Select Poetry.

From "All the Year Round." THE BLACKSMITH.

Old England, she has great warriors, Great Princes, and poets great; But the Blacksmith is not to be quite forgot, In the history of the State. He is rich in the best of all metals

Yet silves he lacks and gold; And he poyeth his due, and his heart is true, Though he bloweth both hot and cold The boldest is he of incendiaries

That ever the wide world saw, And a forger as rank as e'er robbed the Bank, Though he never doth break the law. He hath shoes that are worn by strangers Yet he laugheth and maketh more; And a share (concealed) in the poor man's field Yet it adds to the poor man's store. Then, hurrah for the iron blacksmith ! And hurrah for the iron crow!

Miscellaneous.

And whenever we go where his forges glow,

We'll sing what a MAN can do.

Double Headed Girl.

WITNESS-THE GIRL'S HISTORY. A correspondent writes as follows to the New York Evening Post :-

In your notice of a double headed girl on exhibition in Georgia you express doubts as to the truth of the statement contained in the notice you published. One year ago this month I saw this child in St. Louis, Missouri. She is a slave, born in North Carolina. While an infant she was sold for one thousand dollars. At the age of six or seven years she was sold again for five thousand dollars. The owner took the child to England and exhibi-North side of Market Square; a few doors east of ted it to hundreds of thousands in the old world. The present owner bought its mother went to England, and instituted legal pro-ceedings in the name of the mother for the

custody of the child.

The resemblance which the child bore to the mother was so strong that the presiding judge directed it to be given up to the mo-ther, which was done. The late owner then offered to deposit in court fifty thousand dol-lars to the credit of the mother if she would commit the child to him again, and remain BLANKS! BLANKS!!

A new supply of Summons', Executions.

Bonds, Leases, Naturalization papers, Justices and Constables Fee Bills, &c., &c., just printed and for sale at this Office. did by the way of New York. Her owner then asked the mother in what

manner she wished to live, and he would conform to it. She asked for a little cottage and patch of ground where she could raise her The subscriber, now operating the Coal Mountain Colliery.

The subscriber, now operating the Coal Mountain Colliery, at Mt. Carmel, is prepared to furnish all sizes of White Ash Coal from his furnish all sizes of White Ash Coal from his all sizes of White Ash Coal from his furnish all sizes colliery. This is a superior quality of White notwithstanding that the master of this valuwhich he is prepared to furnish able family has offered five hundred dellars to know who is the present owner of these two, no trace can be found of their where-

I never saw a more sprightly child of its age than this wonderful twin child, which in fact is two children in everything but the body. A little below the shoulder blade there is but one spinal column; there are two heads and necks, two hearts and two sets of lungs, four arms and four legs-in short the child is as much two as one. The two heads converse with each other as do the Siamese I wins. They can sing together or separately, and can talk with different persons at the same time. This double creature can run and dance, and appears perfectly happy. It was dressed, when I saw it, in white, with a crown on each head, with long flowing carling hair. The complexion is a dark copper color, with bright full eyes no-ticing all that takes place in their presence. But for fear of emancipation the child would be taken North .- Nearly one hundred dollars a day were received while it was it St. Louis. W. T. C.

PRESENCE OF MIND AND COMMON SENSE. If a man faint away, says Hall's Journal of Health, instead of yelling out like a savage, or running to him to lift him up, lay him at full length on his back, on the floor, loosen the clothing, push the clowd away so as to let the air reach him, and let him alone.— Dashing water over a person in a simple fainting fit is, that the heart fails to send the proper supply of blood to the brain; if the person is erect, that blood has to be thrown up hill; but if lying down, it has to be projected horizontally, which requires less power as is apparent.

If a person swallow poison, deliberately or by chance, instead of breaking out into multitudinous and incoherent exclamations, dis-patch some one for the doctor; meanwhile, run to the kitchen, get half a glass of water in anything that is handy, put into it a teaspoonful of salt, and as much ground mustard stir it an instant, catch a firm hold of the person's nose, the mouth will soon fly openthen down with the mixture, and in a second or two up will come the poison. This will answer better in a large number of eases than any other. If the physician has not arrived make the patient swallow the white of an egg, followed by a cup of strong coffee, (because these nullify a larger number of poisons than any other accessible articles, as antidotes for any poison that remains in the stomach,)
If a limb or other part of the body is severe

