LATER FROM EUROPE.

Breaking of the Telegraph Cable-Return of the Ficet to England-Another Attempt to be made-Arrival of the India Mail-Delhi not Fallen.

HALIPAX, August 2. The Royal Mail steamship America arrived at half-past one o'clock this morning, with Liverpool dates to Saturday, the 15th instant, being three days later than previous

The Atlantic Telegraph is broken and operations for the present suspended. The British steamer Cyclops returned to Valentia with Mr. Field on board. That gentleman immediately repaired to London to confer with the directors as to future movements.—
He telegraphed the following to Mr. Stuart,
the agent of the Associated Press at Liverpool:

London, Saturday, Aug. 15, A. M. "Her Majesty's steamer Leopard arrived at Portsmouth on Friday evening, the 14th just., and reports that the Atlantic cable was lost, and reports that the Atlantic cable was lost, at a quarter before four o'clock on Tues-day morning, the 11th inst., after having paid out successfully 335 nautical miles, and the last 100 miles of it in water over two miles in depth, and the greater part of this at the rate of more than four knots an hour. At the time the accident occurred there

was a heavy swell on. The Niagara was going at the rate of four knots per hour, and as the engineer found that the cable was running out in too great a proportion to the speed of the ship, he considered it neces ary to direct the brakes to be applied more firmly, when unfortunately the cable parted at some distance from the stern of the ship.

The Agamemaon, Niagara and Susquehanna are to remain a short time where the ca-

bie parted, to try some experiments in the deep water of that part of the Atlantic (two thousand fathoms), which it is considered will be of great value to the Telegraph Company, and then all go to Plym u h England. The Cyclops was sent back with despatch-

es to Valentia, and then to join the Leopard at Portsmouth. Although the unfortunate accident will postpone the completion of this great under-taking for a short time, the result of the exexperiment has been to convince all that took part in it, of the entire practicability of the enterprise, for with some slight alterations in the paying out machinery, there appears to be no great difficulty in laying down the ca-ble, and it has been clearly proved that you can telegraph successfully through twentyfive hundred miles of the cable, and know that its submersion at at a great depth had no perceptible influence in the great electric cur-

There is no obstacle to laying it down at the rate of five miles per hour, in the greatest depth of water on the plateau between Ireland and New-foundland."

The experience now obtained must be of great value to the Company, and it is under-stood that the directors will decide whether it is best to have more cable made, and try again immediately after the equinoctial gales are over or wait until another summer. In Liverpool an impression prevails that another trial will take place in October.

A Liverpool paper reports the arrival of Niagara, Sasquehanna, and Agamemuon, at Plymouth see Friday, but doubtless a mis-

Dolhi had not fallen up to the 27th of June The rebels had made several desperate sorties, but each time were repulsed with great slaughter. The city was reported full of sick and wounded, and the cholera prevailed .-Reinforcements continued reaching the British camp. There are floating rumors, as there were in

the receipt of the last mail, of the capture of Delhi, but they are wholly unreliable. Further victories in several districts had

been reported. and five thousand natives. The native portion of the troops had proved entirely trust-

worthy.

The whole of the kingdom of Oude had risen, but Sir Henry Lawrence, with his small force, kept the enemy in check.

FURTHER FOREIGN NEWS.

THE VERY LATEST INTELLIGENCE.

NEW. YORK August, 30. The following intelligence was telegraphed from London to Liverpool on the morning of Wednesday, 19th, just previous to the depar-tu e of the Atlantic. THE RUMORED FORGERIES.

The Times says, "a rumor has been circulated that a merchat at Liverpool, lately deceased, has left liabilities estimated at \$300,-000, of which £100,000 are upon forged acceptances. The precise facts have not transpired, but the statement is believed to be true. The death of the defaulter is stated to have been by suicide, and his losses are supposed to have been incurred by heavy speculations in cotton and shares."

