

THE CATASTROPHE AT THE FALLS.

The Buffalo Advertiser has a very thrilling account of the recent accident at Niagara Falls, by which three persons were swept over and drowned.

Our informant tells us that the man was in a part of the rapids where the rocks rise nearly to the surface of the water. A log of wood, apparently wedged tightly between the rocks, and crossed by another, still higher out of the water was his resting-place.

Business Notices.

We refer our readers to Mr. Mackey's advertisement. He has put up a number of his rods recently in this place, in such a workmanlike and substantial manner, that they are, of themselves, a standing advertisement.

THE LIBERTY CONVENTION is the title of a new monthly periodical just started at Harrisburg, by Wm. H. Egle and Clarence May, at \$1 per annum. It is got up with considerable taste and ability.

LAND WARRANTS.—Persons having Land Warrants for sale, can dispose of them for cash, by applying at this office.

The August Term of our court will commence its sessions on Monday next.—It is probable that most of the week will be consumed in criminal business.

A camp meeting will be held at the usual place, on the farm of John Farnsworth, Esq., commencing on Monday, the 15th of August.

The Directors of the Susquehanna River and North and West Branch Telegraph Company, on the 19th inst., declared a semi-annual dividend of two per cent. on the capital stock of the Company, payable at their office in Danville, on or after the 10th of August next.

RAILROAD IRON.—About one hundred tons of rail road iron from the Phoenixville works, for the Trevorton rail road, is lying upon the river shore, at this place, and is now being hauled by wagons to Trevorton. The balance of the iron is landed, we believe, at the termination of the road below.

MORE ENGINES.—Two sets of boilers and 20 horse power engines, were landed at this place, a few days since, for the Green Ridge, and the Carbon Run Improvement Companies. These engines are intended for coal breakers. There will be more of them on the way shortly, for several of the other Coal Companies.

In less than six months from this time the various steam engines, and the operations of the miners, mechanics and laborers, will present a busy and animated scene in the Shamokin coal region.

The Philadelphia and Sunbury Railroad is to be formally opened on the 18th of August, between this place and Shamokin. After that passengers can leave this place after breakfast and arrive at Pottsville for dinner, and Philadelphia in the evening. The rails will be all laid down this week, and the switches and turnouts, at the end of next week.

The death of John Price Wetherill, of Philadelphia, on Sunday morning last, has caused deep and heartfelt regret in his native city. Mr. Wetherill was, at the time of his death, President of the council, and a leading man in all the great improvements in which the city was interested.—He was one of the best practical chemists in the country and was largely engaged in the manufacture of white lead. He was one of the most industrious men of the age. Day-light seldom ever found him in bed. He told us a few years since that he had not, with few exceptions, breakfasted with his family for ten years, always taking his morning meal by candle light before going to his chemical works, over the Schuylkill. Yet he gave much time and attention to his public duties, but this was generally at night. He leaves an estate valued at \$800,000.

THE SLAVE CASE.—There has been some trouble recently in Philadelphia in relation to a fugitive slave taken into custody by Mr. Wynkoop, the U. S. Marshall. The court of Quarter Sessions also claimed the slave for trial for a criminal offence, but the Marshall refused to deliver him, on a Habeas Corpus, for which the Marshall was arrested by the Sheriff. The Marshall afterwards surrendered to the authority of the court of Quarter Sessions, which, upon hearing, remanded the slave again to the Marshall.

The total loss by the late fire at Williamsport will not exceed \$12,000, most of which was insured in the Lycoming and the Hartford Companies.

SUNBURY AND ERIE RAILROAD.

The work on this road between this place and Williamsport, is steadily progressing. The grading between Milton and Black Hole, about 16 miles, is half done; some four or five sections above Warrior Run, culverts and all, being entirely completed. The bridge over the Susquehanna, about two miles below the Muncy dam, is also progressing. More than one third of the stone, covering several acres, are already on the ground and dressed, and the masonry of the piers going up. The section through Milton is graded, and the one below, running through the farm of James Cameron, Esq., about half done. The 1st section above Chillisque Creek, and the three above, are about to be vigorously prosecuted. The section on the farm of Mr. Watts, four miles above Northumberland, is about half done, and the remaining sections down, which are light, are also about to be commenced. The road, we understand, is to be graded immediately for a double track. Whether for a narrow, or for a six foot gauge, will, we presume, depend upon the success of Mr. Fallin's mission to Europe. Should he not succeed, and the Philadelphians refuse to take the matter into their hands, the project will fall into the hands of the New York capitalists, who will, undoubtedly, adopt the wide gauge.

"PEACE SIGNS IN"—WILLIAMSPORT.—The lawyers are in attendance at the Supreme Court now sitting at Sunbury. May they not be in a hurry to quit that half dead and alive place!—Williamsport Press.

Why is it that the editors of the Williamsport presses are embracing every opportunity to throw out ill-natural remarks, in regard to this place? Liberal minded men, of enlarged views, never condescend to such guerilla warfare, and we know that Williamsport has many such. But unfortunately they are not always at the head of the Press. Surely this world is large enough, for even these capacious editors to flounder in, without flinging the mud upon their neighbors.

MENY BRIDGE.—The Luminary says that Mr. D. S. Kessel, the contractor, has already commenced work on the building of the bridge over the river at that place. This bridge will be a valuable and useful improvement to the town and to the community.

Lola Montez has gone to Sacramento. It is reported that she is about to be married.

SHASTA CITY DESTROYED BY FIRE.—The City of Shasta was destroyed by fire on the morning of the 14th of June. Every thing that escaped the former fire was swept away. The loss is estimated at \$500,000.—The heaviest losers are Messrs. Bull, Baker & Co., and Todd, Downer & Co. The fire is supposed to have been the work of an incendiary.

ADDITIONAL EUROPEAN INTELLIGENCE BY THE ARCTIC.—The papers by the Arctic, received last evening, have additional intelligence from Europe. The following account is given of the interference of the Captain of the United States Frigate St. Louis, in the matter of the arrest of Kossuth's agent.

The Smyrna correspondent of the Marseille Semaphore gives an account of the disturbance in Smyrna, of which we have already had the announcement by telegraph, via Halifax. It appears that M. Costa, a Hungarian, ex-ambassador to Kossuth, and who had just returned from the United States, was sequestered in the house of a Saradinian, in Smyrna. His whereabouts came to the ears of M. Vekbecke, Austrian Consul General, who, under pretence of searching for a thief, dragged him out, gagged, handcuffed and conveyed him on board the Austrian brig-of-war Hussar. All the efforts of the other Europeans, aided by Ali Pacha and the native officers, to have the prisoner handed over to the local tribunals, were in vain.

On the following day, the United States frigate St. Louis entered the port, and the captain of the frigate, accompanied by the United States Consul, immediately went on board the Austrian ship and demanded to talk with the prisoner, whom they believed to have a claim to the protection of the United States. The Austrian Lieutenant in command denied that he had any prisoners on board. The Captain of the St. Louis and the Consul then went to the Austrian Consulate, where, after a scene of the most violent kind, M. Vekbecke admitted that the prisoner was on board, and gave a forced consent to see him. Returning on board the Austrian vessel, the American Captain thus addressed Commander Schwartz—"When I came on board, a short time since, your lieutenant lied in my face! The meanness of my cabin boys would not have been guilty of such cowardice! Where is the prisoner? I wish to see him!" As Commander Schwartz hesitated, the American exclaimed—"Bear in mind, that if the prisoner claims my protection, and has the slightest right to it, I will remove him myself, and will not allow him to remain another minute on board!" Unfortunately, the generous efforts of the captain of the St. Louis were useless, for the prisoner prevaricated and betrayed himself so much in his replies, that he did not give his defenders the slightest chance to save him. When this was known on shore, great excitement broke out, and the Italians would have burned the Austrian Consulate had it not been well defended. In their heat they attacked three Austrian midshipmen, who were on shore and killed one. On the other side, the Greeks or Austrians—the account is somewhat obscure—laid a plan to assassinate the American officers, but being warned in time, they avoided the danger. The Italians and their allies have sworn to poison the ten Greeks who arrested Costa, and the Greeks swear they will murder ten Italians for every Greek. The city continued in a ferment. Ali Pacha, the Turkish Governor, had protected Vekbecke's despotic act, and

CALIFORNIA NEWS.

ARRIVAL OF THE NORTHERN LIGHT. LATER FROM CALIFORNIA.

\$389,000 in Gold Dust—\$1,650,000 on the Way—Shasta City destroyed by fire.

The Steamer Northern Light arrived at New York yesterday morning, from San Juan, with advices from San Francisco as late as July 1st, and \$389,000 in gold dust.

The Northern light was struck by lightning on the 18th, near Cape St. Antonio.—The fluid split the mast main, but passed off without injuring any one.

Among the passengers is Patrick O'Donoghue, the Irish Exhile, recently escaped from Van Dieman's Land.

At midnight on the 9th of July, off Acapulco, Dr. Carroll, a passenger on the Sierra Nevada, fell overboard, and was drowned. The town of Rough and Ready has been nearly destroyed by fire. Fifteen buildings only remain standing, and all the stores but one were consumed.

A duel had been fought at Maryville between Col. Rust, editor of the Express, and Judge Studer, of the Herald. The latter was slightly wounded in his coat tail.

Col. Collier formerly Collector of San Francisco, has been indicted in the United States Court for felony in using the Government funds.

The crops through California still promise well.

The Democratic State Convention assembled at Benicia, on the 21st of June, and after a stormy session of three days, succeeded in nominating their candidates.—Very strong efforts were made to throw Governor Bigler overboard, but without success.

The only names presented to the Convention for the nomination of Governor, besides that of Governor Bigler, were Richard Roman, the present State Treasurer, and Henry P. Haven, of Marysville. A fierce battle between the Bigler and anti-Bigler men for the first two days argued little for the harmony of the party. But Bigler was nominated by a decided majority on the first ballot, and several who had been most earnest in opposing him, came forward and pledged themselves to support the nomination.

The Whigs throughout the State are preparing for the fall election. Delegates to the Convention to be held at Sacramento, on the 6th of July, are already chosen in many counties.

Mr. William O'Donoghue, one of the Irish patriots and exiles in Australia, has escaped, and arrived in San Francisco on the 22d of June. He has published an account of his escape.

Lola Montez has gone to Sacramento. It is reported that she is about to be married.

Ali Pacha, the Turkish Governor, had protected Vekbecke's despotic act, and

sent a courier to Constantinople, to lay the affair before his government; and later accounts telegraphed from Vienna say that Kabouli Effendi has been sent to inquire into the matter; also, that Ali is deposed, and Ismael formerly Minister of Commerce, appointed in his stead; the Austrian Intendant at Constantinople having demanded that the Porte, within twenty-four hours, should give satisfaction for the outrage committed on the Austrian officers.

OBITUARY.—The Maine Liquor Law was adopted by a popular vote in Michigan on the 20th.—Whereupon The Detroit Tribune publishes the following.

DIED.—On the 20th inst., Pure C. Brandy, Esq., of droopy. This event is not altogether unexpected, as the departed has been afflicted with the disease which caused his death for a long time. Of late the quantity of water accumulating in his system was immense, and he had been tapped by his physicians several times, but without effect.—He had a large number of doctors, and they are mean enough to say that hastened his disease. His loss will be sensibly felt by his many friends who were accustomed to see him daily in his streets.

