

GOV. REEDER'S REMOVAL.

The Official account of Gov. Reeder's ejection from office confirms to the fullest extent, the belief that he was not removed on account of his alleged illegal speculation in Indian lands...

THE AMERICAN.

SUNBURY. SATURDAY, AUGUST 18, 1855.

H. B. MASSER, Editor and Proprietor

TO ADVERTISERS.—The circulation of the Sunbury American among the different towns on the Susquehanna is not exceeded by any paper published in North or Pennsylvania.

EDITORIAL TABLE.

Business Notices. Tax Inspector is the title of a new publication by Quincy, Haskell & Co. It is a handsome periodical, published monthly at \$1 per annum.

Journal of the Franklin Institute.—The August number of this publication has been received. Besides the list of patents granted, it contains the usual variety of scientific matter.

"THE AMERICAN DEFENDER" and "NATIONAL DEFENDER" have been united, and are now published in Philadelphia, under the above title.

"That put an end, necessarily, to the whole transaction. The alleged contract ceased to have any existence, and could no longer afford any pretext for Reeder's removal."

The August term of our Court closed last Saturday. A number of cases were disposed of, though not many of much importance. Law business is not as flourishing in this or the adjoining counties, as it was some ten or fifteen years since.

Died in this place, on Sunday morning last, GIBSON M. YORKS, Esq., aged about 48 years. His death was sudden and unexpected. The deceased came to this place about 20 years since. He possessed excellent business qualifications, and was employed in various clerical capacities.

KILLED.—On Tuesday last, ANSANTAS MORGAN, son of Isaiah Morgan, of Shamokin township, about 18 years of age, was killed by falling from a tree, a distance of 40 feet.

SENBURY AND ERIE RAIL ROAD.—Several new and handsome cars, and a loco, motive are already placed on this road to run from Northumberland to Williamsport on the completion of the road from Milton to the former place, which event it is supposed will take place about the middle of next month.

THE CEREMONIES OF THE COMMENCEMENT at Lewisburg on Wednesday, brought together an immense concourse of people. The Hotels could accommodate but a small portion of the visitors.

SCHUYLKILL COUNTY NOMINATIONS.—The Democratic County Convention met at Schuylkill Haven, on Monday last, and nominated C. M. Straub for Senator.

ANOTHER ITALIAN REVOLUTION.—The New York Crusader publishes an important article to the effect that a formidable insurrection is about to spring up in the whole of Southern Italy, and anticipates which give every promise of success.

THE NEW TEST.—Our readers will find in this weeks paper, the resolutions and proceedings of the Standing Committee, referred to in another article. It is a record that should be preserved, though it may, in after times, bring to troublesome reminiscences to the actors.

THE WORK OF THE DEVIL.—The first article in the last Church Review, a leading quarterly exponent of the doctrines of the Episcopal Church, published at New Haven, expresses some opinions about modern Spiritualism.

BUFFALO, Aug. 13.—Yesterday afternoon, a small boat, containing six unknown men, was swept over the Falls, and they were all drowned.

A VALUABLE DISCOVERY.

The discovery of a sarcophagus in the ancient city of Sidon, the lid of which was covered with Phœnician characters, has caused great excitement among the savans in Europe.

This beautiful marble tomb, enclosing the remains of one of the kings of Sidon, was conveyed in one of the French ships to Paris, and will form an attractive feature in the great exhibition. The Phœnicians were the first to invent letters, and thus far but little of their language has been discovered.

A correspondent thus describes the sarcophagus:—"In removing the sarcophagus from its dark bed and bringing it into day-light, a addition to the Phœnician inscription was discovered, giving to this monument of antiquity an almost priceless value."

It is not long since the Pope of Rome issued an edict threatening all of his followers, who belonged to the Masonic and other secret societies with a bull of ex-communication, if they did not withdraw at once from such associations.

There is one thing certain, if the Democratic party is divided by such intrigues and machinations, that branch which acts with, and sanctions these doings of the committee, will be fairly entitled to the appellation of the Jesuitical Democracy.

Will any honorable man of ordinary judgment or intelligence be willing to accept the nomination of any convention, brought about by such means? Such a nomination must, in the nature of things, be followed by an inglorious defeat.

MEETING OF THE STANDING COMMITTEE.—In pursuance to call the standing committee on Northumberland county, assembled August 6th, 1855, in the Court House in Sunbury.

GOVERNOR REEDER.—The removal of Governor Reeder by the President, meets with the almost unanimous condemnation of the untrammelled portion of the Press in Pennsylvania.

Resolved, That a committee of vigilance consisting of three persons in each borough and township be appointed by this standing committee, to select one of their own members who are the sworn enemies of the Democratic principles, therefore, in order to prevent being imposed upon by persons who are uncompromisingly opposed to the principles of the Democratic party.

Resolved, That no person shall be declared a member of the Democratic party unless he shall publicly announce in the Democratic papers of this county that he is not, never has been, nor does not intend becoming a member of a secret political organization.

Resolved, That the committee be requested to permit no person to vote at the delegate election whose vote is challenged, unless they can show good reason for their doing so, and do so in a public and open manner.

Resolved, That it be recommended to the convention that the number of votes received by no Democratic candidate for Governor, be published in all the Democratic papers of the county.

A student in Harvard College some years ago, while walking in Mount Auburn met a black snake of considerable size, which he attempted to kill.

Resolved, That the committee be requested to permit no person to vote at the delegate election whose vote is challenged, unless they can show good reason for their doing so, and do so in a public and open manner.

Resolved, That it be recommended to the convention that the number of votes received by no Democratic candidate for Governor, be published in all the Democratic papers of the county.

Resolved, That the committee be requested to permit no person to vote at the delegate election whose vote is challenged, unless they can show good reason for their doing so, and do so in a public and open manner.

SHIP IMPEDED BY DEAD LOCUSTS.

The following incident is related by Mr. J. S. Burges, in his recently published "Antibiosis."

At length the wind shifted to the southeast, and then south, with a suffocating heat, and blowing over the great Lybian and Numidian deserts, comes charged with hot and sulphurous vapours, causing a most disagreeable sensation of a stifling and oppressive kind.

On looking over the ship's side, there was seen a thick mass of brown matter which it is difficult to sail through with all canvas spread; it appearing to be the consistency of oil and tar, or melted butter and honey.

Desires of ascertaining the extent of the space occupied by it, I went to the foretop-gallantmast, and sweeping the horizon ahead and on each side of us, I perceived that it extended as far as the eye could reach to the east, north, and south, which presented one solid and unbroken mass of smooth brown surface; white to the west, the open sea presented the deep blue which distinguishes the waters of the Mediterranean.

Desires of ascertaining the extent of the space occupied by it, I went to the foretop-gallantmast, and sweeping the horizon ahead and on each side of us, I perceived that it extended as far as the eye could reach to the east, north, and south, which presented one solid and unbroken mass of smooth brown surface; white to the west, the open sea presented the deep blue which distinguishes the waters of the Mediterranean.

THE BENEFITS OF RAILROADS.

It is interesting to examine the results produced, in various ways, by the introduction of railroads into sections of the country hitherto inaccessible to the great westerly.

The following incident is related by Mr. J. S. Burges, in his recently published "Antibiosis."

At length the wind shifted to the southeast, and then south, with a suffocating heat, and blowing over the great Lybian and Numidian deserts, comes charged with hot and sulphurous vapours, causing a most disagreeable sensation of a stifling and oppressive kind.

On looking over the ship's side, there was seen a thick mass of brown matter which it is difficult to sail through with all canvas spread; it appearing to be the consistency of oil and tar, or melted butter and honey.

Desires of ascertaining the extent of the space occupied by it, I went to the foretop-gallantmast, and sweeping the horizon ahead and on each side of us, I perceived that it extended as far as the eye could reach to the east, north, and south, which presented one solid and unbroken mass of smooth brown surface; white to the west, the open sea presented the deep blue which distinguishes the waters of the Mediterranean.

MANUFACTURE OF SALT.—The Charleston

(S. C.) Mercury states that a French gentleman—M. Thomassy—has made a careful examination of the United States, with reference to the manufacture of salt from seawater.

The following incident is related by Mr. J. S. Burges, in his recently published "Antibiosis."

At length the wind shifted to the southeast, and then south, with a suffocating heat, and blowing over the great Lybian and Numidian deserts, comes charged with hot and sulphurous vapours, causing a most disagreeable sensation of a stifling and oppressive kind.

On looking over the ship's side, there was seen a thick mass of brown matter which it is difficult to sail through with all canvas spread; it appearing to be the consistency of oil and tar, or melted butter and honey.
