To meet the rushing tide, Where not a green thing groweth Or flower dares to shine, In fearless beauty bloweth The graceful Columbine.

No gay companions seeking Of varied smell or hue, Nor soil with richness reeking, It seems to shun our view, As tremblingly it bendeth Upon its slender stem, With modesty which lendeth

Charms to that mountain gem. While steadily it clingeth Fast to the rugged stone, And welcome sweetness bringeth Where it must bloom alone;

As charity upholdeth
The friendless and distress'd, And with true kindness foldeth The lonely to her breast.

There many a truth in flowers That spangle o'er the mead, Good precepts glow o'er bowers If man would only read; And whosoever seeketh, Will need no magic art,

Their simple beauty speaketh The language of the heart.

AGRICULTURAL BUREAU.

Senator Sturgeon, Chairman of the Committee on Agriculture, in the Senate of the United States, has reported the following bill. We hope to see no evasions or indefinite postponements in this matter, but a willingness on the part of Congress to obey the will of the agricultural community by establishing the desired Bureau. A Bill to Establish an Agricultural Bureau

in the Department of the Interior. Sect. 1. That there shall be established and attached to the Department of the Interior, an Agricultural Bureau, the head of which shall be called the Commissioner of Agriculture, who shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive the same salary as the Commissioner of Patents.

Sect. 2. That it shall be the duty of said Commissioner to collect Agricultural statistics; to procure and distribute valuable seeds cuttings buds and tubers; to procure and put in operation a chemical laboratory, at a cost not exceeding two thousand dollars, and cause to be made all desirable analysis of mineral water, and such as relate to the composition and improvement of soils; the feeding of domestic animals the preparation and preservation of bread stuffs; the manufacture of sugar, and such other manufactures as may be connected with agriculture, and arise immediately out of agricultural products and to prepare and make, annually, a full report to Congress, containing on account of such experiments as may have been made, and such useful information as he may have obtained on all the subjects connected with the duties of his office.

Sect 3 That there shall be appointed in taid Bureau, a chemist, whose salary shall shall be two thousand dollars, per annum; a hief clerk, whose salary shall be one thousand six hondred dollars, a recording clerk, whose salary shall be one thousand dollars; and one messenger, whose salary shall seven hundred and fifty dollars.

LATER FROM THE EMPIRE OF HAYTI. Boston, May 20, 1850.

The brig Enoch Benner arrived here today from Port au Prince, with dates to May 2d. The Albany, Germantown and Vixen were in port. General Duff Green, the special agent of the United States, had an interview with the Emperor, in which he demanded the recognition of our commercial agent, and that he shall have the same privileges as those of other nations.

He also demanded the appointment of a person to cenfer with him on certain claims he had to present against the Government, and General Delvio, a black, was appointed The cause of the U.S. Government com-

RADWAY'S READY RELIEF.
Rheumatism arises from different causes, but most generally proceeds from Colds, expagare to cold damp weather, and sleeping in damp apartments. This complaint is divided into two classes; the first Inflammatory, so called from the swelling and inflammation that attends the pains in the parts affected; second, Chronic Rheumatic, so called from the long contingance of the disease. It is also known as Lumingo, or pain in the back; Sciaticia, or pains in the hip or groin; Anthrodynia, or pains in the joints. The Acute Rheumatism generally terminates into one of these and becomes a chronic complaint.

MR. JAMES WILLIAMS:

Dear Six:—It gives me great pleasure to know that you are again preparing you medicine for the cure of Drapege. Mn. James Williams:

Dear Si :—It gives in great pleasure to know that you are again preparing you medicine for the cure of Dyspegsia, for many of my acquaintances have repeatedly asked me where it could be presented, knowing that I had been cured by it. As I think that a public acknowledgment of the great benefit I have tree-level from the nes of your medicine is not only due to you, but may be useful to others, I now make it. For several years I suffered from Dyspegsia, which increased to such an extent that my health and constitution were rapidly sinking under it. I was compelled to restrict myself to the most sample food, and even that I could not digest. I felt a loss of strength, dismelination to exercise, and, as you have it in your advertisement, a general feeling of depression and indescribable wearmers. In the year 1838, hearing from others high recommendation of your Anti-Dyspegute Elixir. I precured and used it with the most happy effect; under it influence languor and wariness gradually passed away, and my appetite returned which I could gratify with impunity. Ten years have now chapsed, and my confidence in the curative powers of your medicine has of course increased, for it completely cared in whea I haded to obtain felief from any other source. Very respectfully yours.