ly cut, and the blood comes out by spirts or jerks, be in a hurry, or the man will be dead in five minutes; there is no time to talk about or send for a physician—say nothing, but out with your handkerchief, throw it around the limb, tie the two ends together, put a stick through them, twist it around, tighter and tighter, until the blood ceases to flow. But to stop it does no good. Why? Because only a severed artery throws blood out in jets, and the arteries get their blood from the heart; hence, to stop the flow, the remedy must be applied between the heart and the wounded soot. In other words, where and the wounded spot—in other words, above the wound. If a vein had been severed, the blood would have flowed in a regular stream. and, on the other side of the wound from the heart; because the blood in the veins flows towards the heart, and there is no need of so

HARD PUSHED FOR MONEY -- A letter from The Public Form Monty.—A letter from Vienna says:—"The pawning of jewels is not confined to the Crown diamonds of the State, but the Princesses of the Austrian Court are said to be selecting the Jews. In addition to this, a "beneglolence," as it was called in the middle ages, when the clergy opened their pure-string, is going on is all the wealthy monatteres in Austria."

I AND WARRANTS.—The highest price with her bandkerchief and spoke on more.

A Thrilling Bear Hunting.

"I'll tell you how it was: Ellice was one day out huntin' on that everlastin' big swamp back of Red River, and the day was dark and cloudy, and be lost his way; so down he puts his rifle, and up he climbs a great big dead pine tree, as tall as a factory chimney, to see what course to steer. Well, when he got to the top, and surveyed the country all round, and see'd where he was, just as he turned to descend, he thought he heard a noise in the room, and seeing that it was bollow, what he do but let himself down into it like a sweep, but, as he got near the but, the size of the hollow increased, so he couldn't brace himself no longer, either by his hands or feet, and he slipped right down to the bottom chewallow; and what should he find there but two young cubs. Well, he gave himself up for lost. He knew he couldn't crawl up again; and he knew if the old bear came arrer him, there would be no room to fight be, and he would be chawed up like a piece of baccy. Well, while he was thinkin' the matter over, all at once he heard an awful grunt, and the place grew dismal dark, for the bear was coming down, raving, roaring, distracted mad starn foremost, as bears always do. What does he do, when he sees the fix he was is, but stand below, and, as the bear was about touchin' bottom with her hind legs, he seizes hold of both her thighs with his hands, gives a tremendous, great, long, enduring yell, like a panther, and then seizes the tail in his teeth and bit away like a shark. Up runs the bear as fast as she could, dragging Ellice after her, who when he got to the top, gave another nip and another yell, and then slid down the tree arter the bear, got hold of his gun, and just as he leveled on her, down she dropt dead from fright; so he just skinned ber, made tracks for the fort. Ever since that they called him 'Bear Ellice;' fact, 1 assure

"Why, Peabody," said the zenator, "that's Colonel Crockett's story; why, surely you know better than that." "Well," replied the other, "so I always thought it was the Colonel that performed that are feat, and when I was at the diggins to Frazer's River, I told that story one night as Colonel Crockett's, but there war a Scotchman there, a great, tall, raw-bound critter, as bard as a racer and as lank as a greyhound, and, Scotch like, (for they boast of baving done every clever thing since the flood.) he swore it was their great factor and hunter, Ellice, that did it. I bet twenty dollars with decide, and as there was only seven of us in camp, and five were Scotchmen, they gev it against me, in course, and I paid down the money, and did the thing genteel. Well, plague take the money, I don't care for that, but I am proper glad to bear it was Crockett

REMARKABLE RACE BY RAIL. From L. D. Rucker, superintendent of the

had the facts from John D. Campbell, Esq., superintendent of the M. S. and N. I. R. R. One day last week, as the eastward bound express train reached Laporte, Indiana, a walked back and forth on the platform, and continued to walk until the whistle sounded. The other passengers got on board and the train passed off, but the gentleman still walked on. A few minutes after the train had gone a station man saw the pedestrian, and

going up to him, asked, in a surprised tone:
"What the—are you doing here?"
The man started, opened his eyes, and looked around bewildered. The fact was, he had been fatigued and dropped asleep while walking. Rousing himself he asked: "Why! Where nm I?"

"Where are you? At Laporte."
"Where's the train I came on?" "That left ten minutes ago."

