

FARM, GARDEN AND HOUSEHOLD.

Fruit Pests. Pear blight has in several instances been arrested in affected trees by spraying them with a solution of potash, and it has proved an effective remedy when applied to the healthy trees.

A German gardener has found by experience that black or green flies, caterpillars, etc., are at once destroyed by spraying the plants affected by them with water in which the stems of the tomato plant have been boiled.

Diseased apple or pear trees are sometimes attacked by insects. There is a remedy which causes the old decayed tissue to cleave off, leaving in its place a smooth, healthy surface.

Frequent inquiries are made for the best methods of destroying insects that infest trees. The following suggestions we call from the Atlanta Constitution horticultural department.

One remedy has been tried and generally proven beneficial. One remedy is to spray with a solution of lime.

Another remedy is to spray with a solution of kerosene. This is done by dipping a brush in the kerosene and applying it to the affected parts of the tree.

Another remedy is to spray with a solution of sulphur. This is done by dipping a brush in the sulphur and applying it to the affected parts of the tree.

Another remedy is to spray with a solution of lime. This is done by dipping a brush in the lime and applying it to the affected parts of the tree.

GATHERING CAOUTCHOUC.

Interesting Account of the Manner in which this Rubber is Collected in Central America.

As visitors on a Nicaraguan rubber-hunt, we must be dressed in strong but light clothing, stout shoes, with canvas leggings and gaiters and wear a sun hat that we can pull down over our ears.

We must also be very careful not to touch with our hands any tree, branch, vine or plant, as we may grasp some stinging insect, or thorns which may not only be very sharp, but poisonous as well.

We must also be very careful not to touch with our hands any tree, branch, vine or plant, as we may grasp some stinging insect, or thorns which may not only be very sharp, but poisonous as well.

We must also be very careful not to touch with our hands any tree, branch, vine or plant, as we may grasp some stinging insect, or thorns which may not only be very sharp, but poisonous as well.

We must also be very careful not to touch with our hands any tree, branch, vine or plant, as we may grasp some stinging insect, or thorns which may not only be very sharp, but poisonous as well.

FOR THE FAIR SEX.

A Leap Year Proposal. Pray, gentle being, give me heed, As kneeling humbly at thy side.

With lacerated heart I plead That thou'lt become my blushing bride. I long— I wildly long to press Thee to my heart, yet stand alas— I pine to orient of maidhood.

Why, tell me why thine eyelids drop And turn away so pathetically, And why with fierce, tumultuous fop Thy bosom heaves convulsively? I know that thou art young and fair As tiny buds in early spring— But thou shalt be my constant care, Thou frail and fragile little thing.

I'll show thy skirts and darn thy hose, Thy vestments o'er, thy dress will light—I'll grease thy gracious Gown nose. Even now, my dear, thy night, So, surely, thou'lt not tell me no, And bid me dying quit thy side.

Brace up, pull down thy vest and say That thou wilt be my blushing bride. —Kansas City Times.

Fashion Notes. In both evening and walking dresses and many other articles, to be seen with our hands any tree, branch, vine or plant, as we may grasp some stinging insect, or thorns which may not only be very sharp, but poisonous as well.

We must also be very careful not to touch with our hands any tree, branch, vine or plant, as we may grasp some stinging insect, or thorns which may not only be very sharp, but poisonous as well.

A Famous Journalistic Feat Retold.

Happening into a Washington periodical the other day, I encountered Joseph Shillington, one of the oldest men in the business. He was originally sent to Washington to superintend the delivery of the Baltimore Star to its subscribers. He said to me: "Do you know I gave the Star what its proprietor, Abel, always said was the biggest piece of news he ever got?"

"What was that, Mr. Shillington?" "It was the explosion of the big gun on the Princeton about 1844. Commodore Stockton had been here, and his big ship to give Congress and the administration an excursion. The ship went down the river to somewhere near Fort Washington, and there, while most of the people were on the shore, a party of the crew, called the Peacemaker, fired off. It burst and one of the pieces killed Secretary Upham, while Secretary Glimmer was crushed to a human wad. Two other men, Gardner and Mearns, were killed at once. Gardner's daughter afterward married President Tyler. Commodore Kennon was killed. Commodore Stockton was temporarily blinded, and Senator Tom Benton and four Congressmen were also killed, and the servant killed. Some people said that Benton was a little crazy after that accident."

