

COMMUNICATION.

FOR THE AMERICAN. H. B. Messer, Esq.—The destruction of life and property by lightning has become so frequent of late years, in our State, as to demand the attention of the community in seeking for a means of protection against this powerful agent.

Electricity is an exceedingly subtle, elastic, and penetrating fluid, pervading every substance in, and upon our globe. Nor is it confined to the earth only; but the atmosphere which surrounds the earth, is also charged with it. Clouds, as well as rain, snow and hail, which fall from them, are always electrified, but often negatively than positively; and the lightning accompanied by the thunder, is the effect of the electricity, which, darting from clouds or a number of clouds highly electrified, strikes into another cloud, or else upon terrestrial objects; in which case it prefers the loftiest, most pointed, and best conducting objects; and by this stroke it produces all those dreadful effects, which are known to be produced by lightning.

But, by the light which science has shed upon the subject of electricity, since the discoveries by Franklin, this invisible, and all pervading fluid, has not only been rendered harmless, but conducive to man's health, welfare and happiness. Physicians have applied electricity, for the cure of a number of disorders, and in many cases with signal success. And who has not witnessed with astonishment, its almost miraculous agency in transmitting our thoughts, by means of the telegraph wires to our friends, thousands of miles off, in a few seconds of time! Nay, even the terrible Thunder and Lightning, which may well be denominated "The Artillery of Heaven," and well calculated to make a guilty world tremble before "Him, who thro' its uttering His voice in the Heavens," may, at the same time that it teaches us our own insignificance, be rendered harmless, by making use of the means, which He has been pleased to discover to us, and placed within our reach.

The lightning rod, or conductor, properly constructed and erected to buildings, has been universally acknowledged as a sure, and certain defence from the effects of lightning. No instance is on record of a building being destroyed by lightning, which was furnished with properly constructed and properly erected conductors. But as there are quacks in the practice of medicine who so frequently kill, as cure their patients: So there are those, who though totally ignorant of that highly interesting branch of Natural Philosophy, Electricity, and of its causes and effects, will yet often palm off on the uninformed, an indifferent and imperfect article as a conductor of electricity, by which the buildings to which they are attached, are not only not secured against lightning, but absolutely more endangered than they would be without them.

Let then all see to it, that they have properly constructed rods put to their buildings if they would secure them from destruction by lightning. Before dismissing this subject, permit me to answer a few objections, which are sometimes made by those who are asked why they have no conductors to their buildings.—One says "I have my buildings and stock insured against fire." Well, I am glad you have; for every sensible man ought to have his property insured. But suppose the lightning struck your house, and killed one of your family; what consolation would your insurance give you? Or, if it struck your barn, and killed one or more of your horses, or cattle, (with a dozen lightning rods) without burning your barn, would the Insurance Company pay you for your loss? They would not.

Another says, "I put my trust in Providence, for the protection of my property."—I am glad you recognize Him as the Sovereign Ruler of the Universe. But let me ask you, has He not also appointed means for the preservation of our lives, our health, and our property, and commanded us to use them for the same? Has He not said, "Do this and live"? And do you not act upon this principle when you, or any of your family are sick, do you not call in a physician, and use the remedies prescribed for the restoration of health? Use then the means, trusting in Providence, and you will have done your duty.

The Erie Observer of Saturday says: Boats arrive and depart daily from this port. Dunkirk and Buffalo are still under the ice, and will remain so, it is thought by the "oldest inhabitant," until some time during the summer. When the first boat arrives at either point we will let the world know it—that is, if such an event takes place in this generation. We have heard it said, by those who profess to know, that in the narrowest point is full six miles wide, the ice is frozen clear to the bottom, and the ice king has got a fast grasp on the rocks.

Snow.—A letter from St. Johnsbury, Vermont, dated April 1st, says: "I commenced snowing last night, and this morning there was some 8 or 10 inches of damp snow—making, on the old bottom, fine sleighing.—This is the 33d, (thirty-third) snow storm we have had this winter; and to day is the 11th, (one hundred and forty-first) day of good sleighing in St. Johnsbury and vicinity, this season. The thermometers have all "gin out," and are laid up for repairs.

