Farmer's Department.

A "DIG" IN THE RIGHT DIRECTION.

The Southern Planter, published at Richmond, Va., strongly condemns female equestrian exhibitions at our agricultural fairs, and pitches into the "North" as the quarter of our Republic, only, tolerating it. In this we believe the Planter is right, and we so heartily agree with it that we annex most of the castigation it inflicts, with a view to benefit the "strong-minded" bipids upon which the blows fall .- It says :

"It is one of the greatest triumphs of Christianity that it has raised woman from the position which Heathenism had assigned her. and has transformed her from the slave of man's passions and domestic needs to his companion, his friend, his angel on earth. But this position can only be maintained on the conditions that produced it, of modesty, decorum, reserve, delicacy-not only of feeling but deportment-and an admission to the world by all her acts that she is his dependent helpmate, and not his impudent rival.

"When women so far transgress the express commands of the Bible, that holy charter of their privileges, as to exhibit themselves in any such public capacity, as many now assume, at the North, they may as well take leave of all the gentle attributes that attract men to them, and become once more as ferocious as Medusa, as cruel as Medea, as voluptuous as Sappho, as bibulous as Circe, as shameless as Lais. The woman of the Bible once thrown off and there's no stopping this side the nether regions. We betide the country whose women rise superior to the teachings of Paul.

"If they choose in other lands to exhibit themselves in 'lectures,' or by beastly baby shows and an exposure of the most sacred mysteries of home to the rude gaze of ribaldry, to bring maternity into contempt, and by series of such acts to degrade themselves and demoralise their male associates, we do not feel that it is any particular business of ours to castigate their folly and presumption. But when they invade cattle shows, compete for premiums with cows and sows, and for admiration' with bulls and rams, we have a right to protest, in the name of 'man and beast,' against such 'entertainment,' against the disrepute they reflect from themselves upon a noble festival, and against an abuse which does introduce, and has introduced, the worst form of rowdyism into what should be excusively an area of quiet and respectable

rural competition Now, if this be an "institution" of the North, to which it is particularly wedded, we shall assist our Southern cotemporary in pulling it down and scattering it to the winds, as we think, with it, that it is an abomination that cannot be too soon removed. And it, in consummating this, the North chooses to consummating this, the North chooses to withdraw from the Union of these States, be it so. We should rather at any time that a June 23, 1855—1y. it so. We should rather at any time that a dissolution should take place, than that this Bible-defying practice should continue .-Ger. Telegraph.

GROUND OATS.

We have time and again printed facts and statements relative to the increased value of ground grains over whole for feeding both to horses and cattle. A late number of the American Veterinary Journal contains the following article on the value of Ground Oats, which we deem of sufficient interest to transfer to our columns: GROUND CATS .- Ground oats furnish more

nutriment, and keep the bowels in better condition, than when served out whole. grinding the oats we separate them into myriad of particles, and present them to the gastric solvents in a form calculated to secure their speedy digestion-in fact, they are in a condition favorable to speedy insalivation. Ground outs are more nutritious than whole, for the same reason that flour is more so than unground wheat.

Ground oats contain more of the nitroge nots, or flesh making principle, than any other kind of horse food; at the same time they furnish a mixture of coarse and fine food-the husks of the oats constitute the first, and meal the latter. The coarse material serves to keep the bowels in a soluble condition irritate and excite the mucons coat, and thus obviate the necessity for drastic medicine .-This kind of food is decidedly the healthiest for working horses They require, however, a certain quantity of sweet hay, in view of distending the stomach to a healthy capacity.