Prepared only by Frederick Brown, at his Drug and Chemical Store, North East Corner of Fifth and Chestnut streets, Philadelphia. THE Essence is a preparation of unusual ex-Leellence and of varied properties. In all cases where a powerful and safe stimulant is required, it is unrivalled for efficacy as well as immediate it is unrivalled for efficacy as well as immediate action. To the traveller and to the family circle it is invaluable, as a few drops diluted in sugar and water present a safe and agreeable remedy to the invalid who requires immediate relief, as well as to the convalescing patient who needs a gentle tonic. In a Southern climate, where the relaxation of the system so generally induces thirst for stimulants, it will always be found an excellent substitute for those tempting beverages which debut the stomach and cause a morbid condition of its powers. Caution Extra. A man by the name of CLAPP has engaged with a young man of the name of S. P. Townsend, and assa his name to put up a Sarsparilla, which they call Dr. Townsend's Sarsparilla denominating it GENUINE Original, etc. This Townsend is no doctor, and never was; but was formerly a worker on the railroads, canale, and the like. Yet he assumes the title of Dr. for the purpose of gaining credit for what he is not. This is to cention the public not to be deceived, and purchase none out the Genuine Original Old Dr. Jacob Townsend's Sarsparilla, having on it the Old Dr's, likeness, his family coat of arms, and his signature across the coat of arms.

OLD DOCTOR JACOB TOWNSEND, THE ORIGINAL DISCOVERER OF THE Genuine Townsend arsaparills:

O LD Dr. Townsend is now about 70 years of age, and has long been known as the author and discoverer of the Gennine Original "Townsend Sarangarilis" Being poor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the mice circumseribed to those only who have proved its worth and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed sore discussed, and saved from death, proclaimed its excellence and wenderful HEALING POWER

HEALING POWER. Knowing, many years ago, that he had, by his skill, saience, and experienced, devised an article which would be
of incalcuable advantage to mankind, when once knows
and extensively used, he hoped and persevered, expecting
the time to arrive when the means would be furnished to
bring it into universel notice, when its inestimable virtues
would be known and appreciated. This time has come, the
means are supplied; this

throughout the length and breadth of the land, especially as it is found inempatic of degeneration or deterioration.

Let every man ring throughout the land, that Old Dr. Jacob Townsend is now manufacturing the real "Townsend Sarsaparilla," which never sours, never ferments, and never changes its character.

From this day forth the people shall have the Pure Gaguine Townsend Sarsaparilla, which shall never sour in the bottle, or in the stomach, and it shall yet banish from the land all Fermenting, Souring, Exploding, Vinegary Sarsaparillas, now in use. A good Sarsaparilla, pure and genulne, ought to direct passes ouring, slip-slop Sarsaparilla ought to droop and die.

The Old Dr's. Sarsaparilla will keep pure and purfect The Old Dr's. Sarsaparilin will keep pure and puries 100 years.

Unlike young S. P. Townsend's it improves with age, and never changes, but for the better; because it is prepared on scientific principles by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the Art have all been brought into requisition in the manufacture of the OLD DR'S SARSAPARILLA. The Sensoparilla root, it is well known to medical men, contains many medicinal properties, and some properties which are inert or uncless, and others, which, if retained in preparing it for use, produce fermentation and seid, which is injurious to the system. Some of the properties of Sarsaparilia are so volatile, that they entirely evaporate and are lost in the preparation, if they are not preserved by by a scientific process, known only to those experienced is its manufacture. Moreover, these volatile principles, which dy off in vapor, or as an exhalation, under best, are the verificastical medical properties of the root, which give to y

essential medical properties of the root, which give to y all its value.

Any person can boil or stew the root till they get a dark Solved liquid, which is more from the coloring matter in he root than from anything else; they can then strain this naspid or vapid liquid sweeten with war missess, as hes call it "Sarsparilla Extract or Syrup." But such

their call it "Sarasparilla Extract or Syrup." But such as not the article known as the GENUINE OLD DR JACOB TOWNSEND'S SAR-STAULLA.

This is so prepared, that all the inert properties of the Saraparilla root are first removed every thing capable of becoming acid or of termentiation, as extracted and rejected; their every particle of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuable and leading properties. Prepared in this way, it is made the most powerful agent in the CURE OF INNUMERABLE DISEASES.

CURE OF INNUMERABLE DISEASES.

Hence the reason why we hear commendations on every side in its favor by men, women, and children. We find it doing wonders in the cure of Consumption, Dyspapain, and liver Complaint, and in Rheamatism, Scrotula, Pilea, Costiveness, all Cutmeous Eruptions, Pimpies, Bleiches, and all affections arising from

IMPURITY OF THE BLOOD.

It poissesses a marvollous efficacy, in all complaints arising from indigestion, from Acidity of the Stomach, from an equal circulation, determination of blood to the head, palpitation of the heart, cold feet and cold hands, cold chills and hot flashes over the body. It has not its equal in Colds and Congine; and promotes easy expectoration, and gentle pergination relaxing stricture of the lungs, throat, and every other part.

But in nothing is its excellence more manifestly seen and acknowledged than in all kinds and stages of Pemale Com-Sunbary, July 21, 1849—1y.

But what else should be expected from one who knows nothing comparatively of thedicine or disease! It requires a person of some experience, to cook and serve up even a common decent meal, how much more important is it that the persons who manufacture medicine, designed for weak atomachs and entechied systems, should know well the medical properties of plants, the less manner of secaring and concentrating their healing virtues, also an extensive knowledge of the various diseases which affect the human system, and how to adapt remedica to these diseases!

It is not possible for this medicine to do good; it has nothing in it which can ever harm, it can never some april, and therefore, can never force its cutstive properties.