EXPORT OF SILVER TO THE EAST. The amount prepared for transmission by the steamer of Wednesday reaches £1,250,-000—being the largest shipment ever yet

There is reason to suppose that the very large quantity of silver exported this year have produced an effect in the East which, before the lapse of many months, will tend considerably to check the magnitude of these operations. Meanwhile, the demand for silver for the East has become less active in consequence of the quotations received by

BANK OF FRANCE PURCHASING BULLION AGAIN.

The Bank of France have renewed their artificial purchases of bullion again, on a soale which shows that the reduction in their rate of discount last June was altogether pre-

ATLANTIC TELEGRAPH STOCK. The £1,000 shares of the Atlantic Telegraph Stock have been offered in London at a discount of £250.

ARRIVAL OF THE ATLANTIC.

LATER FROM EYROPE.

THE TELEGRAPH CABLE.

NEW YORK, August 30. The steamship Atlantic arrived this morn-

ing, with Liverpool advices to the nineteenth instant, four days later than by the Amer-

The Atlantic passed the Europa on the 20th inst, the Persia on the 24th, in lat. 50, long, 41, and the Fulton on the 26th off Cape

The steamer Asia arrived at Liverpool on

the 16th inst.

The vessels laying the Telegraph cable had arrived at Plymouth, and the Directors of the Company were to assemble on the 19th, at London, to deliberate upon future proceedings. It is believed that the company will take immediate steps to recover the lost por-tion of the cable. Fully one half, it is thought can be saved, and that the ultimate loss to the Company will not exceed £25,000 ster-

The recent storms and floods have occasioned much damage to the crops in England but the weather has since improved. THE ATLANTIC TELEGRAPH.

On Saturday, some of the leading members of the expedition that accompanied the telegraph squadron, during the week, arrived in town, and confirmed in full the directors, at

the company's office, the fact of the failure of the Atlantic Telegraph.

Mr. Cyrus Field was the first to arrive in London, and made the following official report to the directors. [The report alluded to appeared in the columns of the Ledger on Thursday.]

It does not appear that the accident was

It does not appear that the accident was owing in any way to the too great weight of the paying out machinery and gear on the Niagara, but the machinery is susceptible of considerable improvements. Some of the gentlemen in command of the expedition urged the desirableness of raising up the 300 miles, or of splicing that quantity on to the shore end again, and going on towards the Newfoundland shore, in spite of the catastrophe that had occurred; but it was eventually determined to return home, as it would in all determined to return home, as it would in all probability be found that the expedition would neither have enough "slack" nor available cable to complete the length to be submerged between shore and shore. There were two representatives of the Russian Government, one of the French Government, two of the British Government, and two of the American Government with the expedition American Government with the expedition, together with Mr. J W. Brett, the well known father of sub-marine telegraphs between England and France, and the Mediterranean, who arrived in town on Saturday, shortly after Mr. Field.

The directors of this company hold a special meeting on Wednesday next, to consider and determine whether attempts shall be renewed in October next, after the exquinoxial gales, or whether the further prosecution of this enterprise shall deferred until next summer. Various opinions are affoat with reference to the strength of the cable; but it is asserted that, were it either stronger or weak-er, the desired end in view would not have been arrived at, and that upwards of sixty different kinds of rope were experimented on before the present form of cable was determined on. This is the first electric cable that his been sunk either in this or any other country to the extent of three hundred and thirty-five miles; but it is a singular fact that with the exception of the Norwegian telegraph cable, of some ninety miles long she first attempt in every previous experiment for laying down a submarine cable has been a failure, although the second attempts have been successful. The entire length of wire copper and iron in the cable amounts to 332, 500 miles, or enough to go thirteen times

round the earth. With reference to the arrangements on board the Niagara, for regulating the "strain" which unfortunately caused the cable to break it appears the cable weighed one ton a mile, and could bear a direct strain of four tons upon its strands. When, however, according to Professor Whitehouse and Mr. Bright the engineers, it was immersed in the sea, its relative weight was diminished, and its downward pressure on the salt water was little under 14 cwt, per mile. The greatest depth over which the vessel would have to pass in depositing the cable was little more than two miles, and this depth was reached at the time that the cable broke; consequently, if enough of the rope were suffered to hang motionless from one of the vessels, to reach the bottom in this depth, the train to be borne by the cable would be one ton and a half.

