

The Coville Candy-Pulling. There was a "candy-pulling" at Mrs. Coville's residence, the other evening. There were some forty people present and they made a jolly occasion of it. Every one in attendance was pleased with the cordial welcome and assiduous attention given by Mr. and Mrs. Coville. And, indeed, that worthy couple did show a thorough appreciation. Mr. Coville, who has since, have won a little when some factious member of the party threw a two-pound lump of the candy on the stove-pipe, and roared to see it trickle down; and Mrs. Coville may have looked thoughtful a moment on discovering a pan of dripping molasses on the key-board of the piano; but they entered into the amusement with hearty good-will, and when the guests departed, at 2 p. m., it was with the unanimous expressed conviction that nobody ever had a better time, and that the Covilles were the sweetest people of their acquaintance. In another and less agreeable scene they certainly were. When the visitors were gone, the Covilles took a glance over their parlor, sighed audibly, put out the lights, and went to bed.

With the unrelenting light of day upon the rooms, the Covilles appeared to the best advantage as a very sweet family. Mr. Coville went down stairs in his stocking-feet, and as soon as he struck the hall he began to sneeze. Reaching the parlor, finally, with the cords in the backs of his legs aching from the exertions they were subjected to, he immediately collapsed into a chair and smote his forehead in abject despair. There were yellow streaks on the stove-pipe, dark stains on the keyboard of the piano, and auburn clots on the carpet, chairs, and wall. They were a light-hearted and joyous people, were those candy-pullers. There wasn't an article Mr. Coville touched against but that he and to leave him coming down, he found traces in his boots when he attempted to draw them on, and it seemed at one time as if he would have to cut his legs off at the knees to get free of them again. And when he rose up the chair came with him, that in each part way up—and then dropped off in an unexpected manner, and rapped him severely on a very sore heel. There was a sheet of paper on the chair, and gazed rather tightly to it, but with much melancholy expression of face to take a still tighter hold of Mr. Coville's pants, and to hang there even after its ally had dropped to the floor. And it being part of a programme of a panorama, and that part containing the principal announcement in very large type, Mrs. Coville, who had not made her appearance, and was trying desperately to free her stocking foot from an extra large job of the trouble on the door-still, was astonished and horrified beyond measure to behold her husband dancing about the room in a very ecstasy of rage, and with a very conspicuous manner. "Views of the Holy Land."

"Why, Ezekiel Coville, you screamed, 'what on earth are you doing with that thing on your pants?' "An outraged man only knows what I am doing or going to do," replied the miserably man, clutching at the panorama bill and bringing away a handful of it. "I never see such a house as this," he protested, with tears in his eyes, "since the day I was born. It is as good as \$200 in money, and my brains out against the wall, said he, glaring around gloomily, "if I could find a place clean enough to do it."

"I wouldn't be such hogs, if I were some people I know!" exclaimed the unhappy woman, sinking on a chair she burst into a fit of passionate weeping, while Mr. Coville renewed his agonized dance and hurled the most dreadful imprecations at society. But this was not all the trouble. Disfigured walls, a ruined carpet, and spoiled furniture were enough; but the crowning evil of the occasion, was the very pinnacle of the family despair, was Master Coville. Such a spectacle as that young gentleman presented, when he appeared, was never before seen in any family we are certain. There was candy in his ears, and down his neck, and down his back, and in his pockets, and on his clothes; and there was candy on the inside of his jacket sleeves, and so much of it that he could not, trying his best, get that garment clean from that way on. And as for his hair, no pen can describe it, and steam-iron would not attack it. It was just simply matted with candy. He had plugged headlong into a hoghead of the molten article, his cranium would not have been more thoroughly smeared with it, and taking that which boy could have been and how he got such quantities over him, no one could tell. To a mind of ordinary business capacity, it would have been a very difficult matter to decide which should be saved—the boy or the molasses. Mr. Coville, however, was not than he checked a mouthful of invectives with a suddenness that made him gasp, and, dropping into a chair, fell to staring at the struggling and besmeared youth with all his might. Mrs. Coville, with greater presence of mind, went for him at once, and taking him by the sound ear, shook him till he rattled like a popper of corn. All efforts to get a comb into his hair were unavailing; and, made desperate by its resistance, the disgruntled parents clipped it off—the father sitting on the struggling legs, and holding with the grip of a vice, the struggling arms, while the operation was performing. With his hair thus cut, the miserable boy was nearly driven to the verge of despair, but finds some consolation in feeling of an iron bolt which he constantly carries in his pocket, and which he designs driving, at the first favorable opportunity, against the skull of a certain insurance agent who was at the party.—Danbury News.

