Grape Culture.

At this season of the year a good deal of labor is necessary in the vineyard, but it is particularly essential that the labor be bestowed just at the right time and in the right way. The good vintner will of course have pinched off the young branches at the next leaf after the last bunch of grapes. Where the vines are not closely pruned, the strong probability is that more bunches will put out than the vine is able to mature. Indeed, we doubt if there is a crop raised, either of fruit or grain, in which there is more making horrors more horrible, has been room for the exercise of good judgment brought to a remarkable degree of per-and close observation than in the cultiva-fection by the press. Such work exerts tion of the grape, and but few that yield as good returns for the labor. Pruning, if done according to any fixed rule, must necessarily be wrong in many cases. If the ground is poor, the pruning should be done close, if rich, longer. We are not favorable to too close fell and the done of the close fell and the done close but prefer to control the growth and shape of the vine by summer pruning. out, set off with a few graphically de-Hence, on account of the debilitated scribed saloon and brothel rows, a paper condition of the vine as result of excessive drought last summer, and the extreme cold last winter, we should say prune closely this summer. If in fall pruning three buds have been left on such spur, we should only allow each news. bud to produce two bunches of grapes instead of three, as they usually do. greatest educator in the world. The Then after throwing out two bunches of paper that, like Commander Bunsby, grapes and one leaf beyond the last bunch, pinch the vine off. Here at the them, succeeds in course of time in makstem of this leaf will come another ing a large portion of its readers think branch, which should be allowed to grow as it does. People think as they are until one leaf is found on it, when that branch should in turn be pinched off, After that all buds should be rubbed off, supposed to bear a tremendous responsias these will form sufficient foliage, and bility. The responsibility resting upon the sap is wanted to make good bunches | a newspaper teacher is as much greater of fruit, and to throw out good strong as his field is larger, and his term long shoots from the root, or near the root, for next year's wood. Here again it is set afloat by his effort should be his connecezsary for us to know what we are stant care. doing if we are to have good success and a good yield next year. These shoots publisher of the weekly should be tied up (about three of them), paper is unquestionably greater should be tied up (about three of them), so as to keep the wind from breaking them off, and when they are say two and one-half or three feet high and free from danger from that source, break off families from month to month. the smallest one, leaving the other two, which is enough. These should be allowed to grow until about four and one- girls in those families; the only incident half feet high and the tips pinched off. This will cause them to throw out good strong laterals, which are allowed to upon the influence of the paper. The grow, but should be trained on the upper wire of the trellis to shade the fruit which is hanging on the first and second wires. If these directions are carried out and the ground kept clean and loose | teachers in their schools persons of bad with a little manure, any man can have character. a supply each year of the most delicious and wholesome fruit that grows.

Train Your Trees. Now is an excellent time to go over all your trees and put them into shape. If this matter were attended to every season, there would be on large limbs to cut away, leaving huge sears to distigure your specimens. Another good reason for immediate performance of this work is that the wounds will heal over at once. Indeed the presence of a knife is almost unnecessary, as the unruly twigs may be pinched off without any de-triment whatever to the health of the specimen. It is really surprising what a little foresight in this way will acomplish. For instance, on a friend's lawn stands the handsomest specimen of the weeping beech I have over seen, and, as every one knows this tree is a crooked, ungainly grower when left to its own resources; but the specimen to which I allude has been pinched in, and tied in, until it is as round as a globe, with all the outer limbs curving gracefully to the ground. The owner says it was very ittle trouble ; but then, be it remembered, the work was performed at the right time. I know of some Rotiezer pear trees that are round-headed and compact, simply because they were frequently pinched during summer, and always just beyond an inside bud, while other varieties of a compact habit naturally were pinched off at an outside bud. This may seem trivial, but attention to the little things sometimes produces great results. After the bloom is over, the flowering shrubs should be shevred into shape—not on the "rule and line system," but the longer branches should be headed back, and on the trunks of the trees, and if necessary scrub them with strong soap suds.