Husz Bens .- No one who has not tried them knows the value of husk beds. tainly mattrasses would not be used if busk beds were tried. They are not only more pliable than mattrasses, but are more durable. The first cost is but trifling. To have husks nice, they may be split after the manner of splitting straw for braiding. The finer they are split the softer will be the bed, although they will not be likely to last as long as when they are put up whole. Three barrels full, well stowed in will fill a good sized sack, that is, after they have been split. 'The bed will always be light, the kusks do not become matted down like feathers, and they are certainly more healthy to sleep on. Feather beds ought to be done away with, especially in warm weather. For spring, summer and fall, husk beds ought to be "ail the go," and such undoubtedly will be the case when they are once brought into use. There is no bet-ter time to procure husks than when corn is being harvested, and the husks will be much picer and cleaner when corn is cut up at the bottom and put in stacks. They do not be-come so dry and weather-beaten. It is calculated that a good husk bed will last from twenty-five to thirty years. Every farmer's daughter can supply herself with beds (against time of need) at a trifling expense. which is quite an inducement now-a-days --New England Farmer.

VALUABLE RECIPE.—Mr. A. Bronson, of Meadville, Pa., says, from fifteen years' experience, he finds that Indian meal poultice, covered over with young byson tea, softened with hot water, and laid over burns or frozen flesh, as hot as can be borne, will relieve the pain in five minutes. If blisters have not arisen before, they will not after it is put on, and that one poultice is generally sufficient to effect a cure.

SHALLENBERGER'S PILLS.—A certain cure for Fever and Ague, for sale by CEDARTUBS, Horse Buckets, Painted Buck ets, Meat Tenderers, Corn Brooms, Baskets, Children's Wagons, and Yankee Clocks use received and for sale by May 36, 1905.

I. W. TENER & Ge VALUABLE RECIPE .- Mr. A. Bronson.

AYER'S PILLS

A NEW and singularly successful remedy for A cure of all Billious diseases — Costiveness, I restion, Jaundice, Dropsy, Rheumatism, Ferbut, Humors, Nervousness, Irritability, Inflam A cure of all Billous diseases — Costiveness, Indirection, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Infammations, Readache, Pains in the Breast, Side, Hack, and Limbs, Female Complaints, &c., &c. Indeed, very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can foel well while a costive habit of body prevails; besides it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Billous derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth.

Among the many eminent gentlemen who have testified in favor of these Pills, we may mention:

DR. A. HAYES, Analytical Chemist, of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the

HON, EDWARD EVERETT, Senator of the U. S. ROBERT C. WINT RIGOP, Ex-Speaker of the House of Representatives.

Arbott Lawrence, Minister Plen, to England.

professional character is endorsed by the
Hon. Edward Everett, Senator of the U. S.
Robert C. Winy knop, Ex-Speaker of the House
of Representatives.

Arnott Lawrence, Minister Plen. to England.
† John B. Fitzpatrick, Cath. Bishop of Boston.
Also, Dr. J. R. Chilton, Practical Chemist, of
New York City, endorsed by
Hon. W. L. Maruy, Secretary of State.

Wm. B. Astora, the richest man in America.
S. Leiland & Co., Propt's of the Metropolitan
Hotel, and others.

Did space permit, we could give many hundred
certificates, from all parts where the Pills have
been used, but evidence even more convincing than
the experience of eminent public men is found
in their effects upon trial.

These Pills, the result of long investigation and
study, are offered to the public as the best and
most complete which the present state of medical
science can afford. They are compounded not of
the drugs themselves, but of the medicinal virtues
only of Vegetable remedics, extracted by chemical
process in a state of purity, and combined together
in such a manner as to insure the best results. This
system of composition for medicines has been found
in the Cherry Pectoral and Pills both, to produce a
more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the eld mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative
effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the
curative virtues only being retained. Hence it is
self-evident the effects should prove as they have
proved more purely remedial, and the Pills a surer,
more powerful antidote to disease than any other
medicine known to the world.

As it is frequently expedient that my medicine
should be taken under the counsel of an attending
Physician, and as he could not properly judge of a
remedy without knowing its composition, I have
supplied the accura

Their life consists in their mystery. I have no suysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Being sugar wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

heir use in any quantity.

