grain. There is no slipping; the machine is surread and stopped instanty; and, except when properties itself as considerable distance on turn- pike or payed reads, the wear and tear is slight. This substitution of the driving roller for the ordi- mery side wheals wonderfully increases treation	of merobants by judicious expansion, which shall operate to restore public confidence and avert a fatal run. The Bank of France habitually practizes upon the same principle. In 1838, a period of prosperity and genoral confidence, the total amount loaned by it was 974 millions of frances for an average of fity-six days. The next year, a period of universal distrust and distress, when in ten months the failures in Paris slone smounted to eight hundred and fity-eight, the losses by which are stated to have been between fity five and sixy millions of frances, the loans of the bank smounted to 1,454 millions of frances for an average of fity-seven days, an increase of four hundred and sight millions of frances.