According to the arrangements, however, for the paying-out, the cable would be constantly in motion, with only a sufficient restraing power upon it to control and regulate its passing from the Niagara until this was increased by a rate slightly faster than the progress of the vessel. In this condition of things, another modifying influence came in-to operation, to act further in relief of the strain. The cable would not only be somewhat buoyed up, so to speak, by the water, but also by the influence of friction. It would not descend as it was paid out in a vertical line, because the friction of its sides against the water retarded the sinkig of the mass .-The amount of this retardation, and the length that would lie between the stern of the vessel and the bottom of the sea, were determined by the rate a which the cable was paid out, and at which the paying out vessel moved. In fact, so far from there being any be just pull enough to drag it gently out of and impartiality.

the vessel over the revolving sheaves. The arrangements in the event of anything going wrong, were to back the Niagara as rapidly as possible, and so slacken the cable -the break being bound down on the friction drum to arrest the outrun of the cable. The rope would then be hauled in on board, and on its being discovered, the imperfect part cut out, its place supplied by splicing

in fresh cable, and the paying-out resumed as usual. The expectation, in the event of success was that, within a month at the furthest messages migh be flashed through both England and America; and it is now, even in the face of temporary failure, supposed that grand international result may be regarded more, merely as a matter of time than of actual and

FRANCE. The fetes given by Napoleon un the 15th passed off well, though marred by wet wea-

possible accomplishment.

It is rumored that France intends to demand the extradition of Ledru Rollin, and that he is about to leave for America.

It is stated that France is about sending a naval expedition to Cochin China, to demand

satisfaction for insults to her flag. DEATH OF COMMODORE CASSIN.-The venrable Commodore Stephen Cassin died at his residence in Georgetown, D. C., on Saturday in the 76th year of his age. He entered the navy fifty-seven years ago when a boy, and served under Perry at the naval battle on Lake Erie, where he distinguished himself and was promoted. He was a terror to the pirates who infested the Atlantic ocean and on the 28th and 29th September, 1822 he captured five piratical vessels. He also commanded the Ticonderoga under Commodore McDonough, on Lake Champlain in 1848.— In consequence of ill health he had seen but Il year's sea service and was on the reserved

list at the time of his death. ROBBERY OF THE PENNSYLVANIA RAILROAD'S EXPRESS BURTHEN TRAIN FROM PHILADEL-PHIA .- The express burthen train from this city on Tuesday last, was robbed of about one thousand dollars of dry goods beyond Dillersville. The goods were traced to houses in Lancaster. One that of Jacob Herzog, gives information that he had purchased them from a German named John Trumpy. Two other persons were suspected of being out in the country selling other portions of the goods One of them, Henry Levan, a half brother of Herzog, was arrested and the officers are now in pursuit of the third person implicated. The robbery was effected by entering the cars immediately after the agent had examined them, and by throwing out the bales and bundles into the road for accomplices in wagons

to pick up. A CAMEL LOAD .- The Government camels now at work in Texas carry 690 pounds of corn at a load and travel 34 miles per hour without difficulty. Their great value is not so much on account of greater strength than the horse, but on account of their ability to make the jornado del muerto, or journey of death, across the desert plains of Western Texas.

HANDSOME BEQUESTS .- The will of the late Alexis J. Dupont contains among other do-nations, \$10,000 to Trinity Church, Wilmington, Del., \$6000 to St. John's Church Brandywine Villiage and \$5000 to the "Bishop's

New Advertisements.

A CALL TO FARMERS. Farmers, drop your Tools, Pause a little Read this and Reflect!

