expeditions last made through Barrow's straits-the British and the one in questionis this, that they commenced wintering within 15 miles of each other, a fact that was unknown, until the arrival of the expedition in this port, where tidings were obtained of the place of wintering and of the unexpected return of the British vessels .-We have the materials on hand for a more extended notice of the expedition, but we omit it to day, in order to make room for the deeply interesting letter of Lady Franklin, whose carnest efforts in the important duty which has devolved upon her, have stone so much to enlist the sympathy of the civilized world in her behalf, and in behalf early operations next Spring. I intended of her distinguished husband. It is highly creditable to the management of the expedition that although exposed to severe sickness and to vast perils, not a single man has seen lost, and the vessels were but slightly damaged prior to the gale in September .-The following are extracts from Lady Franklin's letter :

21 BEDFORD PLACE, LONDON, ) Sept. 12 1851.

My DEAR MR. GRINNELL : -- ! write to you in much agitation and confusion of mind, which you will not wonder at when you hear that Captain Penny, with his two ships, has returned, and announces the approaching return of Capt. Austin's squadron, formed features, named Julia Ann Smith, after being out for only half the period for which they were equipped.

Capt. Penny's letter is to-day before the Board of Admirality, orging them in the strongest terms to despatch instantly a powwhich quarter, to the north west, he has absconded with \$6000, and leaving a debt of where, and hundreds of mides of coast have

observations its motion was known. On the the entrance, were made beyond it in boat the so much talked of Polar basin. He is in Wheeling

They emerged from their imprisonment in also convinced, with Dr. Kane, that there is extent. They again proceeded northward forward. We have every reason, then, to along the Greenland coast, leaving to the hope that some of our lost friends and counwest the masses of floating ice, and penetra. Irymen may yet be able to support life in ted again into the upper regions of Baffin's this region, though unable to return by the Bay. Here a new and far more threatening way which they came; and the absense of difficulty befel them. They were locked up any traces of them north of Cape Innes, on in the midst of hoge icebergs, which shut the east side of Wellington channel, proves them out completely from a view of the hori- nothing at all against it, since they were not on. Some of them were 250 feet high, and likely to linger on their way to examine in the light of the sun, (it was now constant shores and islands, but would pash on as gorgeons. They had now reached the 19th ed them; and the next traces to be found of August, and even with an open sea they would probably be their second winter

In confirmation of this view, Pency tells having left it suddenly; and that the sumfail, we must look to America alone as our resource. To you will belong all the virtue

in case the Admiralty fail me.

It appears that it was Capt. Austin's intention to look into Wellington Channel himself, and also into Jones's Sound, before he returned home; but as to the former, Penny says, he will find the ice impassable, so that he will be sure not to be able, as an eye witness, to see the opening. Nothing, perhaps, could penetrate it in its present state, but the 400 horse power steamer, and that cannot be done this year, though Penny says, if the steamer could be ready to sail in three weeks or a mouth from hence, he thinks he could still get her up to Lancaster Sound this season, or at any rate, to some convenient lo callily, which would enable him to commence writing much more to you about your own two gallant ships, and their Winter of almost unparalleled anxiety, but as I wish to address a few lines to Judge Kane, I believe I must forbear, and refer you to my note to him. which I shall enclose and leave open. Capt Penny has studded the northern part of Wellington Channel with your names, and the names of our brave and generous allies in your ships. I am greatly pressed for time, having more writing than I can possibly get through. Believe me, dear Mr. Grinnell, ever, most truly and respectfully yours,

JANE FRANKLIN
