There is great beauty and much genuine poetry in the following lines, by Prentice on the closing year:

Gone! gone forever !- like a rushing wave, Another year has burst upon the shore Of earthly being—and its last low tones, Wandering in broken accents on the air,

Are dying to an echo.

The gay Spring: With its young charms has gone-gone with

its leaves
Its atmosphere of roses—its white clouds Slumbering like seraphs in the air-its birds Teiling their loves in music—and its streams Leaping and shouting from the up-piled rocks

To make earth echo with the joy of waves. And Summer, with its dows and showers, has gone; Its rainbows glowing on the distant cloud

Like spirits of the storm-its peaceful lakes Smiling in their sweet sleep, as if their dreams

Were of the opening flowers, and budding

And overhanging sky-and its bright mists Resting upon the mountain tops, as crowns Upon the heads of giants. Autumn, too. Has gone with all her deeper glories-gone With its green bills, like alters of the world Lifting their offerings to their God-Its cold winds straying 'mid the forest aisles To wake their thousand wind-harps—its se-

And holy sunsets hanging o'er the west. Like banners from the battlements of hea-

ven--And its still evenings, when the moonlit sea-Was ever throbbing, like the living heart Of the great universe, Ay-these are now But sounds and visions of the past-their deep,

Wild beauty has departed from the earth, And they are gathered to the embrace of Death. Their solemn herald to eternity!

Deferred Articles.

THIRTY-FOURTH CONGRESS. First Session.

WASHINGTON, Dec. 31 SENATE, -- After the reading of the journal the Message of the President of the United

States was presented and read. After the reading of the message, Mr. Clayton made some remarks relative to the treaty of April 19th, 1850, in order to show to the people of the United States the strength of the position assumed by this government relative to Cental American affairs, and the injustice of the position taken by Great Britain with regard to the construction of that

He agreed generally with all the President had stated, and contrasted the pacific character of this country with the aggressive policy always pursued by Great Britain, whether the ground taken by the British government regarding the construction of that treaty, namely, that it was merely prospective in its operation, and had no reference to the actual occupation by that country of the territory in question, was the understanding of the government of the United States when the treaty was made. Mr. Clayton then being Secretary of State.

Mr. Clayton replied, that it was an entirely new construction something of which he had never before heard. He never dreamed of such a construction being given to the language of the trenty. Does any man suppose, Mr. Clayton said, that I in the possession of my senses, entered into a treaty with Great Britain to allow her to remain in possession of the whole of this Isthmus merely because she had been in possession of it, and then signed a treaty to prohibit my own countrymen from taking possession, leaving her to remain undisturbed? What motive could an American Senate have had in voting for it? Is it possible that any man can believe for a moment such a view was in contemplation by the negotiations, when it was agreed that neither will occupy, colonize, fortify, or exercise dominion in Central America. To occupy, means first to take possession; and secondly, to keep possession. Great Britain agreed to do neither. Mr. Clayton concluded by offering a resolution that the usual number of copies of the message and accompanying documents be printed, and 15,000 copies of the same, in addition to the usual of all grades, from the extremely low price of

in what had fallen from Mr. Clayton, and his where at the same prices. We know and configratification at the course taken by the dently recommend them to be 20 per cent cheap-President and the views enunciated in the er than any for sale in the city. We have also message. In the whole history of the most a very superior assertment of Coffee, Old Gov't. tortuous diplomacy there was nothing to be Java, Laguayra, Maracariaa, Rio and Cap Havfound at all comparable with the course of tien Coffee. New No. 1 Macherel and Stant in Great Britain regarding the construction of 1 and 1 bld, or as may be desired. Choose, Pine the Clayton Balwer treaty and Central Ame-

Mr. Weller commended the message. He believed this country would never abandon the position she had assumed, relative to Central America. However the people of the United States may be divided on questions of domestic policy, whenever war men-aced them they would be found ever acting in harmony and unanimity. The message might be denounced by pseudo philanthropists, but would meet with a cordial response from every friend of liberty and lover of the

Constitution and the Umon, Mr. Seward announced that he was prepared to stand up and support the Clayton and Bulwer treaty; and, if need be-if the British Government could not be held to that treaty-he was ready to go further. He was ready for the assertion and practical maintenance of the Monroe doctrine.

