association, the discs, principle is objectived in these preaching services. The sermon on Thursday atternoon of which the folsowing is o brief synopsis, was presched by the Rev. Wall B. Taxros, pastor of the Third Reformed Duton. Ohnroh of this oliv. The subject as anyounced attore, was a rapid review of this object as anyounced attore, was a rapid review of this object of Tchovan's attibutes, and was furnished upon the following passage of Scripture.

(And the Lord dose field in the cloud, and stood with him there, and problemed the name of the Lord. with him there; and, protained the name of the Lord with him there; and protained the name of the Lord was and protained the name of the Lord was and protained. The Lord The Lord God, meroful and gradious long; anfering and abundant ingood new and truth, keeping merey for thousands for regiring inigility and transgression and alm, and that will by no means clear the guilty visiting the iniquity of the fabers upon the children, and upon the children's billdren, unto the thirdren's billdren, unto the thirdren and fourth generation. Beadway xxxiv, 5, 6.7.

This, said the speaker in openings was God's answer to the prayer of Mosea: (1 beseech the billshow meetry glory, and coorded in the lab lab and in the period of the region of the proceeding chapter. It was highly probable that the period or rouncies conception of what he was resulting sking, yet the answer as recorded in the text was striking, august, and impressive and considered the grandest theme that could engage the mind of men of any and the property of the proceeding the mind of men of the of the period of the third of the region of the proceeding the mind of men of the period of the period of the region of the period of the period of the period of the period of the region of the period of the per men of singels and the propositions was in the solid with the legin? To be finite creatives the guestion "What is God ?? could only be re-celeved to the sties." Yet God had in this language to Moses given us an answer and, though we could not find out the Almighty to perfection," there was in these words engine indicated to sink deep down into the souls of his creatures, to their own coinfort and to his glory. He proposed to consider this subject in three parts: Frst, The sovereignty of God's nature in his suctionity. Secondly, The depth of the riches of his grace; and Thirdly. The severity of his justice. justice: The first of these propositions was implied in what to us mortals was God's own incemin what to us mortals was God's own incommunicable name—Jehovah! Left to our own unaided, conceptions, we, could form no adequate idea of that august name. "His representation in the Bacred Word as "the Alpha and Oniega," impressed, as with a will granden; of his nature as the self-existent, independent Oreator and preserver of the universe; and it was a significant fact that irreverence among then, even in its basest and lowest forms, was seldom, if ever, associated with the profane use of this terrible name. At this point the speaker drew; with thrilling effect, the misconceptions, doubts, and fears of those who, realizing the power and omnipotence of God; look only with trembling fear to that point in the future where they may be called upon to meet Him in judgment. This, said he, was a speales of fear which God's creatures need not necessarily entertain. It was true we were commanded to fear Him, but it was fully a fear of simining against his holy it was only a fear of siming against his holy it was only a fear of similing against his holy name.

It was particularly important to the proper understanding of the subject, that we should remember the occasion upon which the words of his text had been addressed to Moses. This language had been given immediately upon the giving of the Law noon Mount Sinal, and the idolaty into which the Israelites had fallen in their impious worship of the molten call. It had been then, after Moses had been pleading with God to spare the guilty race; that the revealation of his glory had been made, which he was now about to consider. From this revealation of Jayovah, his goodness radiated inheavenly splendor, and was at once reflected from everything that manated from his hands, from youder concave to this his footstool i throughout the stupendous whole this divine goodness was apparent—it. ils divine goodness was apparous.

16. was important, now, that we should look at this name in all its phases and characteristics. Johovah! God, metrilul. How this glowed in all the glittering glories of the Gospel! "Like as a father pitieth his son, so the Lord pitieth them that fear him," was one among the many attestations of God's kindhoss and compassion revealed in his Word. The frequent repetition by David of those proclous words, "His meroy, endureth forever," in the 186th Psim, was also cited by the speaker as a marked expression of the Gospel sentiment with regard to this attribute of the divine nature. In the text, He was ropresent and Chery streets, by order of Executors, the need only add that the grace hoo spoken of implied airee pardon to the indeserving. Stoves. QUEEN'S PORTABLE FORGE.—
Doubtless many of our city readers, in passing the gange of workmen employed in laying down streets, had their attention attracted to a portable forge, with bellows and everything complete, and in efficient service. These forges, built upon the plan secured by O. V. Queen's patent, are for sale at the commoditus, long-established, and deservadly popular Stove, Range, and Furnace established, and deservadly popular Stove, Range, and Furnace established, each of WARNICK, OHAD-WIOK, & BROTHER, corner of SECOND and RAOE Streets, who have the sole right for the sale of Queen's Portable Forge in Pennsylvania.

There are, we believe, five sizes of this forge, ranging in price from twenty-two to forty-four dollars—a sum so small, when contrasted with its merits, as to secure its general introduction; for any one who will for a moment consider the advantages of this forge, which may be removed from place to place, so as always to be not the spot where workers in into nor other metals are to perform service, whether in original construction or orpairs, will at once concede its great efficiency, and arrange for its possession and use. SOMETHING NEW.—GAS BUR.

NING COOK STOVE.—I would respectfully call the attention of the public to one of the greatest improvements ever introduced in Cocking Stoves and Renges—the burning of the gas arising from the coal, by which means is saved 60 per cent. In fuel and also more intense heat thrown to the bottom of the oven. We effect the burning of the gases by means of a hollow centre-piece, perforated on the under side, which admits the air in a h-ated state to mingle with the gases, thus aiding its combustion, and causing a flame to pass around the oven equal to a wood fire. This improvement also preserves the centre piece from rinking down on the fire, threeby saving the expense of repairs One of the Stoves CAN BE SEEN IN OPERATION tills MARKET Street.