The Human Blood. The axiom that "we die daily" is aptly illustrated in a paragraph Prof. Redfern's paper on Biology recently read before the British Association. Referring to the blood, it is said that the duration of life in any of its particles is but short; they die and their places are occupied by others, and so continues the substitution which only ends with death. After every meal an amazing number of white corpuscles are added to the blood; breakfast doubles their proportion to the colored corpuscles in half an hour; supper increases their proportion three times, and dinner makes it four times as great. They come from such solid glands as the spleen. In the blood going to this organ their proportion is one to 2,200; in that returning from the spleen it is as one to sixty. Perhaps the most stupendous fact of organization is the steady maintenance of the slightly variable characters in the living and moving blood, which is every moment undergoing changes of different kinds, as it circulates through each tissue and organ in the body.

ORGANIZED BURGLARY. A Fact, and a Hint, and a Remedy. The successful masked robberies in banks and in private families suggest some efforts at a remedy, and in relation to bank robbers we find one in the following statement of the Hartford Times as to an occurrence in the attempted robbery of the bank at New Canaan, in Fairfield county. Mr. Raymond, the State Treasurer of Connecticut, lives in New Canaan. One night, about 1 o'clock, he was awakened (or perhaps he may not yet have gone to sleep) by a peculiar booming sound, like an explosion. He awakened his wife and asked her what that could be. She said it must be somebody blasting down the line of the new railroad; but Mr. R. (who was one of the bank directors) felt that nobody was engaged in "blasting" at that hour, and he hastily dressed and went toward the bank. This was three-quarters of a mile from his house. Before reaching the bank he saw three men around the bank steps, and another in front of the dwelling house opposite. Then another and another appeared; and Mr. R., wisely deeming it unsafe to go further on to the nearest house, ran up the inmates, then ran to another and awakened the family there, and then aroused the family in the next house. The robbers, seeing through the darkness the figure of a man running in the direction of a private property, retreated. Their wagons were ready waiting, and they all slid off in the darkness, ten or a dozen of them, Mr. R. thinks—driving toward the New York line.

On entering the bank, the neighbors found the door of the safe was blown off, but the inner one had not been opened. The watchman, on being released from the gag, said he was suddenly and silently seized by three men, in the darkness, on the bank steps, and he was coming down, and his hands held that he could not reach his revolver, while a third robber, with a stern command, "Not a word!" held the blade of a long glittering butcher-knife against the watchman's throat. Against the three others had been proposition of the house and family opposite the bank, and held the man, wife and children in one group, under threat of loaded revolvers; and that family, standing by the front window, were compelled to see that there was going on a robbery of the bank. After binding and gagging this functionary, the robbers placed him about ten feet from the safe, and, filling the lock with powder, lighted the fuse—one of the rascals remarking to the helpless watchman "We will wait a minute out doors." The explosion that followed was the sound that awoke Mr. Raymond and led to the arousing of the neighbors. Luckily for the watchman, though it blew off the heavy outer door of the safe, it didn't hurt him. Before lighting the fuse, the watchman, one of the robbers said to him: "I'm going to take out your gag for a minute to ask you a question. If you make any noise"—drawing a huge knife, and placing the keen edge of the glittering blade upon the prisoner's throat—"I will kill you. Now: Does the cashier of this bank ever come here in the night, after nine o'clock."

The watchman answered "No." "Does he keep the key to this safe?" "I honestly don't know. I am not in the secret." "Who has the key to this combination?" "I cannot say. I am only a hired watchman; I know nothing of these things." Finding this to be the case, they re-gagged and bound the watchman, and he remained in the building while the safe was burning for the explosion. For this explosion the guarded family opposite waited in compulsory silence, with almost as much interest as the poor watchman. The latter official, when he was seized, saw some of the robbers at the open house, one of them a tall man over six feet high, who had been seen in the village for nearly a fortnight, often passing the bank. Another had been seen about New Canaan for a few days before the night in question. Evidently they had thoroughly informed themselves of the character and habits of the bank officials, and had decided to blow open the safe, rather than go for the cashier. Mr. Raymond says that if they had had twenty minutes more, the robbers would have secured \$150,000 in money. As it was, they got nothing. It was Mr. R.'s wine course in quickly arousing a number of citizens that decided the robbers to beat a hasty retreat. They didn't relish the idea of an aroused neighborhood. Had he, or any two men of New Canaan, among them, their lives would probably have been sacrificed.

