2,500 Acres Timber Land FOR SALE.

SEVERAL VALUABLE TRACTS OF TIMBER LAND, comprising about 2,500 crea, part of which is situated on Tobyhanna reck, and part on Muddy Creek, within three miles of Lehigh River, in Pena forest township. Carbon County, one of the great Cost Counties of Pennsylvania, can be had at a bargain, if application be made soon.

These lands are thickly covered with the best

timber of that region. While it is believed that 75,000 feet of lumber to the sere, can be cut from a large portion of the land, the balance will average not much less than this figure. The kinds of timber found on the land are Hemlock, Spruce or White Cedar, White Oak, White Pine and Chestnut—but principally made up of White Pine and Hemlock.

The Tobyhauna and Muddy Creeks are large and rapid streams, yielding a vast am unt o number of saw mills. I hey empty into the Lehigh, which stream, with the Lehigh Canal affords an outlet to the most desirable lumber markets .-There is, too, under contemplation, a ratiway iesding to the cities of New York and Philadelphia which runs within one mile and three quarters of the land. Through these avenues lumber can be delivered in either of the cities named, for about \$7 per thousand feet—thus enabling persons en-gaged in the trade to derive greater profits than

In addition to the timber, convertable into evey shape of lumber, there is much that will anwer for spars of vessels-a sort of timber that ship builders have been obliged to purchase in Maine, or at other distant points.

Unlike most of the fands on the Lehigh there has, as yet, been no culling of the timber on this

The lumber trade of the Lebigh has been carried on to such an extent for years past, that a scarcity of good timber is beginning to be felt. Every season necessarily increases this difficulty. The consequence must be an enchancement of the value of timber lands. Those un-culled tracts with the advantage of avenues to market, such as the lands offered for sale, possess, cannot fail

to be the sources of supply bereafter.

But the land is not alone valuable for the timber it contains. It is of good quality for farming. nearly every acre being susceptible of a high state of cultivation. Capitalists desiring to make investments, would do well to turn their attention to these lands. For

Edito, my same-in-law, was also cared of a very pain in the head and feed by miner the freeze of Seminary, Vermont, and comes recommended by the Principal of that Institution, as "a young lady of agreeable manners and high literary attainments."

Young ladies and gentlemen who design to become teachers, will find this Institution an efficient school for preparation, since there will be connected with it, during the great part of the year a Taxunars' Issururus, the members of which will have the opportunity of attending an Evening Course of Lectures on School Teaching, and acquiring a practical knowledge of the art, under the supervision of the Principals.

The government of the school is based upon the law of universal love, which enjoins upon all to do to others as they would think it right that others should do to them. Hence the rules will be mildly, though strictly enforced; and parents and guardians may rest assured, that une morals, habits of study, and general deportment of the students will be carefully attended to.

The building is now undergoing a complete renovation. It will be painted, furnished with new desks, a bell, convenient recitation rooms, &c.

Millinburg is a thriving and healthy borough. It is, in every respect, a pleasant and destrable retreat for students. We, therefore, trust that the friends of elucation will deem the Academy worthy of their liberal support.
