THURSDAY, APRIL 19, 1877

It is contended by the best informed Republicans at Washington that if the roll of the house is properly made up it will stand 149 Democrats to 144 Republicans. According to Clerk Adams' showing the Democratic majority at the opening will be ten or eleven, and when the seats are full fifteen. Mr. Adams is busy cyphering and straining every point to give his party the largest possible majority, knowing full well that in their deelining power as much strength as possible must be secured. If, however, a number of southern members should act with the Republicans the Democrats will find themselves in a hopeless minority. Of this there is a strong prospect.

Many persons are surprised that the public debt last month was decreased \$14,107,016,41, and are at a loss to account for it. It is explained, however, by the treasury officials, that it arises from the cancellation and destruction of the balance of the 5 per cent. bonds of the funded loan of 1881, held in trust for the payment of the awards made by the court of commissioners of the Alabama claims, as provided by the fifteenth section of the act of June 23, 1874, viz: \$7,150,000, balance of the original investment of \$15,500,000, and \$2,403,800 representing accrued interest thereon. It may be some time before the statement shall show such large and gratifying decrease.

A special fast freight train of twenty cars, containing tea and silk, from San Francisco, via the Baltimore and Ohio line, reached New York recently, making the trip in ten days. Few persons have any idea of the revolution that the Pacific railroads have made in the ten and silk trade. This ten is delivered in New York in about thirty days from China, and may be put in London in forty days. The best time by the Suez Canal is 112 days, and by sailing vessel and steamship by other routes this time is extended to 150 or 175 days. This shows conclusively that tea and silk must all go over the Pacific roads.

The largest machinery easting ever made west of the Alleghenies, was successfully poured a few days since by Totten & Co., of Pittsburg. Seventysix thousand pounds or thirty-eight tons of metal were melted for it. The casting is for use in making plate glass, and when completed will be twenty-two feet long, eleven feet wide and eight inches thick. The plate was ordered by Colonel Ford-the pioneer in this country in the manufature or plate glass-and is for use in the new works at Jeffersonville, In-

Three of the steamers which sailed from New York on Saturday for European ports took out large quantities of fresh beef. The City of Richmond. for Liverpool, took out 200,000 pounds the Celtic for Liverpool, over 90,000 pounds, and the California, for Glas gow, 95,000 pounds, besides 2,000 quarters of fresh beef and a number of live sheep. All the steamers also carried large quantities of bacon, pork and lard, and with the Necker, for Bremen, took out about 100,000 bush els of grain.

A natural bridge far more wonder ful than that in Virginia has recently been discovered in Elliott county, Kentucky. It is of solid stone and forms a magnificent arch 162 feet long and 15 feet wide at the top the river (the Little Chaney,) rolling over 100 feet below. Fifty yards above the bridge is a waterfall 69 feet high, and the view from the bridge is said to be extremely beautiful.

The Pittsburgh Post says the orders to the iron mills of that city are coming in from the southern states in a lively manner.

The New Jersey Scnate having failed to confirm the Republican nom-inations of Governor Bedle, he thereupen advised them to adjourn which they immediately did.