"This accident happened," continued Mr. Shillington, "pretty late in the afternoon. I was on the Peacemaker in Washington until something like nine o'clock at night. I was not a writer of anything, but I saw there was an opportunity to give the Star a big hit. The first thing I wrote was to Stettin, reminding the Baltimore and Ohio railroad here, and secure a locomotive. It cost me \$75. Mr. Abel was not always liberal and I felt that I was taking a risk. At that time there was only one locomotive in the city of Baltimore. Washington, one in the morning and the other in the evening; therefore I had a clear track. I kept the locomotive with steam up in the old depot on Pennsylvania avenue until I could overtake the train coming from Baltimore. The locomotive was an old tanner in the Catskill mountains, and had taken more than 1,000,000 sides of leather. Pratt saw the explosion and gave me the patent for the locomotive. I took the depot I found in Baltimore. General, Charles Wickliffe, standing there. 'What is this locomotive for?' he asked. He was told it had been privately chartered on newspaper business. He looked at me and asked me to take it to North. Said I, Mr. Postmaster, General, you can't send anything by this locomotive! This is a newspaper locomotive! Wickliffe was quite indignant that there should be any such thing, and he ordered me to get it out of the depot. I said to the engineer: 'The government will pay for this! Never your mind, I said to the engineer and fireman, and I got aboard and we were on the way. The state of the road and kind of locomotive would allow to Baltimore, nearly forty miles distant, which we reached in one hour and a half. I got there about eleven o'clock; the composition had already been printed and the edition was on the press. I had taken the precaution to fire the engineer and fireman and make them go right back to Washington and talk to nobody in Baltimore. I said to the pressman, 'Stop this paper for tonight. I want to make them understand anything. Then I went down to Mr. Abel's house; he lived on Water street. He put his head out of the window with a night-cap on and asked who was there. Finally, he came down stairs and inquired of me to the press room. We had sent out for compositors previously."

"As soon as the composing room was lighted up the *Clipper* and another newspaper had already been printed and the edition was on the press. I had taken the precaution to fire the engineer and fireman and make them go right back to Washington and talk to nobody in Baltimore. I said to the pressman, 'Stop this paper for tonight. I want to make them understand anything. Then I went down to Mr. Abel's house; he lived on Water street. He put his head out of the window with a night-cap on and asked who was there. The uniform green color of the vegetable world is due to chlorophyll. This substance, however, exists only in minute quantity in plants, the leaves of a large tree containing perhaps not more than 100 grains. It appears to be a direct product of the action of the sunlight upon vegetation as it does not exist in plants kept in darkness. The changes in the color of leaves in autumn are supposed to be due to the oxidation of their chlorophyll.

Busy-bodies are almost always idlers; the less business a man has, the more he meddles with that of his neighbors.

Dr. H. R. Stevens. Dear Sir—I feel very grateful for your valuable medicine, VEGETINE, has done me much good. I wish to express my thanks to you for the wonderful cure of my son; and also to let you know that I have used the best medicine I ever saw for Chills, Stomach, Fever and Ague. My son was sick with malaria in 1873, which left him with the best of his health. My son suffered a great deal of pain, all the time; the pain was so great he did not want to eat. The doctor would not help him; he could not move without crutches. I read your advertisement in the "Louisville Courier-Journal," that VEGETINE was a great Blood Purifier and Blood-Tonic, and that it was a great benefit. He kept on with the medicine, gradually getting better. He has taken eighteen bottles in all, and he is completely restored to health, walks without crutches or cane. He is twenty years of age. I have a younger son fifteen years of age, who is subject to Chills. Whenever he feels one coming on, he comes in, takes a dose of VEGETINE and that is the last of the Chills. He never had any other effect upon the system like most of the medicines recommended for Chills. I most of the medicines recommended for Chills. I most of the medicines recommended for Chills. I most of the medicines recommended for Chills.

POND'S EXTRACT.

Subdues Inflammation, Controls all Hemorrhages, Acute and Chronic, Venous and Mucous. The Wonder of Healing. KEWWOOD SMITH, M. D., M. E. C. P., &c., &c., of the Hospital for Women in Soho Square, London, writing to "The Lancet," under date of August 23, 1879, says: "POND'S EXTRACT is a good preparation. I have used it for some time (ten to fifteen minims) with marked benefit in cases of passive uterine hemorrhage."

POND'S EXTRACT. THE VEGETABLE PAIN DESTROYER. DR. ARTHUR GUINNESS, F.R.C.S., of England, writes: "I have prescribed POND'S EXTRACT for Hemorrhoids of different kinds, for Hemorrhoids, and for affections of the eyes, and also in Rheumatic Inflammatory swelling of the joints, with great success."

POND'S EXTRACT. HEALING—COMFORTING. DR. HERRING, a physician of national reputation, says: "This medicine comprises the virtues of Aconite and Arica, and contains a tonic property which renders it immeasurably superior to both."

POND'S EXTRACT. A RENOVATED MEDICINE. DR. A. E. SHERMAN, of Brooklyn, N. Y., writes the Medical Union, "Out of 130 cases of Egyptian Ophthalmia (disease of the eye), 130 cases were cured by POND'S EXTRACT."

POND'S EXTRACT. USED ONCE—USED ALWAYS. DR. H. G. PRESTON, of Brooklyn, N. Y.: "I know of no remedy so generally useful in a family."

CAUTION. POND'S EXTRACT is sold only in bottles with the name blown in the glass, and our landscape is on the neck of each bottle. If it is used in any other articles with our directions, instead of having POND'S EXTRACT, refuse all imitations and substitutes.

POND'S EXTRACT, 50c, \$1.00 & \$1.75. DR. H. G. PRESTON, of Brooklyn, N. Y., writes the Medical Union, "Out of 130 cases of Egyptian Ophthalmia (disease of the eye), 130 cases were cured by POND'S EXTRACT."

POND'S EXTRACT. USED ONCE—USED ALWAYS. DR. H. G. PRESTON, of Brooklyn, N. Y.: "I know of no remedy so generally useful in a family."
