrymay unite in the opening ceremonies, and even, though far apart, join in the same prayer and songs of praise. This would present the spectacle of the entire nation simultaneously celebrating the Fourth of July, 1876. Fourth of July, 1876.

IT WAS AN ANCIENT CUSTOM of the Spartans, in order to inculcate among

and possessing all the virtues, but none of the damning curses, of the different poisons which year by year are sweeping away thousands of dollars and lives. -com.

Factories and machine shops should not be allowed to run a day without Johnson's Anodyne Liniment. In case of a sudden accident, an immediate use of it may save weeks of suffering, and perhaps a limb, or even life.—

The Invalid ... A Pen Picture. See her pallid countenance, but a short time ago the picture of ruddy health, the envy of the school and the pride of the household. She was always welcomed by her schoolmates, for her lithe form and pleasing disposition carried cheerfulness into their ranks. Diligent, panetual and exemplary, obedient and graceful at home, she won the hearts of all. But, alas, we are sorrowed. Those resy cheeks and gradely are sorrowed. Those rosy cheeks and ruddy lips are blanched by Consumption. The voice once so enchanting in laugh and song is feeble, husky and supplanted by a hollow cough. Let us approach her couch gently and take her hand. Do not shudder because of the feeble and passionless grasp. The hand once so hearty and plump is emaciated and shows bony outlines, while the code and to the respective property. neary and pump is emerated and shows bony outlines, while the cords and tortuous veins are plainly mapped upon the surface. The pulse that bounded with repletion, carrying vigor to the whole system, and imparting life, beauty, vivacity, health and strength, is delicate to the touch. The feeble heart cannot propel the thin, scanty blood with force. Must we lose her while ret in per teems? Companions and her while yet in her teens? Companions and friends gather around with words of cheer and consolation, and depart with moistened eyes and silent steps. Must we lose her? No! there is relief! We can stay this destroyer of our happiness and not suffer the loss of so bright a gam. Something provides the received very the stay of the gem. Something more is required now than dietary and hygienic observance, for nature calls for aid and she shall have it. Take this pleasfor aid and she shall have it. Take this pleasant medicine. It is invigorating. How it allays the irritable cough, improves the appetite
and digestion, and sends a healthy tingle
through the frame. The blood is enriched,
nervous force increased, and the heart bounces
with a new impulse. See her face brighten by
degrees; the color is returning, her voice is
getting clearer, and pleasant words are spoken.
The strength falters yet, but is gaining. Let
us take her out in the warm sunshine. In a
short time she will be able to go without our
aid, a cheerful girl. This delightful medicine
must be God-blessed. It is restoring health to
our loved one. She is emerging from her our loved one. She is emerging from her sickness sweeter and nobler than before, and Dr. Pierce's Golden Medical Discovery must have the credit. It has raised her.

S. R. Eglar, druggist, of West Union, O., says that Dr. Pierce's Golden Medical Discovery has effected a wonderful cure of Consumption in his neighborhood.

fron in the Blood

MAKES THE WEAK STRONG.

The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitalizing Agent, Iron in the blood, and cures "athousand ills," simply by Toning up, Invigorating and Vitalizing the System. The cn-riched and vitalized blood pcrmeates every part of the body, repairing damages and waste, searching out morbid secre-tions, and leaving nothing for

disease to feed upon. This is the secret of the won-cerful success of this remedy in curing Dyspepsia, Liver Complaint, Propsy, Chronic Diarrhoea, Boils. Nervous Affections, Chills and Cevers, Humors, Loss of Constitutional Vigor, Diseases of the Isidneys and Bladder, Female Complaints, and all diseases originating in a bad state of the blood, or ac-companied by debility or a low state of the system. Being free from Alcohol, in any form, its energizing effects are not fol-lowed by corresponding reac-tion, but are permanent, infu-sing strength, vigor, and new life into all parts of the system, and building up an Iron Constitution.

Thousands have been changed by the use of this remedy, from weak, sickly, suffering creatures, to strong, healthy, and happy men and women; and invalids cannot reasonably hesitate to give it a trial.

See that each bottle has PERU-VIAN SYRUP blown in the glass. Pamphlets Free.

Florence, Mass.

egar Bitters are a purely Vegetable preparation, made chiefly from the na-tive herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are ex acted therefrom without the use of P .ohol. The question is almost dai , asked, "What is the cause of the unparalleled success of VINEGAR BIT-TERS?" Our answer is, that they remove the cause of disease, and the patient re-covers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. The are a gentle Purgative as well as a Tonio, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Billious Diseases.

The properties of Dr. WALKER'S VINEGAR BITTERS are Aperient, Diaphoretic Carminative, Nutritious, Laxative, Diuretic Sedative, Counter-Irritant, Sudorific, Alter-ve. and Anti-Billous.

Grateful Thousands proclaim VIN-EGAR BITTERS the most wonderful In-

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroved by mineral poison or other means, and vital organs wasted beyond

Bilious, Remittent and Intermittent Fevers, which are so preva-lent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive de-rangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to DR. J. WALKER'S VINEGAR BITTERS. as they will speedlly remove the darks colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs

Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take how of a system thus fore-armed.

Dyspepsia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, Fightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilions Attacks, Palpitatation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertise-

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Dis-cases, Walker's Vinegar Bitters have shown their great curative powers in the

most obstinate and intractable cases For Inflammatory and Chronic Rheumatism, Gout, Billous, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases, -Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VIN-EGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use

Pin, Tape, and other Worms. lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no nities will free the system from worms like these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of wo-manhood, or the turn of life, these Tonie Bitters display so decided an influence that mprovement is soon percep

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pumples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the yeins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow
