There is a determination on the part of the members and sympathisers with the Vigi-lance Committee to support none for the lo-cal offices and for members of the Legislature who are known to be bitter opponents of that body and its past action. An independent ticket has been placed before the people by a Democrati committee chosen at a mass meeting compo ed of persons known to be friendly to the committee. The Republicans are now making a ticket, and are selecting from the People's ticket such men as are favorable to the Republican cause. They have also passed strong Vigilance Committee resolutions, and will select none but Vigilance men. It is possible that some compromise will be made by these parties; if not, it is perhaps fair to suppose that both will be beaten, except those names which appear upon both tickets. The Americans will allso make a separate ticket, and, it is reported, will nominate all Vigitages men. The contest will be the warmest ever waged in San Francisco. The Panama papers publish the following intelligence, which is somewhat different from the San Joan advices.

Great dissatisfaction existed among General Walker's troops, some forty of whom, including some of the general officers of the arms, having declared a determination not to serve any longer, were allowed twenty-four hours for reconsideration, and at the expiration of that period, still persisting in the determination, were marched out and shot by order of their General.

El Nicaraquense contains a list, two columns in length, of property which is to be confiscated in Nicaragua to the Walker Government, unless their owners, natives of the country, of course, can produce satisfactory title deeds thereto. These confiscations can be looked upon as nothing short of high-

The Montour Iron Company are about to connect their farnaces with the Cattawissa Railroad by a branch road oby a bra crats were induced to support a mongrel ticket, called Democratic, that could not, under other circumstances, have received from them any encouragement. Money was made to flow most freely, and promises of office were abundant, although the same offices bad been promised thrice over before. Single votes were bought up at the rate of \$4 to \$5 a head. Opponents were bought off as they appeared, or were silenced by threats and promises.

So far as we were concerned, personally, we have nothing to regret. The office for which were a candidate was one of responsibility and trouble when properly attended to, while the compensation could be no inducement to a man who had any other business engage-

Against such odds, it was, of course, difficult to contend, especially as we had scarcely ten days to canvass' the county against an organised band of office hunters and office tolders, bound together by the ties of public plunder and future expectations. It was, perhaps, presumptuous, on our part, to attempt to break down such an organisation at this time, backed, as they were, with foreign aid to any amount that might be deemed necessary for their purposes-who stopped for nothing that money could remove or deception overcome, and where it was expedient, stooped to the most 'degrading offices. Of course, these remarks are intended almost exclusively for the faction in this place, who have usurped the Democratic organisation in this country to further their own selfish ends and reckless purposes. That the party wil goon be rid of them is almost certain. All they want is a little more rope. The chief of the faction will be politically defunct, before twenty-four moons have revolved in their orbit. To our friends throughout the county, and they are friends that command our gratitude and respect, we tender our thanks. To those in the Borough of Sanbury, our native heather, who gave us an

unbought majority, we are doubly grateful-23 The Election on Tuesday was perhaps the largest, and most warmly contested election that ever took place in this county. The "ornamental Major" was making his last desperate effort. He felt, after so many defeats, as did Richard III, in his last battle, when he offered his Kingdom for a horse. The Major had staked 12 years hard service, and an enormous expenditure of money on the issue. Money makes the mare go, and so it did the Major, and with him, the whole mongrel ticket. Whether he will ever fulfil the prediction of the Pennsylvanian, and become "an honor to his constituents and an ornament to the nation" is a question of considerable doubt among his own friends. One thing is certain, if he is ever destined to become a "untional ornament," he will never be a shining one. All the rubbing and burnishing in the world, will not make him shine in Copgress. His ornamental qualities must be of an opaque, or at most of a trans-

lucent character.

THE STATE RECTION.

The following are the reported majorities received in this place, by Telegraph, of the result of the elections throughout the State, They will, no doubt, vary considerably from the official returns, but will serve to show how the contest has terminated unless the vote should be very close. The Democratic ticket appears to be about 3,000 ahead, with some few counties to hear from which will not much change the result :

The Directors are divided between England and the United States, and some of the most influential firms give countenance to the project, and appear in the directory and as agents to procure subscriptions. The difference of distance be tween New York and San Francisco, as compared with the Panama route is 1,103 miles, and the difference from Liverpool to San Francisco, touching at Kingston, Jamaica. is 831 miles. It is estimated that the present rates of speed by steam and rail, that the time between New York and San Francisco can be accomplished in thirteen days, four hours, and that steamers can be built, and with increased railway speed the time can be reduced to eight days, sixteen hours. The accomplishment of this work will bring San Francisco within speaking distance of New York.

PREMONT.

THE MUSTANG CANDIDATE. If Col. Fremont had as many friends as the Mustang Limiment, the opposition could not draw a corporals guard. Mr. Fremont remarked, in his dispatches to President Fill more, while transporting horses and cattle over the plains of Mexico, "That if the Government would send on a liberal supply of Mustang Liniment, it would save 25 per cent of his losses." This is very important for all Forms and Liverymen to know. The Mustang Liniment is a wonderful article for man or beast. It should siways be used for Sores, Swellings, Stiff Joints, Burns, Rruisos, Rheumatic Pains, &c., and for Gelds. Sprains, Spavins, Ringbone &c., upon horses.— Beware of imitations. The Mustang is sold by

all respectable dealers everywhere.