A Trouble in the Way. A candidate for Congress in the Milwaukee district was in the field two weeks distributing his money and making his name. It was estimated that the people who have fallen victims to the frauds of Minor number about 150,000. As a result of the terrible devastation among the cattle and flocks, it is stated that in one village out of more than 1,600 sheep and goats, just one sheep and one goat remain, and of 100 cows two remain. In another, from a flock of 1,200 sheep and goats, eight are reported; and from another flock in the same village, numbering 800, of which 700 were mohair goats, the same number, eight, is reported. The Agricultural Laborers Union of England received a deputation from Mississippi, and listened to their proposals for the immigration on a large scale of the farm hands of England to that State. The committee resolved to send a United States delegate to visit Mississippi and report on the prospects, and made an appropriation to meet the expenses of the inquiry. At midnight, Simon Wolf, an influential citizen of Byron, Greene county, Ohio, was waylaid, shot several times, robbed of a large sum of money, and left dead in the road. Not the slightest clue to the murderer has been obtained. The official vote on the Constitutional amendment of Connecticut, giving towns of over 5,000 inhabitants two representatives in the Legislature, was, for the amendment, 33,300 against 4,385, giving a majority of 28,915 in favor of it. Two towns made no returns. Locomotive No. 192 of the Central railroad exploded its boiler at West Albany, injuring three persons, but none seriously. The Western Division of the Brotherhood of Locomotive Engineers have recorded a protest against the reduction of wages as proposed by the various companies and partially carried out by the Chicago and Alton Railroad Company. They declare that the reduction is unjust and unequal for, and that it will not be submitted to. Mark B. Woodbury, of Antrim, N. H., hanged himself in his bath house. He was about sixty-five

NEWS OF THE DAY. Items of Interest from Home and Abroad. It is reported that General Concha is deliberating upon a general amnesty to the Cubans if they will lay down their arms. It is positively known that the rumors recently telegraphed from Madrid that Don Carlos had been killed, originated on the Madrid Bourse, where they sent up the Spanish funds. The czar of Russia informs the young men of his country that they have no right to enter monasteries before they have reached the military age, and not then unless in the company of their fathers. He was quite severe years ago. He was quite wealthy. Three years' imprisonment is the penalty in Canada for refusing to support a wife. The Nord, the organ of the Russian government, says the Montenegrin massacres cannot be overlooked; Turkey must mete out speedy justice to the perpetrators and make reparation for their crimes. The great powers have advised Porto to take this course. Angus McTavish, an old resident of Dunwich, Ont., met with a horrible death. In attempting to head off a steer, the animal attacked him furiously, carried him some distance on his horns, and dashed him to the ground. He died shortly after, suffering great pain. John Bosch has over two thousand men employed in Chester, Pa. The keels of three iron ships are now laid there. They are all designed for the Pacific Mail Steamship Company. The Ottawa express on the Chicago, Burlington and Quincy railroad, consisting of nine full passenger cars, was wrecked at Mt. Pleasant, Iowa. The whole train was derailed. Nineteen passengers were fatally injured and several killed outright. The information received from Southwestern Nebraska shows that thousands of people are in a starving condition. Many for weeks have had nothing to eat but baked squash and pumpkin and salt, and others live on baked flour and water, one meal a day, for weeks. Ten thousand people will need aid sufficient to keep them from starvation and cold during the winter. Hundreds of people are naked and on the verge of starvation, and without means to leave the State.

Out of Work and Out of Bread. The clearest and best proof of the want of or the presence of prosperity says the New York World, is to be found in the condition of the labor market. A winter of great hardship closed last spring with thousands of men longing and begging for work at almost any price. The inquiry has been seen then idle, and an attempt is made to show how far such enforced inaction extends. The figures which we have obtained are gleaned from a widely-extended personal observation. They develop a worse condition of affairs than any that have been taken into account which we have made an investigation has been entered upon in all branches of labor, from the highest skilled labor, bordering closely upon the arts and professions, down to the simplest form of manual labor. In the course of an investigation made in New York, the boats and cargo are a total loss. The chambermaid was lost but all the others were saved. Six fishermen were drowned off Lowestoft during the gale on the English coast. John McMahon has challenged any person in the United States to wrestle for \$1,000 or \$2,500 a side, square hold, best two in three.