# Salt and Insects' Eggs.

Says a Pennsylvania correspondent Observation leads me to believe that eggs, whether hen's eggs or the eggs of inacets, after having absorbed salt, will no longer hatch out. I have used salt on garden beds to destroy the eggs of inseets, and I have found that by so doing I have had less of certain kinds of insects to deal with afterward. Supposing this theory to be true, might not the farmers in the West, by sowing salt on their land destroy the eggs of the grasshoppers and perhaps other insects in numbers sufficient to do some good, as to small lots. This would of course be would be too dear or scarce. I make this suggestion simply to call forth discussion, and would like to read the opinious of others on the same subject. By bringing our ideas to the light, may it not be possible for us, in this day of invention and improvement, against the ravages of this destroying I said I believed that eggs which had aborbed salt will no longer hatch out. Will those who know, please

# Good Brend.

To have good bread a farmer's wife advises to take to the mill, when the water is neither too high nor too low, enough of your finest wheat to last you six months or a year, cleaned as you would clean it for seed. Tell your miller you are in no hurry; you wish him to grind it when he can do his best. loosely in barrels and keep it in a cool, or at dinner every day. Beef broth is to the place. And I care not whether you the old what milk is to the young. have red, white, or amber wheat, new process flour, or old process, you will man in health. If the stomach is out of have good flour. Next, to provide for your wife's use a good stove or brick oven, as she may prefer, and then see that she has plenty of good, sound, dry food beautifies the mind. Wrinkles are wood, split fine—about as much de-pends on the baking as on the making.

# Trouble Ahead.

"See that fat man, don't you Jack ? queried a bootblack at the post-office; "well, he's laying up heaps of trouble. When you see a man named Johnson, for instance, slying around to the general delivery window and getting little pink envelopes directed to 'De Forest' he's standing on the verge of the grave. The first thing he knows, his wife 'ill come down here and get hold of one of those purty little letters, and then she'll

#### The Responsibility of the Press.

Probably there is not an editor of a Wisconsin newspaper, said Editor Bright, in his address to the Badger State editors, who would allow a child of his access to the cheap literature that floods the country. He would guard it against the story papers and sensational novels as he would against bad people. They are full of mind poison. There are hundreds of daily and weekly newspapers that contain mind poison. found in its most deadly form in the horfection by the press. Such work exerts a baneful influence upon society. Espeing brains and blood, and eyes gouged is quickly thrown aside as uninteresting. A reader's interest in such things is, I believe, largely the result of cultivation, like the love of tobacco. Such reading turnishes neither food for thought nor

We claim for the press that it is the has opinions, and consistently stands by

The responsibilty resting upon the paper, coming once a week, furnishes the only influence felt by the boys and to a better life. What their life shall be depends too often more than it ought per which has no care for the moral influence it may exert, are more unfortunate than they would be with all the

### The Grasshopper's Enemies.

There are several insects that attack grasshoppers, and serve to materially lessen their numbers. The eggs are de voured by a mite, which crawls into the holes where the eggs have been deposited, and deposited, and deposited about as large as a small grain of wheat.

Another mite lives upon the insects at their late convention nominated the following and their late convention nominated the following at their late convention nominated the following and appears of the same and the sa holes where the eggs have been depositthemselves in great numbers, fastening into them with their jaws, eventually causing the destruction of the victim. It is much smaller than its preceding, but from its bright red or searlet color is readily seen, generally fastened to the grasshopper near the base of the wings. though not until it has left its body and burrowed into the ground. They then change to pupse, from which in time the mature flies appear. As a large percentage of the grasshoppers, when examined, are found to contain the living footless maggots of one or the other of these species, it is readily seen that they must do incalculable good.

# A Test Case.

Some years ago a German named Steineberg came to the United States thus encourage the weaker ones to grow, and resumed allegiance to the German Rub off all suckers as soon as they appear empire. Lately the son, who is twenty years of age, was drafted into the Ger-man army. He disputed the right of Germany to exact military service from him, asserting that he was by birth an American citizen, and appealed to the State department for protection. Young Steineberg asserts that he never renounced his citizenship, and argues that his removal from the United States was beyond his control. The case has been referred to the attorney general, and is considered by him one of great importance and intricacy.

