Vanderbilt Swallows a Very Formidable Rival.

[Titusville Herald.] A. H. Steele, Esq., received a telegram from an authentic source in New York yesterday, that the Nickle Plate road had undoubtedly been sold to Wm. H. Vanderbilt. The great railroad king thus becomes possessed of a well built and splendidly officered posed of the great rival of the Lake Shore & Michigan Southern road.

The Nickle Plate road extends from Buffalo to Chicago, and has been two years building. From Buffalo to Bellview, O., the road parallels the Lake Shore & Michigan Southern. It then bears off to the south until it strikes a point on the Pittsburg, Fort Wayne & Chicago road, which it parallels into Chicago. Its entire length between the two cities is 526 miles, or 28 miles

further. The road's right name is New York, Chicago and St. Louis, but it was nicknamed Nickle Plate, by an Ohio man, of course, editor of the Norwalk Chronicle, on account of the fancy manner in which it was built. The Address Dr. Chase's Steam Printing lucky editor received an annual pass for his happy thought.

Bosses Hateful to All Patriots.

[Missouri Republican.] All patriots, whether Republicans or Democrats, are alike interested in the demolition of "bosses" and "bossism;" alike interested, but in much higher degree, in putting a permanent check to federal interference in the political affairs of states. We hope and believe that on the morning of the 8th of November next the administration will be considerably wiser and less happy than it is to-day; and that the final downfall of "bosses" and "bossism" will date from the lesson then taught publie servants in regard to their proper sphere and vocation.

A Great Oil Syndicate.

Titusville, Oct. 81 .- One of the greatest bullish syndicates ever organized and known to the oil trade will be consumated to-morrow, November I, by the parties concerned signing the necessary documents. The scheme is to enroll all the leading producers in ence by many who may be compelled the oil country to discontinue the drill for six months from date, to May 1, 1883. Among the largest producers who are forwarding this scheme to completion are McKinney & Co., Union Oil Company, Tidewater Pipe Company, John J.Carter, H.B. Porter and others. All the parties concerned shall have removed therefrom and reare determined men and will carry the scheme into successful execution

OIL OPERATIONS FOR OCTOBER, The report of oil operations for October is ready and is fully as bullish as was anticipated by the trade. It shows that at the close of the month there were in the entire field 128 rigs up and building, against 176 the month previous, and 169 wells drilling against 125 in September. The increase in the drilling wells is undoubt. edly due to the better prices for petroleum causing a partial resumption of operations. The number of wells completed during October was 116, with a production of 1862 barrels per day, against 170 wells and 4549 barrels production in September, the falling off being in great part caused by the sudden collapse of Cherry Grove, though there is undoubtedly a gradual decline in all the oil fields. The fact that twenty dry holes were found indicates that the wildcat operator has been seeking new fields or testing the outer edges of the defined territory. But eighteen wells were completed in the Bradford field, with a production of 319 barrels, an increase of four wells of court, commencing Monday, Nov. and a decrease of sixteen barrels pro-

Allegheny comes to the front with an increase of sixteen wells and 183 barrels production as compared with September, and is the only field showing an increase both in wells and production. Although considerable ac-tivity has been displayed in Baldridge, Butler county, and Cranberry, Venango county, the daily output has only been increased 225 barrels, against 298 in September. Cherry Grove completed thirty-nine wells, most of which were drilling in September, and only added 515 barrels against the yield the previous month of 3296 barrels. There are thirty-one wells drilling in that field, many of which are not expected to pay the cost of putting down. Both Bradford and Allegheny are pretty thoroughly drilled, and little will be done in the immediate future in those sections at