Hamilton, the defaulting Treasurer of Jersey City, returned and gave himself up to justice. He tells a romantic story of his life in Mexico. The bookkeeper and bonds stolen were disposed of by the French government. It is reported that the French government has been informed of the government of the czar of his readiness, upon certain conditions, to support Russia on the Eastern question. The ship Magic, belonging to London, has been lost in a gale off Stonoway, on the Northern coast of Scotland. Twenty-four persons were drowned. The Dublin gas works were destroyed recently and the Irish city was in darkness. The United States ship-of-war Vandala, rebuilt in 1874, was launched at the Charleston Navy Yard, in the presence of a large concourse of spectators. The City of Brooklyn, which exploded her boiler on the lake, killing thirteen and injuring eleven persons, was racing at the time of the disaster. The Hoosac Tunnel will not be completed until one year from January. It is rumored that the Brotherhood of Locomotive Engineers in the West are preparing to inaugurate a general strike for higher wages. Some symptoms of the strike have appeared on the Chicago and Northwestern Railroad. An Italian, charged with the murder of two persons in Italy, was arrested in New York and taken home for trial. Bogus advertisements, calling for workmen, in New York city papers, have sent many unfortunate men there to be disappointed. A dispatch from Rome says: "The Pope received the Bishop of Verdun. He said he trembled at the dangers menacing France. It was necessary that the Catholics should unite their forces to meet these threatened evils and oppose the enemies of the church and society." Miss Lizzie Hoffmann, 49, was dropped down while waiting in a dance hall. The dance was stopped, and efforts were made to resuscitate her, but all to no purpose. She had been subject to attacks of heart disease, and, as she had taken part in every dance, it is supposed that the excitement brought on the fatal attack. She was 19 years of age. The hundred-mile walking match between Cook and Avery was completed at Lewistown, Pa., on Sunday morning, at 11:20 minutes. Cook and Avery's 23 hours and 21 minutes and Avery's 23 hours and 21 minutes. Third United States Assistant Postmaster General Barber expresses a belief that the government is annually defrauded out of a million dollars or five per cent. of the amount of stamps sold by the use of washed post stamps. The law officers of the British Crown have decided that a certificate of naturalization granted in the United Kingdom confers upon an alien no right or privilege in a British colony.

Georgetown, Mass., was visited by a \$250,000 fire. It is estimated that the people who have fallen victims to the frauds of Minor number about 150,000. As a result of the terrible devastation among the cattle and flocks, it is stated that in one village out of more than 1,600 sheep and goats, just one sheep and one goat remain, and of 100 cows two remain. In another, from a flock of 1,200 sheep and goats, eight are reported; and from another flock in the same village, numbering 800, of which 700 were mohair goats, the same number, eight, is reported. The Agricultural Laborers Union of England received a deputation from Mississippi, and listened to their proposals for the immigration on a large scale of the farm hands of England to that State. The committee resolved to send a United States delegate to visit Mississippi and report on the prospects, and made an appropriation to meet the expenses of the inquiry. At midnight, Simon Wolf, an influential citizen of Byron, Greene county, Ohio, was waylaid, shot several times, robbed of a large sum of money, and left dead in the road. Not the slightest clue to the murderer has been obtained. The official vote on the Constitutional amendment of Connecticut, giving towns of over 5,000 inhabitants two representatives in the Legislature, was, for the amendment, 33,300 against 4,385, giving a majority of 28,915 in favor of it. Two towns made no returns. Locomotive No. 192 of the Central railroad exploded its boiler at West Albany, injuring three persons, but none seriously. The Western Division of the Brotherhood of Locomotive Engineers have recorded a protest against the reduction of wages as proposed by the various companies and partially carried out by the Chicago and Alton Railroad Company. They declare that the reduction is unjust and unequal for, and that it will not be submitted to. Mark B. Woodbury, of Antrim, N. H., hanged himself in his bath house. He was about sixty-five

Hints to Comik Lekturers. Comik lecturing is an unknown pesky thing to do. It is more unsatisfying than the ratcheting business as a means of grace or as a means of livelihood. When it is done right, they can do it, and this is just what makes it so bothersome to do. When it is done right, it is a terrific success; but when it is overdone it is like a burnt snappaek very impertinent. Have a hint but please good judges of humor and they will help you. Whenever they have made up his mind that he is a wit then he is mistaken without remedy; but whenever the public has made up their mind that he has got the disease then he has got it sure. Individuals never get this thing right; the public never get it wrong. The public never cheat themselves nor other folks when they weigh out glory. There is just 16 ounces in a pound of glory, and no more, that is by the public. No man can be a helthy fool unless he has nussed at the breast of wisdom. Those who fall in the comik business are men who have bin put out to nuss, or bin fetched up on a bottle. If a man is a genuine humorist he is superior to the bulk of his audience, and will oftentimes have to take his pay for his services in thinking so.—Josh Billings.

