Subsequently the house was owned by Caleb Dill.

-B. F. Rhoades, of Fox township, has invented a new saw tooth, for circular or upright saws, which planes the lumber as it is sawed. The planer is fastened to and runs a sixteenth of an inch ahead of the old-fashioned tooth. He has also invented a saw, for the use of carpenters and others. which has two chisel teeth and a clearing tooth, these being repeated the length of the saw. He claims that this saw will rip a board better than the old-fashioned rip saw, and it will also cut a smooth joint, thus combining two saws in one.