"Ten minutes ago and left me! I must go on that train. It is a question of life and death with me. Can you get me to it?— Have you got an engine here? Where is

The section master had an office near by, and the two went to find that official and to procure an engine. The traveller stated his case-he must go on-could not delay-and offered the officer \$250 if he would put him on board the train. This strange demand and strange offer caused the station master to basten to do what he could. The fire was out in the engine that had drawn the train to that point-the bargain was settled-a draft given New York for the \$250, and in ten minutes the traveller started, with an engine to overtake the flying express. After rushing on for thirty or forty miles some con nection gave away about the engine. The engine was stopped—the engineer found the difficulty, and in a very few minutes had a wooden pin whittled out and fitted to supply the deficiency. With this on they flew.— The train had of course many miles the start of them, and despite the wooden pin the engineer crowded on steam and tore through the country at a feaful rate. Thirty miles of the distance past was ran in 27 minutes, but the engagement was that they should overtake the train, and do it they must, and do it they did, but not until more than one hundred miles had been run, and they were approaching Toledo. Having at length overtaken and stopped the train and hurried on board, the traveller went eagerly to a berth in the sleeping car, and took therefrom a carpet-bag containing \$275,000. His treasure was safenone had molested it, and dismissing his faithful courier, he went on his way rejoicing at the success of his perilous and exciting ad-

A Paris correspondent of the Boston Post says that the Empress Eugenie, as Regent, is said to have given great cause of uneasiness by her behavior at the Council. She broke forth into as opinion of her own which astonished them all. She declared the war to be unjust and wicked, expressed her conviction that it never would come to a prosperous end, and, in the midst of sobs and exclamations betrayed, by sundry appeals and passionate extreaties, immediately to cause the strife to cease, and that all these ideas had been lodged in her beautiful head by no less a management. by no less a personage than the Archbishop of Paris went off into a fit of mild, moist bysterics, and sinking back in her chair cover-ed her face with her bandkerchief and spoke

"THE STRONGEST MAN IN THE WORLD" PROSTRATED.—Prodigious Feats of Strength.
-Dr. George B. Winship attempted to lecture last evening at Mercantile Hall, on "Physical Education." The hall was filled to overflowing, attracted no doubt by the fame

of the lecturer in relation to his prodigious feats of strength, it having been claimed for him that he was the "strengest man in the world." Dr. Winship commenced reading his lecture promptly at eight o'clock, and had proceded but a few moments before his voice began to fail and became weak and tremulous; and before the audience generally were aware of it he dropped directly upon the platform. Several gentlemen rushed to the platform and immediately bore him to the adjoining ante-room, where Dr. Walter Channing and

others attended apon him. It was soon announced that he would go on with the lecture in a few moments. He ap-peared, and after apologising to the audience said it was the first time he had ever fainted. He then proceeded with his lecture, and had read but a few pages when he again became overpowered, retiring just in time to save him-

receive tickets or their money, most of them taking the former. It is said that on being taken from the ball his heart had nearly ceased to beat. Dr. W. accounts for the unfortunate affair on the ground that the atmosphere of the hall was close and impure. His friends however, regard it as caused by the peculiarity of appearing before a public audience for the first time.

Dr. W. has for several years given much attention to the subject of physical education.
He is twenty-five years of age, five feet seven inches in height, and weighs one hundred and forty-three pounds. He graduated at Cambridge five years ago. He can raise a barrel of flour from the floor on to his shoulded; can raise himself with either little finger, till his or more one of our citizens had a bantam ben chin is balf a foot above it, can raise 200 come off with four chickens, and about a week pounds with either little finger, can put up a dumb bell of 141 pounds; exercises daily with two dumb bells weighing 100 pounds each can lift with the hands 926 pounds dead weight, without the aid of straps or belts, of any kind. Tophan, the strongest man of her three chichens and unproductive eggs, England, could raise only 800 pounds in the refused to have anything to do with them Elice, that did it. I bet twenty dollars with same way; and the celebrated Belgian giant and assailed them violently. A new plan him on it, and we left it to the company to could lift only 900. Dr. W. was prepared to was now isid. In the evening after dark the turn which events took prevented it. The bantams put in their places, where they re-

