Table Rule for little Folks.

In silence I must take my scat, And give God thanks before I eat : Must for my food in patience wait, Titl I am asked to hold my plate. I must not scold, nor whine, nor pout, Nor move my chair or plate about. With knife, or fork, or napkin-ring I must not play, nor must I sing. I must not speak a useless word, For children must be seen, not heard. must not talk about my food, Nor fret, if Ldidn't think it good; I must not say, "The bread is old," "The tea is hot," "The coffee's cold," I must not cry for this or that, Nor murmur if my meat is fat. My mouth with food I must not crowd, , while I'm eating, speak aloud; Must turn my head to cough or succese, And, when I ask, say, "If you please." The table-cloth I must not spoil Nor with my food my fingers soil; Must keep my seat when I have done, Nor round the table sport or run. When told to rise, then I must put My chair away with noiseless foot, And lift my heart to God above, In praise for all his wondrous love. IWoodworth's Youth's Cabinet.

LIGHTNING RODS.

AFTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, through the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain-this is

Patent Magnetic Lightning Reds. and in this alone. This Rod has been examined by the most scientific gentlemen in the world— Professors M'Murtrie, Johnson, Walter and maty wives; the Pope has none. Badly ofl, my others that have examined them, recommend and speak of them in the highest terms of approon, and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advan- per gailon. tage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is in