Also, on the same day, R. G. Brandy, Esq., familiarly known by the soubriquet of 'Rat' Guy, and brother P. C., whose death was chronic (by mistake it is supposed) several years ago. No bad effect was realized at first, but for a few years past it had been spreading through his system, and has finally caused his death. It is hoped that his death will be a warning to those who have been in the habit of taking a poison for a Medicine.

Also, on the same day, H. Gin, Esq. The deceased was a member of the Brandy family, a relative by marriage. He was a native of Holland, and fled to the United States several years ago, in consequence of having been actively engaged in one of the revolutions that characterize that country. He was pursued by the Police, but secreted himself in a cask and landed safely in New York. Since then many of his family have made their escape in the same manner. He left a family of children, most of whom were born in this country, but we are sorry to say are not characterized by any of the traits of their distinguished fathers.

Also, on the same day, Rye Whiskey, Esq. Mr. W. was one of the first settlers of Michigan. In early life he was an industrious hard working man. He has done much to build up our Railroads and public works, and could always be found in harvest field early and late. Some few of our farmers thought they could not harvest their wheat unless Mr. W. was with them to cheer up their hands. How they will manage to do since his death, we are unable to say. It may lead to disastrous results, and it is feared by some that our farmers may cease to grow wheat, which would inevitably raise the price of flour.

Of late years, however, Mr. W. has grown diffident, noisy and quarrelsome, and any neighborhood he visited was sure to be the scene of disturbance of every nature. The too frequent occurrence of street fights got up by Mr. W., was the ultimate cause of his death. He was killed by a blow on the head with a ball box, in open daylight.—The perpetrators of the deed are not fully known but suspicion rests upon two men whose names we believe are Mr. Law and Mr. Order. Several men from the Free Press office are on the watch and have, no doubt, apprehended them.

It is seldom that we have to announce the death of an entire family, thus swept away at one fell swoop. They were all men well known in our State, and have acted in many public capacities; some one of them has been a member of every Legislature since our organization as a State. In primary meetings caucuses they have succeeded in nominating their own friends for office, and afterward in electing them. There is hardly an officer in the State but what owes them his election.

At the request of the friends of the deceased, their remains will not be interred until December next. Those who wish to take "a last fond look" can do so at most of the grocers and saloons in town.

HELIOCHROMES.—A Swedish artist, Carlman, has made a new discovery, which he calls photochromography, by means of which he takes from 300 to 400 copies per day, of objects in all their natural colors.

TO PRESERVE PICTURE-FRAMES FROM FLUX.—Boil three or four young onions in a pint of water; then, with a gilding brush, wash over with the liquid. It will do no injury to the gilded frames.

Improved Lightning Rods.

THE subscriber has constructed a Lightning Rod on true Philosophical principles, by which buildings supplied with them are rendered perfectly secure against destruction by Lightning.

The connection and insulation of the rod, as well as the preparation of the ground rod, is a entirely new plan, making a more perfect conductor than any heretofore used. Persons desirous of securing their lives and property from destruction by lightning, can have conductors put up to their buildings in the most substantial manner by applying either personally, or by letter to the undersigned, at the following prices:

For 40 feet 3 inch Copper rods, Gold plated points, with solid Platina tip, \$22 00. Forty cents will be charged for every additional foot over and above the above.

For 40 feet 3 inch Tin-plated rods, Gold plated points, with solid Platina tip, \$13 50. For 40 feet 3 inch solid rod, Gold plated point, with solid Platina tip, \$12 50. For 40 feet silver plated point, \$10 00. And 20 cents for each additional foot over 40, on the three last named. All at six month's credit or 10 per cent off for cash.

CHEAP LIGHTNING RODS.

The subscriber will also put up Lightning Rods similar to every other, but at a price exactly the same as those erected last summer by the Lewistown or Lewising company, in size point, glass, connection, &c., at 12 1/2 cents per foot, on six months credit, or 5 per cent off for cash.

N. B.—No warranty given for this description of rods. T. S. MACKEY, Milton, July 30, 1853.—2m.
