A Frog in Ice. We were shown yesterday, by a Savannah gentleman a lump of Northern ice in which a medium sized freg was comfortably and cooly enscenced. His fregship (we like to talk respectfully all beings even of our political op-ponents) seemed to be a cross between the rana viridis and the rana esculents but lest we might make a bull of him giving his history from memory, (like other dealers in anti-quated Greek flesh, &c.) we immediately turned to Lucian's Greek "Dialouges of the

Dead," and found as follows:
"Ye frogge is one emphybyons annimal with foure feete a nayked biddie and wythout ever a taile. He hath a hoarse voyce, and loveyth much to use it on ye soummer nights. He is remarkable for gracefull symming with rapidnesse and for taking verrie large leaps on ye lands."

That authority settled, we will state that the above frog showed symptoms of life after his cool incrustation had dissolved and having been placed in water was thawed into life and metirity. It certainly was a curiosity to see live frog thus done up in ice; but whether last winter it contemplated a tour to Southern latitudes and considering the above was the coolest mode of traveling, we leave a ques-tion of debate with ichthyologists ed id genus omne. - Savannak Georgian.

The baggagemaster, after eyeing him a moment accosted him with 'What's wanting sir !" "I'm looking for my trunk," demurely answered the nervieus men.
"I will take care of your trunk sir—that is my business," retorted the baggage-master.—
'Ob, I am aware of that, sir; but I would always much rather keep my trunk under my eye." 'Well then sir, you should have been born an elephant."

A CALL TO FARMERS.

Farmers, drop your Tools, Pause a little, Read this and Reflect! THE PARMER'S PROMOTION BOOK a sew and Scientific Manuring System, for the Califra-tion of all kinds of Grains, Grasses, Fodder and Pasture, upon all kinds of Sout, Proved by actual Experiments and based on evident truths; Designed to improve Agriculture in all its branches; represented by upwards of one hundred and fifty engravings of the most valua-ble Grasses and Plants connected with the system.

By Dr. C. GEREBNHOLD,

HOALSBURG, CENTRE CO., PA.

IN this treatise it will be seen that the object has been to give the Parmer that kind of information which enables him to make practical application to fertilize his lend and increase his grain, fodder, and posturage. The doctrines as taught by this manuring, and fodder and pasture cultivation system are rational, clear and evident, and engest an improvement in the mode of agriculture hither to unknown to our formers, and which, if adopted and enrefully practiced, cannot fail to advance the interests of the furning community. Such a work has been muck wanted, as it fills a road which has long been felt, but which there are fully been no attempt to supply, and as furners of Centre and Huntingdon countes, we recommend the work to every furner, as we fully believe that they will resp the greatest possible benefit from it Daniel Mosser,
