Twen'it get no crop that's worth the winning." The gover hears, his arm be make. And doubtful he scands still and thinks, Then goes he forward, strong and steady, I've the wire King this moswer rendy. "I've nothing else but this one field; I've watched it, inbored it, and tilled; What further use of pausing gueraning? The care from me; from God the blessing."

Farmers' Department.

PROPAGATION OF FISH.

The President of the American Institute New-York, lately read a lengthy paper upon the subject of artificial propagation of fish.In answer to a question be said :- The proposition that I made last year to the Legislature was that if a law was passed to protect seed I would stock the waters of the State

with salmon.
He also stated :-! have eight pends upon my farm stocked with forty-five kinds of fish among which I have one pend of trout. They grew more rapidly in a pond where well fed than in streams. I have also some in a cask and they are so tame that they will come to me at the sound of a bell and eat from my hand. There is no reason why fish growing cannot be made profitable. My gold fish are very gentle and flourishing, but are not exteemed for food. They are however very ornamental.

I have one pond devoted to pike, which are extramely voracious, but have become quite decile. They pair about the first of April, and desposit their eggs, and never look after them again until their young are hatched, when the old pike deveur their own offspring. Their favorite food is frogs. I think a small fish pand would produce a greater profit than a ten acre field well cultivated. The yellow perch is also a good fish, and does well in my ponds. Sometimes perch die from bursting heir bladders in shallow water in warm wea-

The striped bass I have also succeeded in growing in fresh water to advantage, not withstanding it is a sea fish. The common shad is the most interesting of all my fish. They spawn about 45,000 eggs, each, and would multiply to a great extent if not destroyed .-I succeeded in growing shad in fresh water. and have had them to grow five or six pounds in a single year. A shad cats by succor and never bites at a hook.

I have also a variety of fish from the great lakes, all of which are in a flourishing cor tion. I deposited in one pend 3000 cels, and have succeeded in raising them by feeding ANALYSIS OF LYON'S CATAWBA them with sait, as they are only found naturally in situations where they have access to the ocean. I am satisfied that the cel is acviperous, notwithstuding the contrary opinion has often been nuvanced.

The sense of smell in fish is generally very strong, and the senge of hearing is also well developed. The sight is also very keen in some species, though they caunot see in turbid water. The sucker is scutely sensible to touch. Their taste is the least delicate of any of the senses, since some of them devour food indiscriminately without regard to quality. Fish for fool are always in the finest adition when full of eggs.

After spawning, they deteriorate very rapidly. Fish food is proved to be nutritious and wholesome by the healthy condition of fishermen's families. I have not been able to fishermen's families. I have not been able to domesticate cod fish in fresh water ponds.— I intend however, to continue experiments .-It is an interesting fact that the common school fund of Massachuserts owes its orgin to cod-fishery. I expect to be able to domes ticate the tench the physician fish of the race its slime serving to heal wounds in other species. There is no difficulty of transporting ish ova from one part of the country to an another, por in hatching the young fish .-Transactions of the American Institute.
To the foregoing we would add the following from the London Atheneum:

The experiment made by the Emperor of the French to stock the waters of St. Cloud with trout hatched artificially, has met with complete success. Trout twelve months old are eight inches long, and weigh from 24 to 24 ounces. Their value in Paris market ould be from 20 to 25 cents. The tront 33 months old are from 19 to 20 inches long, and would sell at from 60 cents to \$1 20. It is further stated that the waters at St. Cloud were never inhabited by any species of sal myssies. The trout are extremely numerous and promise to yield highly productive returns in a commercial point of view. The principal object of the Emperor is to ascertain whether the production of fish by artificial means is

"Well," his honor, to an old negro who had been hauled up for steeling a pullet, "what have you to say for yourself?" "Nuffin' but dis, boss' I was crazy as a bedbug when I tole dat ar pullet, cos I might have stole a clusively dat 1 was laborin' under de delirium

Necipes.

To KEEP DUST, &C., FROM CHEAM .- "Sun Bennet," in the Ohio Cultivator, who is doubtless a tidy wife or daughter, gives the following directions to keep dust, &c., from cream; We take ratans long enough to make hoops a little larger than the tops of the milk-pans, form the hoops and stretch over them some this cotton stuff, that will not stop circulation of the air, but will keep out the flies and mile; sew this to the hoops; and when the mile is cool, by these covers over the pans, and they save the cream as clear as can be.

Cooking Old Potators.—The following method of cooking old potatoes at this ser can of the year is recommended by Mrs. II. N. W., of Freeport Illinois. It is excellent

and now is the time to try it : "I pare the potatoes about an hour before ing, and then sonk them in cold water until they are to be cooked. The water must be boiling before they are put in, and a little salt is added. When fully cooked the water is poured off, then the kettle or pot is placed on the store, with the lid removed, to allow the moisture to evaporate. By this method coking potatoes, I have never failed to

render them dry and mealy." PRIED POTATORS .- How few cooks know how to fry potatoes! There is no better dish at breakfast, or even dinner, when there is a beefsteak on the board. To fry the petate properly, they should be pared, sliced length-wise the thickness of an eighth of an inch. dropped into a pan containing hot fat, turned frequently, nicely browned all over, but never burned. A little flour dredged over them is

LAMP Ou. STAINS,-To remove lamp oil from cotten and woolen goods, rub in thoroughly with the hand some clean, fresh lard; let it remain for three or four hours, then apply soft weap, and in warm water. This can be depended on.

