BUCKWHEAT.

Buckwheat is said to be a native of Persia. and is usually sown on poor land, although, like other cultivated plants, it does best on good soil with good culture. Its blossoms vield considerable food for bees, although the honey thus obtained is inferior to that made from clover. Buckwheat meal or floor is States for making griddle cakes. The seeds of this plant contain fifty per cent. of starch and one and a half per cent. of earthy matter. It is often sown and crop ploughed in, to fertilize poor land. From one to two bushels

are put on an acre. BUCKWHEAT WITHOUT GRIT .- Did any person who eats buckwheat cakes ever have the good fortune to get any not containing a particle of grit? A method not generally known was lately stated to us by a practical farmer, who says that buckwheat raised in this way is entirely free from the difficulty.

The buckwheat is sown at the usual time but before harrowing, a bushel of rye is sown with it to the acre; they both come up together, and the buckwheat, being much the most rapid in growth, soon obtains the ascendancy, the rye only forming a smooth, green carpet beneath, which completely prevents but before harrowing, a bushel of rye is sown carpet beneath, which completely prevents the dashing of the grit by rain upon the buckwheat when it is cut, and otherwise protected, and two crops obtained from a single seeding .- Penn. EFFECT OF SALT ON WHEAT .- The Rechester American, of a recent date says:-Some of our readers may recollect that last fall we mentioned an experiment made by Mr. John Park, of Gates, by sowing a barrel of sait to an acre upon a summer fallow. The ground was plowed once the preceding fall, plowed again in May, and salt sowed thereon as above; and afterwards plowed twice before seeding. On the 1st and 2nd of September wheat was sown, two bushels to the acre. The crop has just been harvested. and Mr. P. is confident it will vield forty bushels to the acre. The berry he considers equal to the finest English wheat.

Large Buck .- The Washington Globe says that the bock mentioned as having been killed by F. P. Blair, Esq., near Mount Vernon, Val, weighed fairly after the entrails were taken out, one hundred and ninety-one pounds, and the saddle seventy-five pounds; which deer hunters well know, is a deer of rather uncommon size.

The history of this medicine is peculiar. It has made its
way to public favor solely by the force of its own intrussic
merits. No artificial means have been used to give it no
toriety and thrust it upon public attention. It has neverbefore even been advertised, but having first shown its remarkable efficacy in the family of the proprietor, and by
him afterwards administered to his afflicted friends and acqualutances with a like result, its reputation gradually extended until it is known in the most distant parts of the
Union, as a medicine of unrivalled virtues in the cure of
Dyspepsia in all its different forms, and also for the cure of
Asthma or Philisic. Its only heraid and its only sulogy
has been the story of its wonderful efficacy, as told from

work, with 18 engraved illustrations from original designs; 4 vols in 2, bound in extra cloth and library sheep.

The publisher respectfully calls the attention of the trade and the public generally, to this work being the only illustrated edition published in the United States—He trusts that the beauty of its embellishments, the strong and substantial manner in which it is bound, in conjunction with the known popularity of the work itself, will be a sure recommendation to public favor.

JOS. A. SPEEL, 26 Cherry at above 6th.
J. A. S. has also lately published, a new and beautiful Edition of Bergeant Bell's Raree Show, a suitable book for children, neatly done up in extra cloth.

THE GRAND PURGATIVE. FOR THE CURE OF

ising in the Throat, Rising in the Throat,
Dropsy, Asthma,
Pevers of all kinds,
Femnle Complaints,
AND A VARIETY OF OTHER DISEASES ARISING

FROM IMPURITIES OF THE SLOOD, AND

OBSTRUCTIONS IN THE ORDANS OF HA

DIGESTRONS IN THE ORGANS OF IN DIGESTION.

Experience has proved that nearly every Disease originates from impurities of the Hicod or devangements of the Digestives Organs; and to secure Health, we unst remove those obstructions or restore the Blood to its natural state. The aversion to taking medicine is most effectually removed by CLICANER'S VEGETABLE PURGATIVE shell from the kernel) and have no taste of medicine.

But are as easily availowed as bits of candy. Moreovathey neither unusuate or gripe in the slighten degree, but operate equally on all the discussed parts of the system, instead of continuing themselves to, and racking any particular region. Thus, it the likeve be effected one ingredient will operate on that particular organ, and, by cleaning it of an Excess of Bite restore it to its natured state. Another will operate up the Board and recoveral impurities to the contraction. Excess of Bile restore it to its natured state. Another will operate on the Board and remove all impurities in its circulation; while a turing will effectually expel whatever impurities may have been discharged into the stormeh, and here they strike at the root of disease remove all impure Hamors from the body, open fire porce extraally and internally; separate all foreign and obnexious particles from the chyle, so that the blood may be thereoughly pure—thus scaling a free and healthy action to the Beart, Langsand Liver and thereby they restore health even when all other means have failed.

The entire truth of the above can be ascertained by the trial of a single box; and their virtues are so positive and certain in restoring Health, that the proprietor bloods himself to return the money paid for them in all cases where they do not give universal satisfaction.

13 Remember Dr. C. V. Clickner is the inventor of the Sugar Contest Pills, and that nothing of the sort was ever heard of until he introduced them in Jude, 1843. Parchasers should, therefore always ask for Clickner's Sugar Contest Pills, and take no others, or they will be made the victims of a fraud. raud. February, 17, 1849-19