Young Unmarried Italian Ladies .- The idea of a girl in Itally is indissolubly connect-If ever I meet that are great, gaunt Scotch-man again, I'll take the money out of his pocket, or the valy out of his hide; see if who can only be kept from harm and evil by the most incessant watchfulness. A mother's whole maternal duties toward her daughter seem considered in Italy to be compre-hended in the one act vigilance. "My daugh-Cleveland and Toledo Railroad, the Gleve- ter has never been, since she was nise years land Leader obtains the following particulars of age, for more than twenty minutes at a of an exciting race, in which the steeds were time out of my sight," said an Italian countiron horses and the stakes greater than have ess, boastfully,; and by this declaration she struck me in China; the universal smell of rank in the worlds esteem with the mother of ranks of life in Italy is practically a prisoner until she marries. Into society she must not passenger stepped off while the engine was enter, neither in the morning (etc, nor in the being replenished with wood and water, and evening dance, is she permitted to display evening dance, is she permitted to display her charms and graces. An occasional walk with father, or brother, or mother, is permitted; but she must not go outside the house unless accompanied by her nearest kindred. To be seen alone, even but a few yards from her father's door would entail upon her the deepest disgrace and beaviest censure. Kept under a perpetual survenlance, every line she writes and every line she receives are subjected to rigid scrutiny .- Miss Crawford. *****

ANCIENT MINES IN NEBRASKA .- An interesting discovery of ancient mines has been made in Nebraska, about seven miles from Wyoming. They are the most extensive operations of ancient miners ever discovered on the continent. For miles in extent the whole country is literally torn up and thrown into the most fantastic and promiscous ridges hillocks, gutters, trenches, shafts, &c. There are remains of furnaces, chimneys, stone walls and earth houses, fragments of jugs, glass bottles, and many other things too numerous to mention. Rocks have been drilled and blasted evidently with some explosive material, stone dressed with the bammer, and every evidence of the operations having been carried on by civilized men. Old Ualifornia miners who have visited these mines say that it would perhaps cost millions of deliars to do the work that has been done there, and the appearance of the surface is similar to the lacers of California where the miners have o be tested by parties skilled in metallurgy. It is generally thought the metal was gold or silver. The mines are so ancient that there are large oak trees growing upon them. When was this done and by whom?

THE SIN OF DANCING .- The Rev. James Corning, the Presbyterian minister of Buffalo, whose lectures on "The Christian Law of Amusement" have occasioned some comments, is in favor of dancing, at least as it is practiced "on the Highlands of Scotland and the green swards of Switzerland, and the ru-ral districts of Germany." He objects strongly to fashionable suppers and parties, and would seem to speak, in the following passage, not without personal observation : Wby, I have sat beside a professing Christian weman in one of the beautiful parlors of a fashionable metropolitan avenue, whose jeweled neck, and ears and fingers, and dazzling brocade, as much a said to the assembled guests, 'none of your dresses cost as much as mine;' and then I have seen her go into the supper room and eat enough to make a swine have gripes of conscience, and then come out, obese, and panting for breath made marvelously religious by sandwiches and cham-pagne, and wind up the farce with a pious discourse on the sin of dancing. Now, I think that if she had transported a portion of her conscience from her slippers to her stomach, though she might have an inch or two less of phylactery, the loss would have been rous of late. Obristian consistency."

WINE MAKING .- After all that has been accomplished, there is an absurd idea prevalent that wine cannot be profitably raised in this country, that labor is too dear, and European country, that labor is too dear, and European competition too great. On the contrary, wine gross confessed their crime.

HEN MANUEL.—Take care of it; gather it in a barrel; place another barrel in the garden dissolve a portion of the hen manure in a barrel; place another barrel in the garden, dissolve a portion of the hen manure in water, dilute it considerably and use it on wines which can be most easily raised, are, like the contrary, wine gross confessed their crime.

A High Bridge.—The English papers have published some of the details of the plans, not long since submitted by Mr. Char-les Boyd, of Lendon, for uniting England and France by a gigantic tubular bridge across the channel between Dover and Cape Grinez. the nearest points opposite the coasts. In order to afford a passage to vessels of the largest size, the bridge would rest on the side of the ciiffs of Cape Grinez, the French abut-ments being raised one hundred and fifty-three feet higher than the English, to compensate the difference of elevation of the cliffs. The bridge would be supported by one hundred and ninety towers, at a distance of five hundred feet apart, each having a light to guide vessels at night, and an alarm bell for a warning in the fogs. The greatest depth of the channel on the line proposed, is one hundred and eighty six feet. The bridge would have two or more railroads, which is estimated could be traversed in twenty minutes; and it would be so built to admit the light of day-