For minute directions, see wrapper on the Box. PREPARED BY JAMES C. AYER, Practical and Analytical Chemist, LOWELL, MASS.

DR. A. B. MADDOCK'S CELEBRATED WORK ON INHALATION In the Treatment and Cure of sumption, Asthma, Bronchitis, and other Diseases of the Respiratory Organs, by Medical Inhalation.

WITH NOTES AND ADDITIONS By DB. CHAS GREENE.

First American edition, from fifth London edition, where it has had an unprecedented sale.

This is a valuable work and should be in the hands of al invalids, and the Medical Profession generally. For-warded free of charge, by mail, on receipt of FIFT CRITS; cloth (gill) ONE POLLAR. C. W. VAN HORN & CO. No. 32 North Ninth St., Philadelphia.

C. W. VAN HORN & CO.

No. 32 North Ninth St., Philadelphia.

We subjoin a few, from many commendatory notices and reviews from the English and American Medica and other Journals:—

"Dr. Maddock is the son of the late Henry Maddock, Esq., M. P., the well known barrister, and promises to rise, in his own profession, in as eminent a degree as his parent.

"The system (inhalation) proposed as the most effectual method of applying a remedy to a portion of the system which eamnot be directly reached by medicine itself.

"We recommend our readers to purchase the Work." We sleam (through, Loudon, Feb. 19, 1845.

"We recommend the Work to our renders, as it appears to be fully matured, cleanly written, and entirely divested of any quackery of perfosecking tendency. The Work well deserves perusal, and the practice, as far as our knowledge and experience extends, will tepay not only a serious consideration, but a patient trial of its merits"—Landon Medical Journal, December 13, 1845.

"We think that no one can rise from its pensal, without being satisfied that it is the work of a pracical and experience of mm; and that it ought, for the sake of those who suffer from consumption, sathma, or bronchits, to be brought into extensive circulation. It is, in the strictest sense of the term, a valuable Work."—Oxford University Heriak, November 7, 1816.

"A Re-Paint of the London Edition of Mr. Maddock's Work on Consumption, Bronchitis, Asthma, &c.; with Notes, &c., by Dr. Chis, Greene —This Work will be found worthy the attention of our reeders, for they may learn from it what can be expected from this mode of treating Consumption and other affections of the air-passages. Dr. M. is evidency, such of considerable intelligence and whatever there is of good in inhalations of medicated vaports, he seems to have ability to extract, may, we go farther, add say, that we fear that the Profession bave not given sufficient attention to this mode of treating Consumption and other affections of the irrepassages. Dr. M. is evidency, such of c

(From Professor Jos. Bryan, Editor of the "Philadelphia Medical and Sargical Journal."

"Dr. Matto-ck's no-k on Inhelation is one of the few which have been issued from the English press on this Phila., Apri judicious Notes of Dr. Greene, will add to the medical literature of the United States, and, it is hoped, excitesoms interest in the medical Profession on the subject of Inhalation, as a means of treating pulmonary effections. With the addition of modern discoveries in Physiology, this mode of treating these discusses should have a fair trial and some atonement made for the long neglect which In halution has suffered at the bunds of medical men.

JAMES BRYAN, M. D.,

Prof. of Surgery in Philadelphia College of Medicine idicious Notes of Dr. Greene, will add to the medici

A CARD.

DR. GREENE will trent DISEASES OF THE LUNGS and AIR-PASSAGES, agreeably to the mode as successfully adopted in the practice of Dr. A. B. Maddeck, and other eminent physicians of Europe. By this mode of treatment the diseased surface of the Bronchi and Lungs are directly acted upon, the various medicated vapur being carried to the most minute ramifications of the Lungs, producing healthy action; where a complete disergalization has not taken place the best results always sitend this feature of Practice; in fact, with suitable actuacts, it is the only reliable form of treating diseases of the Respiratory Organs. He intends devoting his sole attention to this particular branch of his profession, Those desirous of congulting him can do so by letter addressed to