# Half a Hog Apiece.

Statistics carefully collected by the Department of Agriculture reveal the startling fact that within the United impracticable on a large scale, or where States at this present moment there are two in Maine, two in South Carolina, one in "on the hoof" no less than 18,000,000 Massachusetts and one in Georgia. One of head of hogs. Exclusive of aged tooth- the Maine murderers, Louis Wagner (known less persons and young infants, and as the Sheals murderer), killed two women and those who abstain from pork as an un- severely injured another on Smutty Nose clean thing, there are now living in the Island, off the coast of Maine, for the sum of United States just about 36,000,000 fifteen dollars. He died douying his guilt, human beings. The altogether appaling John T. Gordon, the other Msine murderer, obvious, the horrible conviction being with his wife and infant child, and cruelly forced upon us that, within the next twelvementh, each individual able-bodied man, woman, and child within the boundaries of this misguided land, where once was liberty, must eat half a hog, or disturb the export and import succeeded in getting an old knife the morning equilibrium of the world.

Influence of Diet. For the mental laborer, fish every second day is requisite. Soup sets all the glands at work, and prepares the stomach for the more important function When you take your flour home store it of digestion, and therefore should be takorder, the brain is affected. We should eat more fruit, vegetable soup, and fish, and less meat. Good and well-prepared caused by want of variety of food. The man who does not use his brains to select and prepare his food is not above the brutes, which take it in the raw state.

# How does a Spider Make its Web?

Here is a poser put by a writer in Science Gossip, which some of our readers, who have watched the habits of spiders may be able to answer : How does a spider make its web, the lines of which, crossing at the center, are carried, some of them, to the surrounding objects, while others are fastened to an outer circular line, made evidently before the outer circular lines of the woof are formed? untie her bonnet strings and mop her husband all over these flags, and the public 'll get up'n 'rah for her side!"

And Jack began to ponder:

| Matter Strings and mop her circular lines of the woof are formed | tance of five hundred feet, causing instant death...... A colored man named Wm. Keemer it ejects the lines which form the spokes of the wheel | tance of five hundred feet, causing instant death..... A colored man named Wm. Keemer it ejects the lines which form the spokes of the wheel | tance of five hundred feet, causing instant death..... A colored man named Wm. Keemer it ejects the lines which form the spokes of the wheel | tance of five hundred feet, causing instant death..... A colored man named Wm. Keemer it ejects the lines which form the spokes of the wheel | tance of five hundred feet, causing instant death..... A colored man named Wm. Keemer it the best, purest and most economical attempted to rape a white woman at Rush..... Soap we have ever seen. Too much can not be said in its favor. Try it.

#### SUMMARY OF NEWS.

Items of Interest from Home and Abroad. The potato bug has appeared in parts of Long Island ... . Vassar College this year graduated forty-two female students ..... The British admiral in command in the Pacific has sent aid to the officers of the sunken United States steamer Saranao.....Policeman Jacob Suter attempted to arrest Patrick Mulligan, who was drunk and beating his family in St. Louis, when Mulligan picked up a chisel and stabbed the officer twice. City Marshal Chas. Born then attempted to arrest him and was also stabbed, when he drew a pistol and shot Mulligan dead. Both of the officers were severely injured . . . . Advices from New Granada corroborate the reports first received in regard to the earthquake. In the city of Cucuta alone between two and three thousand persons lost their lives, and property to the amount of over \$8,000,000 was destroyed ..... Heavy freshets are reported from France. The river Garonne overflowed and caused much damage by carrying away bridges and destroying crops... . While several workmen were repairing a steam-