being lighted at night by gas.
In order to prevent all fear of invasion, the projector proposes that each end of the bridge shall be commanded by a strong battery.— The towers which would be one handred feet self from snother swoon. By the advice of physicians present, he was dissuaded from The towers which would be one hundred feet in diameter, and two hundred and sixty feet attempting to go on with his lecture and it in diameter, and two hundred and sixty feet high, would rest on colossal bases, three hundred and sixty feet square at the bottom, one did not sixty feet square at the bottom, one in diameter, and two hundred and sixty feet With eyes too fond, on the fair form you see, hundred and lifty feet square at the top, rising or leave him to the air and liberty. med of blocks of granite united by iron bars. The elevation of the tops of the towers would thus be three hundred feet above the surface of the water.

Mr. Boyd estimates the utmost possible cost of the bridge at \$30,000,000, but he thinks that it could be built for half that sum, and that the whole cost would be reimbursed to the company in eight years. This project seems to promise much better success that of Mr. Gamond, who proposes to build a tunnel under the channel at a cost of only \$4,000,-

A HEN IN A QUANDARY .- Two months ago since a common hen belonging to him hatched three chickens from her nestful of eggs .-He wished the latter hen to take charge of which he can raise alternately above his head; the young bantams, now fully feathered, with can lift with the hands 926 pounds dead long tails and wings, and about half as large as full grown quails; but biddy still covered exhibit all these feats, but the unexpected eggs were taken from the hen and the young mained until morning. We are told that when the hen discovered the change that had taken place, her conduct was amusing in the extreme. She eyes in a suspicious manner the large chickens, but they were all that re-mained as the production of the large number of eggs which she had the previous evening. and she probably came to the conclusion that she batched them, strange looking creatures as they were for the age of twelve hours, for she finally adopted them, and has since treated them as kindly as she does her own chickens .- Pawtucket Gazette.

A POPULAR LUXURY IN CHINA .- Two things musk in the kingdom of flowers, and the enormous consumption of melon-pips, which are the Gracchi. A girl belonging to the upper | what nut and oranges are to you English, and what clives and pranes are to us Gauls. The scarlet and yellow melons are in some places only grown for the seed, and are piled up by the side of the road for the use of any traveler who will scoop out the seed for the proprietor. On the rivers I have seen whole junks laden with these seeds. In the loneliest place you can procure them, when all other food is scarce. The three hundred millions of Chinese all eat them. When friends meet to up on every dinner table. They are eaten while travelling in the palanquin, they are picked at while discussing bargains. If a workman has a few supecs, he does just what his child would do-buys melon seeds. They are an amusement and a food-as the cigaret is to the Spainard, and the betel-nut to the Hindon .- The Kingdom of Flowers.

A Four Eyen Man .- A new wonder has been discovered in New York, in a person of a man named Karl Saul, who it is asserted, has four eyes! He has one pair in the usual place and another in the back of his A correspondent of the Evening head. Post, who enjoys the acquaintance of the individual, says that "both sets of eyes are perfect, and he sees backwards and forwards at the same, with equal case, comprehending at a glauce everything within the range of his vision either way. The objects which he simultaneously beholds be will describe with wonderful accuracy. Indeed, he is remarkable for his descriptive powers. Mr. Saul is a man of extreme diffidence, and the pecubeen at work. What the mineral was, has liarity of his visual construction has been not yet been fully ascertained, but this is soon | carefully concealed, and has heretofore been known only to some of his most intimate friends. The back or his head is quite flat; but he has long bair, which effectually conceals the large eyes, which are generally protected by a bandage." As, if the above is not wonderful enough, the correspondent of the Post makes the following wonderful statement : "He is highly intelligent and social in his habits, and owns considerable property, which he has accumulated by houest

industry. MeLaughlin, now going on at Chicago, for throwing a train of cars on the Galena and Chicago Railroad off the track, has disclosed a most daring and diabolical gang of villains, both male and lemale. The members of the gang are located at Buffaloe, Cleveland and Chicago, and it seems they are engaged in murders by all sorts of devices, such as poisoning, arson and railroad obstruction. Sev. eral confidential letters between two female friends in Buffalo, and an accomplice in Chicago, disclose the whole matter, and the en-tire plan of operations. From these it ap-pears that a number of persons have fallen victims to their nefarious schemes, and how many have suffered by others' hands can only be conjectured. This discovery may account in some measure, for many of the secret murders by poison ane other means, accidents to railroad trains, &c., that have been so nume-

There were three men banged in Canada yesterday. Moore and Over, the two negroes who murdered the mail-carrier, suffered for their crime at Brautford, and John Mitchell, who killed his wife at Hamilton, C. W., were executed at that place. The two ne-groes confessed their crime.