THE FARMER'S PROMOTION BOOK A new and Scientific Manuring System, for the Cultiva-tion of all kinds of Grains, Grasses, Folder and Pasture, upon all kinds of Sot!, Proved by actual Experiments and based on evident truths; Designed to improve Agriculture in all its branches; represented by upwards of one hundred and fixty engravings of the most valua-ble Grasses and Plants connected with the system.

By Dr. C. G. REINHOLD,

BOALSBURG, CENTRE CO., PA.

In this treatise it will be seen that the object him beer to give the Farmer that kind of information which enables him to make practical application to fertilize his han and increase his grain, fodder, and pasturage. The doctrines as taught by this memoring, and fodder and pasture custivation system are rational, clear and evident, an suggest an im, rovement in the mode of agriculture hither to make many the contraction of the formal contract, and which is the mode wanted, as it fills a word which has long been felt, but which there has hitherto been no attempt to supply, and as farmers of Centre and Huntingdon countres, we recommend the work to every farmer, as we fully believe that they will resp the greatest possible benefit from it.

HUSSEY'S AMERICAN REAPER. FOR CUTTING BOTH

GRAIN AND GRASS GREAT improvements for 1857.—This Machine was put in successful operation in 1833 and continued to be the only Reaping and Mowing Machine in the World, of any practical value up to 1845—twelve years after its introduction. Other Reapers are now offered with glowing advertisements, Certificates, Diplomas, Gold and Silver Medals, &c. But the Farmer in search

of the best Reaper, and not posted in the mafter.

had better see a little further. If there is any value in 24 years experience in building Reapers, and using them in the har-vest field, and in the improvements made during that long period, OBED HUSSEY, the Father of Reapers, can claim it. All who are satisfied with the Best Reaper and Mower, uan be supplied by sending their orders early in the season, as the crops indicate a large demand, and we can not have over 200 Ready for the vast harvest of 1857. We guarantee that this Reaper an Mower can not be beaten on fair trial by any other Reaper that may be brought into the harves fields in 1857, and we also insure it to be the strongest and most durable machine in use. We would respectfully invite Farmers to examine the machine thoroughly before purchasing, and satisfy themselves of its superiority over all

During the last four years, the subscribers have sold between 500 and 600 of these Machines, to the best and most successful Farmers in Montour. Union and the neighboring counties, (whose names are too numerous to insert) to whom we

respectfully refer.
The subscribers have the exclusive right in the following counties: Montour, Union, Soyder, Northumberland, Columbia, Luzerne, Perry Mifflin, Centre, Clinton and Lycoming. All orders thankfully received and promptly attend-GEDDES, MARSH & CO., Lewisburg, Union county, Pa

Sunbury, May 30 , 1857,---tf HERRING'S SAFE.

Real Real

CHAMPION! THE RECENT TRIALS at Reading law endorsed the current of public opinion, and confirmed the versite of more than 200 accidental fires, proving conclusively test "Herring's" is the only SAFE that will not burn.

Extract from the Committee's Report on the Trial of Iron Safes at Reading:

Report on the Trial of Iron Safes at Reading:

"On the 20th of Pelgrary all the members of the Committee met to witness the Safes and backs and papers, (placed in them) and were perfectly satisfied that all was right. The day following, the burning took place, under the superintendence of the Committee. After a fair and maparital burning for five hours, the Safe of Messer. Evans & Watson was first opened, the Safe being on fire miside, and the centends partially consumed, while the contents in the Safe of Messer. Farrels & Herring were in good condition, and no fite made."

Rending, March 2, 1857.

(Signed). B. F. FELAN.

P. N. COLEMAN.,

A. H. PEACOCK.

And endorsed by over 30 of the best men of Reading. The above Safes can be inspected at 31 Walmit Street, where the public can satisfy themselves of the great superiority of the "Herring's Patent Champion," over the defeated and used up "inside from Door Salmander."
