GROUND AND UN-GROUND-COOKED AND UN-COOKED FOOD .- In a communication from the Society of Shakers, at Lebanan, N. York, in the Patent Office Report, we find the following upon the relative value of ground and un-ground, cooked and un-cooked corn for

feeding and fattening cattle, &c. "The experience of more than 30 years leads us to estimate ground corn at one third higher than un-ground as food for cattle, and especially for fattening cattle, &c.

"The same experience induces us to put a higher value upon cooked than upon raw meal, and for fattening animals, swine particularly, we consider 3 of cooked equal to 4 bushels of raw meal. "Until within the last three or four years,

sive of land and offal fat, and it is the constant practice to cook the meal for which the chergyman praised him, "schy, my little purpose 6 or 7 potash kettles are used." The Sinkers are a close observing, calculating people and go in for the practical re- Skunks !" alities of life, and, therefore, in the ecocomy of food, must be presumed to be good judges

correct.-American Farmer. WINE MAKING .- In Cincinnati and neighborhood not less than one thousand acres of pers says that on a visit to Mr. Longworth he said to have resolved there shall be no rupoutlis. They set such a value on them, to C. F. Macach, for the best bread and coming spring. Besides Mr. Longworth, no stopper, vir." "Well, head him, then,?" there are many other persons in Cincumati, and the neighborhood, engaged in the culti- your importmence -- torn him." "He's right