An Historic Place. St. Augustine is situated on the eastern coast of Florida. The place has had a most eventful history. Menendez drew the attention of the Spanish nation to the spot by his landing there in 1565. St. Augustine was then occupied by a French colony. This colony surrendered to Menendez, and some sixteen persons were slaughtered. Sir Francis Drake attacked and burned it in 1586; the buccaneers now and then landed and plundered the helpless inhabitants, and Indians massacred the missionaries. A Richmond man, who had been complained of for keeping a vicious dog, put the animal upon the stand as a witness. On being asked if he would bite any one, he uttered a peculiar noise, and shook his head. He was then asked if he would bite his master set him on, and replied in the affirmative by nodding his head and barking. When asked if he would bite the court he bowed his head, and this secured for him an honorable acquittal.

Cremation of Lady Dilke. The Berlin correspondent of the London Times writes: "The body of Lady Dilke, who died some time ago in London, was burned at Dresden. The ceremony was performed in the furnace recently invented for burial purposes by Herr Siemens, and the relatives of the deceased lady permitting strangers to be present, a large number of scientific men attended the experiment. When the company had complied with Herr Siemens's request to offer up a mental prayer, the coffin was placed in the chamber of the furnace; six minutes later the coffin burst; five minutes more and the flesh began to melt away; ten minutes more and the skeleton was laid bare; another ten minutes and the bones began to crumble. Seventy-five minutes after the introduction of the coffin into the furnace all that remained of Lady Dilke and the coffin were six pounds of dust, placed in an urn. The brother-in-law of the deceased was present."

Try It. A tonic and alterative medicine, the invigorating and regulating properties of which actually lengthen life, and add to the capacity for its enjoyment, is within the reach of every member of the community. No invalid who has had recourse to Dr. Walker's Vinegar Bitters will hesitate to concede to it these invaluable qualities. It is a stomachic and a corrective of unvaried efficacy, yet being free from alcohol, it is not an excitant. Its anti-bilious operation is more direct, speedy, and certain than that of any of the dangerous mineral salivars, and as an aperient, it gently removes any obstructions that may have accumulated in the lower intestine, without producing either irritation or pain. In fact, its wonderful remedial effects are unaccompanied by any of the deleterious effects of the most harmless and salubrious aperients, it is far ahead of any of the alcoholic nostrums that momentarily stimulate the palate; while as a means of renovating a weak and torpid stomach, it stands alone among modern remedies.—Com.

Sent free, on receipt of neck and breast measure, height, weight and price, our (complete) Model \$2.00. Edited by patented method. Stylish and substantial. Address Model Shirt Co., 31 South 5th St., Philadelphia, Pa.

The improvement made in the Elmwood Manufacturing Co. has largely increased the sale. For those wishing a wide collar, the latter is the *ne plus ultra*. Don't fail to get it and try it.—Com.

The People's Stamp of Value.—The Government endorsement, which legalizes the sale of Plantation Bitters, is the only stamp affixed to that famous Vegetable Tonic. It bears, in addition to that official sanction, the still more valuable stamp of public approbation. This invaluable voucher of its rare properties as a Tonic, Corrective and Alterative is world-wide.

How to Look Young.—Don't neglect your face. Use Hair Restorer, and simply apply Hagan's Magnolia Balm upon your face, neck and hands, and use Lyon's Katholin upon your hair. The Balm makes your complexion pearly, soft and natural, and you can't tell what did it. It removes freckles, tan, sallowness, ring-worms, moths, patches, etc., and in place of red, rustic face, face has the marble purity of an exquisite beauty. It is used to make the face of a girl of perpetual youth. Add these effects to a splendid head of hair prepared by the Katholin, and a lady has done her best in way of adornment. Brothers will have no sister sisters when these articles are around.
