In addition to the territory of the "Stewart" Farm, which is believed to be equally as good as the "Hoover," there are on it a three-story Grist Mill, with fine water-power, a good farm house, and other buildings, hat will be of use to the company.

The durability of this immediate oil section is illustrated by the fact that some of the wells on the "Hoover' Farm have been pumping for over four years, without any material diminution in their yield, while the oil here produced, from its greater convenience for transportation and superior gravity, always commands from one to two dollars per barrel more than the oil at Oil Greek.

The officers of the Company feel justified in presenting the following estimate of what, with vigorous management, the above lands can be made to yield for the benefit of the stockholders in a comparatively short time:

There is room on this for one hundred lots of ten rods square, all of which can be leased immediately for one-half the oil, free of all expenses to the Company.