THE CHEVALIER WYCKOFF.—This notorious personage, who is now in prison in Geneva, for attempting to secure a wife by abduction, is quietly at work making stockings, suspenders, and other useful articles.—The King of Sardinia refuses to pardon him or even to commute his sentence.

ONTO INTERVENTION.—Cincinnati, April 10.—A resolution has passed the Senate to day, tending to Kosuth the loan of the arms of the State, to aid in the coming struggle. GEN. SCOTT.—The "American Whig Review" is opposed to Gen. Scott on the ground of want of qualification!

PUBLIC MEETING.

Agreeable to previous notice a very large and harmonious meeting of the citizens of Lewis township, Northumberland county, assembled in Turberville, on Saturday the 10th inst., for the purpose of entering their protest in regard to an act of the Legislature authorizing the Commissioners to take stock in the contemplated Susquehanna Railroad.

On motion the following persons were called to preside: PHILIP RAUP, Chairman. John Taggart, Daniel Derr, James Lowers, Frederick Fox, Thomas Barr, Michael Brobst, Frederick Glaz, Samuel Artman, John Raup, Michael Rosler, James Tweed, Robert Gasten, Vice Presidents.

Stephen Glaze, Jr., A. J. Derr, Secretaries. The meeting being duly organized on motion the Chair appointed the following persons as a committee to draft resolutions, expressive of the sense of the meeting, David B. Montgomery, John Tweed, Jacob Manges, Levi Glaze, John Montgomery, William Savage, and D. W. Fordsman.

The committee retired and after a short time reported through their Chairman the following resolutions which were unanimously adopted. Resolved, That we the tax payers of the township of Lewis, solemnly protest against the County Commissioners assuming the privilege of subscribing or taking stock according to a recent act of the Legislature of Pennsylvania, to construct a rail road to be called the Sunbury and Erie Rail Road.

Resolved, That the said Commissioners were elected to perform certain specific duties prescribed by the then existing law of the land and without any authority to delegate to the people how they should act in regard to the management of their own private affairs, or to tell them how much they should do to such and such projects, however remote they might be from the locations or to bind them or their property for the payment of any money without their consent. Resolved, That in the language of Gov. Bigler the people of one section of a County may derive advantages from the construction of a public improvement, while those of another section equally taxed for the payment of the principal and interest of the debt so contracted may possibly realize no benefits at all. We regard the principle of taking stock by the County Commissioners as nothing more or less than putting your hand into your neighbor's pocket, taking from him his hard earnings and giving it to those who have no right to it. As a principle only to be tolerated by those who are fit to become slaves.

Resolved, That a free people never employ agents to do that which is convenient for themselves to do, and if any portion of our citizens have funds they wish to dispose of in the way of taking stock, they are quite competent to attend to it, leaving the Commissioners free to attend to what more properly belongs to them. Resolved, That the contemplated road would be sectional in its benefits and that we are willing all who hold property along said line should procure all the individual subscription that may be within their power.—That we will resist until the last without distinction of party any person or persons who may attempt to place injustice upon us.

Resolved, That experience is the true test to all things and if we have not had such experience our sister State of Ohio have had the result of which is recorded in a constitutional prohibition of all such municipal subscriptions even if authorized by a direct vote of the people.

On motion it was ordered that the proceedings be published in the County papers, after which the meeting Adjourned. (Signed by the Officers.) Correspondence of the Phila. Ledger.

LETTER FROM HARRISBURG. HARRISBURG, April 3, 1852. The Congressional Apportionment Committee of the Senate having at last reported a bill distributing the Commonwealth into Congressional districts.

Southwest, Moyerensing, Passyunk, in the county of Philadelphia, and Cedar Ward, Lombard, Spruce and New Market, in the city. 2. City Wards, excepting the above. 3.
