Joe Bumstead was one of those uneasy restless beings, who are never quiet a minute, whether awake or asleop. He was always twisting and turning, always uncomfortable, and he was universally known among his companions as Uneasy Joe. Sometimes we used to play off practical jokes upon him for the fun of the thing, but generally speaking, if we let him have his own way, he made mirth enough by "selfing himself." Among his numerous dislikes, Joe despised rats and mice. Indeed, he said they seemed born into existence only to tease and annoy him. When a child he was bitten by a mouse, and severely, too, for which reason he always dreaded them. If Joe had occasion to visit any new house, or to sleep in a strange room, he never failed to give the premises a careful inspection to insure himselt that there were no mouse-holes about. -We roomed together one night, in New York, and I laughed at Joe for his watchfulness and clos examination before rtireing.

"If it all right, Joe?" we asked, after he had peeped behind the furniture, and in every corner of the room.

"Yes, there can be no mice here, that's sure," he said, at last,

"Well, blow out that light, and go to bed then, will you, Joe ?" "Yes, here goes," and Joe suited the action

to the word, and leaped into bed. It must have been nearly morning when Joe

awoke us with : "Hist! hist! don't you hear that noise

"Not a bit of it, Joe. You are dreaming," we replied, turning over to get a fresh nap. "There it is again."

"What ?" "Why, the noise."

"You are making all the noise. You uneasy thing you, can't you let a fellow sleep quietly ?"

"Look here," it is all well for you who don't care a farthing for mice or rats, but you know I have a natural horror of the varmin, therefore-there, didn't you hear that ?"

"Joe, lie down, and be quiet; you took that punch too strong last night, and haven't more'n time enough to sleep it off before morning.13

"Fough! You haven't any feeling for my

"Nor you for mine, to wake me out of such a sound sleep for nothing."

Joe slipped noiselessly out of bed and seiz. ed one of his patent leather boots, which he felt for some time upon the floor before he

"What are you up to now ?" said we. "Be quiet; it's on the table-don't you hear it? pit pat, pit pat."

"Well, it does sound like a mouse." Joe balanced the boot in his hand so as to bring the heel to bear as the weapon, and felt his way to the table by the head of the

bed, where the noise was heard. "Hist! the little rascal is nibbling something he has found here."

"Let him have it Joe, and then keep quiet for heaven's sake."

Following the sound. Joe soon got within striking distance, and poising his weapon, he No. 134 South Second Street, below Dock St., brought down the heel with unerring aim and precision upon his victim. Sure enough, the little pit pat was stopped, and after congratulating himself, he crept to bed

again. Next morning, Uneasy Joe found that he had smashed his valuable gold repeater into the shape of a pancake!

Dr. J. C. Ayer—Dear Sir:—I enclose you certificate from Mrs. Catharine K. Cady, a highly respectable lady of this village, wife of Mr. Seth Cady, Deputy Sheriff, Windham Co., Connecticut. The cyre in her case was very prompt, and

Doctor Charles Oscoon,

Dear Sir.—I have read with much interest, your little The Satisfy upon the "causes, frestment and care" of the febrile diseases which have so extensively nevalled in our country during the last few months—an interest increased no death, by the fact that I have individually suffered so much from them. Though I feel myself very incompatent to judge safely upon a subject so entirely professional, yet your theory seems to me well removed, and your conclusions just, and I think without that your pumplier is calculated to produce much practical good.

Speaking of the medicine he says:—It fully justified your flattering expectations, and as a safe, convenient, and popular remedy, my own experience, so far, induces me to be lieve that it will prove a great public benefit. I am pleased to learn that you have recently established several agencies for its disposition—though I regret that, with a view to a more general dissemination of it, you should have found it necessary to remove from your present residence among us.

Sir—you wish me to inform you wint I know of Dr. Orgos dis India Chologogue, or anti-bilions medicine. I do believe that if the virtue and efficiety of this medicine were generally known, the FFUR AND AGER would disappear in Michigan.

I procated a bottle in the spring of 1841, and have good reason to believe that myself and family escaped the ague Arithmetics.

Perhaps in no sammer since the settlement of this fine peninanta, has the favor and ague been so prevalent as the last. I have ree simmended this medicine in numerous austraces, and when the disease had become fixed and buffed the skill of physicians; and I have never known it fail. It has universally produced the most happy effects, and I bet lieve it has never been exceeded by any medicine in temorying the fillions discovers of the climate.

Several years since I was attacked with a breaking out on my neck in the form of Tener, which I am convinced was contracted at the Barber's Shop. It grandually extended over my face until it reached the upper part of the checks. During the several months that it continued sprending, I used different applications, some of which had the effect, approach at least, of increasing the disease, but from none of them did I perceive the least length until I applied the Ross Olympically. By the use of one jar of it, I was perfectly cured and have remained free of the affection.
