GUITEAU is out with another card, in which he denounces his relatives in unmeasured terms. "Had they died," he says, "a twenty-five years ago, it would have been a godsend to me." He charges Mr. Scoville with a desire to get control of his (Guiteau's) book, and says he has already paid Mr. Scoville \$275,000 which is more than his alleged services are worth.

THE President has notified General Fitz John Porter, in answer to his petition for relief from the sentence of the court martial, that he can do nothing in the case, as it is entirely beyond his power. This action is based upon an opinion by Attorney-General Brewster, and received the unanimous concurrence of the cabinet.

THE attorney-general holds that the President has no power to review the proceedings of the court martial and annul its sentence, and therefore can afford the applicant no relief through a revision of the sentence in his case. "That sentence," he says, "involves immediate dismissal from the army and disability to hold office thereafter. The dismissal is an accomplished fact, and so far the sentence is completely executed. The disability is a continuing punishment, and in regard to that the sentence is being executed. The letter may be annulled by the exercise of the pardoning power, but the former cannot in any way be affected thereby. Thus a pardon would not restore the applicant to the office in the military service from which he was dismissed. This could only be done by an appointment under special authority from Congress."

WOOD CARVING. Wood carving is a feature of the interior decoration of modern New York houses, and is carried to the very highest style of art. The *Evening Post* says: "Ten years ago the number of accomplished wood carvers established in New York did not exceed 100, and their work was done by hand upon fine furniture. At present 1,000 competitors may be found to do the finest kind of wood carving, and a new industry may be said to have sprung up in this department of work. Two firms alone have in their employ for the last two or three years nearly 600 carvers, whose work may be seen in many of the finest houses of the city. With a taste for stained glass has come the art of painting the panels of the wainscoting, of the ceiling, doors and staircases. The chimney-pieces in the finest houses, such as those of the Vanderbilts, are monumental masses of carved wood; each post of the stair-rail is a work of art which has cost weeks of labor, while the newel or large post at the foot of the stairs is worth thousands of dollars, and is probably inlaid with precious marbles. The furniture in such houses has to present more cunning work of the carver's tools in order not to appear coarse, and in consequence it is not uncommon for the work upon one bedstead to cost thousands of dollars. A walk through the new streets will show that wood-carving is popular not only with the millionaires, but with people of modest fortune; scarcely a new house or any pretensions at all but has a band of oak or slatans leaves carved in the woodwork of the door, indicating the character of the decorations within. For the last four years carvers have been coming from Europe in such numbers that the forces have fallen considerably late. The very finest workmen, especially those in the possession of some secret processes of doing difficult work, receive wages as high as \$8 a day. The average pay of good wood carvers is from \$4 to \$5 a day. The process of ebonyizing cherry wood, for instance, used by one of the firms visited, is a secret known only to the workman who does it.

AN unusually brilliant specimen of "red snow" was recently presented at the meeting of the San Francisco Microscopical Society. It was gathered on the Wasatch mountain at an altitude of about 10,000 feet above sea level. It is now very well understood that the color of such snow is produced by a minute cellular plant which reproduces itself by rapid subdivision.

EMPEROR WILLIAM'S HELMET. Among the curious trifles that adorn the writing table of the German emperor is an old cavalry helmet, the special use of which is one illustrative of his kindness of heart. Ever since he ascended the throne he has manifested a disinclination to affix his signature to any decrees of death, and, indeed, to any penal decrees of any kind whatever. Whenever, therefore, such decrees are laid before him by his ministers of state, he is accustomed to hide them away under his helmet. It has frequently occurred that officials, anxious to obtain his majesty's sanction to the proposed decrees of death, and, indeed, venturing to present him with the papers, have been surprised to find that the edges have slightly protruded from under the helmet's brim. In ten cases out of twelve, however, this hint has been overlooked, and the emperor, as soon as he has caught sight of the papers peeping out from the place of their concealment, has quietly pushed them back again and forbidden ever thereafter from making any allusion to the incident. In such cases the offending documents have been discreetly destroyed and destroyed, it being obvious that his majesty would never be induced to sign them.

IF you gain an advantage over your fellow man, call it shrewd diplomacy. If your fellow-man gains an advantage over you, call it casualty. The terms are synonymous.

WELL INJURED BY OUR OWN CITIZENS. No matter how useful any citizen may be in itself, good intentions seem to increase in badness as they increase in number. The field for the display of his special merit is for the most part, a narrow one. We were thus impressed in view of the following statements received by one of our representatives from leading individuals connected with some of the largest enterprises of the city. Among other noteworthy testimony was freely given by W. V. Starns, Esq., master of the Conn River Railroad, residing at No. 28 Boylston street, who observed: "St. Jacobs Oil has remarkable effect among the men employed on the Conn River Railroad. My arm very badly, and by the use of St. Jacobs Oil was greatly benefited, and the arm was healed. Another used it for severe rheumatic pains in the knee, and pronounced the Oil a complete success as he cured it. I had a severe case of Pleurisy of the 'Ray & Taylor Manufacturing Co.' was pleased to say: 'My aunt, Mrs. Pillsbury, of Mount Clear, N. J., while visiting at our house tried St. Jacobs Oil for rheumatism and neuralgia, and found immediate relief. She pronounced it the best thing she had ever tried for the trouble. Mr. J. B. Weston, 45 Greenwood street, Supt. Car Works, Boston & Albany Railroad, thus addressed our report: 'I am one of the unfortunate who have had the good luck to find the most wonderful remedy, St. Jacobs Oil. I had rheumatism in the shoulder severely and could find no relief until I used the Oil. I applied it and must confess I was surprised at the result. I am almost well and expect to be entirely so in a few days.'—Springfield (Mass.) Union."

THE most precious of gifts Health is undoubtedly a most precious gift than riches, honor or power. Who would exchange it for these, the chief objects of human ambition? It is obviously the part of wisdom to employ means for the preservation of health and the prolongation of life which time and experience have proved to be reliable. Many of the dangers by which health is threatened may be avoided by the use of that most irreplaceable of remedies, Dr. Williams' Pink Pills for Pale People. These pills, which, by increasing vitality and rendering the physical functions regular and active, keeps the system in good working order and protects it against disease. For constipation, dyspepsia, liver complaint, nervousness, kidney and rheumatic ailments, it is invaluable, and it affords a sure defense against malarial fevers, besides removing every source of such disease from the system.