Poefry.

THE LOST BIRD.

BY WILLIAM CULLEN BRYANT.

Mr bird has flown away, Far out of sight has flown, I know net where. Loo' in your lawn, I pray, Ye maidens, kind and fair, And see if my beloved bird be there.

His eyes are full of light; The eagle of the rock has such an eye; And plumes, exceeding bright, On his smooth temples lie, And sweet his voice and tender as a sigh

Look where the grass is gay With Summer blessoms; happly there he co And search, from spray to spray, The leafy laurel bowers, For well he loves the laurels and the flowers.

Find him, but do not dwell, Nor love his song too well; Send him, at once, to me,

For only from my hand He takes the seed into his gelden beak, And all unwiped shall stand The tears that wet my cheek, Till I have found the wanderer I seek.

My sight is darkened o'er. Whene'er I miss his eyes, that are my day, And, when I hear no more The music of his lay, My soul, in utter sorrow, faints away.
[N. Y. Ledger.

\$10,000 ADDITIONAL PAID TO JOHN A. WASHINGTON

From the Secretary's Report in the "Mount Vernon Record" we observe that another in-stalment of ten thousand dollars has been paid over by Mr. Riggs, the Treasuer, to Mr. Washington. Out of \$200,000 purchase money, only about \$30,000 now remains to be ts proper maintenance and safe guardianship the Regent ascertained from relimble sources that it will require about \$20,000 to restore he grounds and make the repairs necessary the grounds and make the repairs accessed to arrest the rapid decay now going on."—
Therefore, the Regent will not be able to authorize the closing of the last payment until a sufficient sum has been secured to until a sufficient sum has been secured to the instalment, and to meet the responsibilities assumed as soon as the purhase is concluded.

one of these States a beautiful system of organ of the association, the Mount Vernon Record.

Franklin's Scn.

Newburyport Herald says : "As the name of Franklin is prominently drink tea or rice wine, there is always an ac-companiment of melon seeds. They are piled whose chief claim is for the invaluable services he tendered his country in her greatest need, the son was, from the first to the last, a devoted loyalist. Before the revolutionary war he held several civil and military offices but the old gentleman's children learning of importance. At the commencement of the war, he held the office of Governor of New Jersey, which appointment he received in 1775. When the difficulty between the mother country and the colonies was coming | nouncement, and then talks of "cold pizen"

favor of loyalty, and endeavored to prevent the Legislative Assembly of New Jersey from sustaining the proceedings of the General Congress of Philadelphia. These efforts, however, did but little to stay the tide of popular sentiment in favor of resistance is popular sentiment in favor of resistance to ranny, and soon involved him in difficulty. He was deposed from office by the whigs, to give place to William Livingston, and sent prisoner to Connecticut, where he remained wo years in East Windsor, in the house of Captain Ebenezer Grant, where the Theolo-gical Seminary now stands. In 1778 he was schanged, and soon after went to England. There he spent the remainder of his life, receiving a pension from the British govern-ment for his fidelity. He died in 1813, at the age of 82.

As might have been expected, his opposition to the cause of liberty, so dear to the heart of his father, produced an enstrangement between them. For years they had no intercourse—when, in 1784, the son wrote the father. In his reply, Dr. Franklin says: "Nothing has ever hurt me so much, and affected me with such deep sensation, as to find myself deserted, in my old age, by my only son; and not only deserted, but to find him taking up arms against me in a cause STARTING DISCLOSURES.—The trial of John | wherein my good fame, fortune and life were all at stake.

In his will, also he alludes to the part his on had acted. After making some bequests he adds: "The part be acted against me in the late

war, which is public notority, will account for of borar, one drachm of Roman alum, on drachm of camphor, half an ounce of saga deavored to deprive me of."

of borar, one drachm of Roman alum, on drachm of camphor, half an ounce of saga candy and a pound of ox-gall. Mix and stimulation of the sagand repeat the control of the sagand repeat the sagand re

The patriotism of the father stands forth all the brighter when contrasted with the desertion of his son.