My Darling.

The following exquisite little poem is from Putnam's Monthly for October: Her soul is as white as the hily, And her heart as warm as the rose;

The breath of the morning is with her, Wherever my darling goes, The children are glad at her coming-When the children are old and gray.

There will be more light in their spirits, That they danced in her smile to-day, When she shall be singing in Heaven-On the ways that she walked below,

Like June in the wealth of October, Her spirit will breathe the glow!

We remember being at a conference meet-ing once, in Yankee land, when one of the deacons came around asking the people if they wanted salvation. Near us sat a butcher's boy, nineteen years

old, about as amenable to salvation as a lamb in his hands would be to mercy. "Do you want salvation?" said the deacon,

looking into his face. "No, darn year, I want Sal Skinner, and the sexton won't let me take her out 'till meetins over."

MANUFACTURE OF PAPER.-There are in the United States 750 paper mills in actual operation, having 3000 engines, and producing in the year 250,000,000 pounds of paper, which is worth at ten cents per fb., \$25,000,-600. To produce this quantity of paper, 405.000.000 pounds of rags are reduired, 17 pounds of rags being necessary to make one pound of paper. The value of these rags at four cents per pound, is \$16,200,000.

There is one thing a drunken man can't do drive a sulky without getting his legs mix-

AYER'S PILLS

A New and singularly successful remedy for the A cure "I Billious diseases — Costiveness, Indigestion, Jasonice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Ereast, Side, Back, and Limbs, Fernale Complaints, &c., &c. Indeed, very few are tne diseases in which a Porgative Medicine is not more or less required, and much sick ness and suffering might be prevented, if a harmless last effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevalls; besides it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purpative. This is alike true of Colds, Feverish symptoms, and Fillious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the pablic health, and this Fill has been perfected with consummate skill to meet that demand. An the public health, and this Fill has been perfected with consummate skill to meet that domand. An extensive trial of its virtues by Physicians, Profes-eers, and Patients, has shown results surpassing say thing hitherto known of any medicine. Cures have been effected beyond belief, were they not subhave been effected beyond belief, were they not sub-stantiated by persons of such exalted position and character as to forbid the suspicion of untrulis.

Among the many entirent centlemen who have testified in favor of these PLs, we may mention: Du A. A. Havus, Anatytical Chemist, of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the Host, Enwann Evenett, Senator of the U. S. Runner C. Wist anor, Ex-Speaker of the Bouse of Henrickentsities.

Representatives, Apport Lawrence, Minister Plen, to England. John B. Fitzpatrice, Cath. Bishop of Boston, Also, Du. J. E. Chilton, Practical Chemist, of

Also, Du. J. E. Cullaton, Practical Chemist, of New York City, endorsed by Hos. W. L. Maney, Secretary of State. Wm. B. Aston, the richest man in America. S. Lelann & Co., Propr's of the Metropolitan Hetel, and others. Did space permit, we could give many hundred certificates, from all parts where the Pills have been used, but evidence even more contineing than the experience of emisent public men is found in their effects upon trial.

their effects upon trial. These Pills, the result of long investigation and These Phils, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in the Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the eld mode of composition, every medicine is burdened with more or less of acri-

rious. While by the eld mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative that is desired for the curative in the

widnal virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they have proved more purely remedial, and the Pills a surer, more powerful anti-dote to disease than any other medicine known to the world.

As it is frequently expedient that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulae by which both my Pectural and Pills are made to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known!

few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries. The composition of my preparations is laid open the composition of my perpendicular to judge on the subject friely acknowledge their exhibitions of their intrusic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many em-

medicine before its effects were known. Many eminent Physicians, have declared the same thing of my Pilis, and even more confidently, and are willing to certify that their sufficiations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, howels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, aherever they exist, such density, and sening sugar wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

For minute directions, see wrapper on the Box.