boat cylinder at Hewes & Phillip's factory in Newark, N. J., some water inside generated steam, causing an explosion. Thomas Crane was killed and three other men were badly in jured ..... Two brothers have been convicted at Fortress Monroe of killing their father, and sentenced to eighteen years' imprisonment... A soldiers' monument was unveiled at Syracuse N. Y., with imposing ceremonies. The Tilton-Beecher case, which has been

before the courts of Brooklyn for many months, was brought to a close and the case given to the jury on Thursday, the twenty-fourth day of June. The same day an effort was made by the prosecution to have the case reopened for the admission of new and what was considered important ovidence, but Judge Neilson declined to have it reopened. He charged the jury at ome length, and his charge is declared by the cross as a model of impartiality. The court did not comment on the evidence, but warned the jury against misleading comments by counsel on both sides. The court did not consider the charge of blackmail, as that was thrown out by Mr. Beecher. On the great question of all, that of adultery, Judge Neilson was noncommittal, limiting himself to instructing the jury to disregard the arguments of the defendant's counsel that the oral evidence on this point deserves no consideration. He instructed them to fairly weigh it all, and told them that and Irish teams took place at Dublin before they were not to throw out without examination the testimony of Mr. Richards nor even that of place in the city. The excitement was great Mrs. Carey. The case was given to the jury, and heavy bets were made on the result. The which retired. At ten o'clock at night they had shots were at targets 800, 900 and 1,000 yards not agreed upon a verdict and were locked up distant, and for the 800-yard target the Irish for the night without food.

GEO. V. HOUSE, M.D., Superintendent Elastic Trues Co.

Beor. No. — After suffering for thirty sears, in my own
purson, from the use of every form of Metallic Trues procursitie in this country and in Europe. I two years ago,
appilled your Elastic Trues, and since that time I have
apperionced comfort and existraction, and been taught
the truth, that the Elastic Trues is the colly instrument
that should be used for the rolled and core of Hernia;
and now after more than thirty years' continuous procetion, and having adjusted many hundreds of Trueses
(and for the last twenty mouths pours exclusively), I
gratefully declars it to be my deliberate opinion, that
gover Elastic Trues is the only one entitled to the counfdence of the public; that elasticity is the only ower at
all adapted to the requirements of a Trues or hopporter,
and an convinced that your Elastic Trues is to any
one knowledge of patients from Sot of Symars of ago.

Prof. of Anatomy and Surgery, N. Y. E. Medical College.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the naive herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BIT-TERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood pur fier and a life-giving principle, a perfec Renovator and Invigorator of the stem. Never before in the history o the world has a medicine been compount id possessing the remarkable qualities f Vinegar Bitters in healing the sick of e cry disease man is heir to. They are a ge tle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs in Bilious Diseases

The properties of Dr. Walker's r INSGAR BITTERS are Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Diuretic, Sedative Counter-Irritant Sudorific, Altera ve, and Anti-Billous.

Grateful Thousands proclaim Vrs EGAR BITTERS the most wonderful Invigorant that ever sustained the sinking

No Person can take these Bitters according to directions, and remain long ur well, provided their bones are not deby miners poison or other st royed reans, and vital or, ans wasted beyond

Bilious, Rem ttent and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illis ois, Tennessee, Cumberland, Arkansas, Rec. Colorado, Brazos, Rio Grande, Pear', Alabama, Mobile, Savannah, Roanoko, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumen, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver. and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various gans, is essentially necessary. There is no cathartic for the purpose equal to DR. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold of a system thus fore-armed.

Dyspepsia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitatation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertise-

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipetas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Dis-cases, WALKER'S VINEGAR BITTERS have shown their great curative powers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remit-tent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases. - Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples Pustules, Boils, Carbuncles, Ring-worms Scald-head, Sore Eyes, Erysipelas, Itch, Scarfs, Inscolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use

of these Bitters. Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermituges, no authelminities will free the system from worm

like these Bitters. For Female Complaints, in young or old, married or single, at the dawn of wo-manhood, or the turn of life, these Tonic

Bitters display so decided an influence that improvement is soon perceptible. Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, E untions, or Sores-cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system

will follow.