PLAIN AND FANCY BOOK BINDING. THE subscribers, having bought the Blindery late of Stephen D and Lyman B. Wilson, of Millon, and added to it some superior implements, and having secured the superintendence of Mr. H. E. DOWNING, who has for ten years been employed in one of the best Binderies in Philadelphia, and course with the first recommendations for integrity and competency, are now prepared to BINDORRESHIND

BIND OR R R - BIND

Books, Pamphlets, Magazines, Newspapers, Music, &c., &c.,
in every style desired. Work may either bound or half-bound, in Calt, Roan, Tarkey Morocco, Sheep, or other Leatner, or Music of various colors and ornamented with Music Paper of alterent figures, shades and colors. On Blaics and ther Books or Papers which it a desired to preserve as irramoriate in a family, can be made more secure by the linder's skill.

17 Blank Rooks, Bildes, Hynn and Prayer Books, Pochet Books, Athanus, Biaries, &c., LETTERED WITH GOLD in legible mod durable characters, to order.

MUSIC PORTFOLIOS, &c., made to soit customers. A good Bindery has long been desired in this vicinity, and we can therefore must respectfully solient the public pattomage, tracting that it will be sufficient to repay the cutby and risk. LF Reat, tools, stock, and workmen all requiring mosely, we shall expect PAY ON DELLVERY of all we like 22 We intend to charge in slemte, reasonable and aminous prices, on the "Lave and Let Live" principle—and bape to make it a permanent business.

BRANDY BY A. A. HAYES, M. D.,

Assayer to the State of Massachusetts. GENERAL CHARACTER.-A light yellowish brown-colored spirit, having a fragrant odor when evaporated from clean linen it left no oil or offensive matter. Analyzed for volatile and fixed drugs, of which no traces of any kind were found. Its color is proved to be due to a colored

sence resulting from a peculiar fermentation of

10 parts of pure ulcohol, besides the fragrant oil. 1,000 parts of the spirit afford 23 parts of a strong solution of the oil which characterizes this Brandy; the spirit left, after removing the oil, is pure and odorless, and in all its qualities a perfect spirit not subject to charge. One U. S. gallon of this Brandy at 60 deg. P. contains, besides the spirit and oil, only 220 grs. of matter composed

Dr. COXE, State Inspector of Ohio, and Dr. Jas. R. Chilton. Chemist, of New York, both prononnee this to be pure Brandy, and free from

For Medicinal purposes Lyon's Catawba Brandy has no rival, and has long been needed to supersede the poisonous compounds sold under the name of Brandy. As a beverage, the pure article altogether superior, and a sovereign sure remedy for Dyspepsia, Flatulency., Low Spirits, Languer, General Debility, &c. &c.

SALAMANDER FIRE

THIEF-PROOF SAFES. The largest assortment in the United States. Warranted to be equal to any now made, and will be sold on as Good Terms, as can be obtained from any other house in the Country, at EVANS & WATSON'S

26 South 4th Street, Philadelphia. Truth is Mighty, and Must Prevail. Report of the Committee appointed to superintend the Burning of the Iron Safes, at Reading, February 27, 1857.

READING, March 4.

The undersigned, members of the committee, do respectfully report, that we saw the two Safes originally agreed upon by Farrels & Herring and Evans & Watson, placed side by side in a furnace, viz: The Safe inuse by the Paymaster of the Philadelphia and Reading Railroad Company, in his office at Reading, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz, in his store, manufactured by Evans Watson, and put in books and papers precisely

The fire was started at 81 o'clock, A. M., and kept up until four cords of green hickory, two cords dry oak and half chesnut top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the Committee. The Safes were then cooled off with water, after which they were opened, and the books and papers taken out by the Committee and sent to H. A. Lantz's store for public examined and marked by the Committee. The books and papers taken from the Safe manufactured by Farrels & Herring were in our judgment, damaged fully fifteen per cent. more than those taken from Evans & Watson's Safe. We believe the above to have been a fair and

impartial trial of the respective qualities of both JACOB H. DYSHER, DANIEL S. HUNTER. Having been absent during the burning, we fully coincide with the above statement of the condition of the papers and books taken out of

the respective Safes. G. A. NICCLLS H. H. MUHLENBERG JAMES MILHOLLAND. March 21, 857 .--

HERRING'S SAF

CHAMPIOI THE RECENT TRIALS at Reading have endorsed the corrent of public opinion, and confirmed the vertical of more than 200 seed dental free, proving conclusively that "Herring's" is the only SAFE that will not harn.

Extract from the Committee's Report on the Trial of Iron Safes at Reading 1

Report on the Trial of Iron Safes at Reading 1

"On the 26th of February all the members of the Committee met to witness the Safes and books and japers, (placed in them) and were perfectly mitted that all was right. The day following, the burning took place, under the superintendence of the Committee. After a fair end impartial burning for five hours, the Safe of Mesers. Evans & Watson was first opened, the Safe being on fire uside, and the contents in the Safe of Mesers Farrels & Herring were in good condition, and no fire inside."

Reading, March 2, 1857.

(Signed.) H. F. FELAX.

P. N. COLEMAN.

A. H. PEACOCK.

And endorsed by over 50 of the best men of Reading.
The above Safes can be inspected at 34 Walmat Street, where the public can satisfy themselves of the great superiority of the "Herring's Patent Champion," over the defeated and used up "inside Iron Door Salmander."

Bailey & Herring,

Balley & Herring,

34 Walnut St., Philada.

Only makers in this State of Herring's Patent Champings
Safes.

The attempt made by other parties to holster up the
reputation of a Safe which has failed so signally in nevideatal fires in Philadelphia, (Rainstead Plack,) by taking
one out of an agent's store, (H. A. Lantz,) made double
thickness, (eifferent from those they sell) to "burn up'
one of Herring's (fail is thick) has met with its true re,
ward. Herring's Safe could not be burn, proving conclusively that the only reliable Safe now made is "Herring's"
of which over 15,000 are now in actual use, and morthm 200 have been tried by fire without a single loss.

Phila., June 20, 1857.—W.
