Extract from a communication from Dr. North. f Saratoga Springs, to the Boston Medical and lurgical Journal, dated June the 5th, 1851 : The New Empire Spring is working charm-

agiy for Scrolula. Do the profession know that here are twelve grains of Hydriadate of Seda, r lodine. in a gailon of water - double any other "plug ? There being only a trace of Iron in is water, I send my consumptive patients to hat Spring unbesitatingly, Litherto with most atinfactory results."

Impire Spring, by R. L. Allen, M. D., a Resident Physician, Saratoga Springs.

This fountain has more than answered the xpectations of its friends; as a beverage, our nhabitants who have drank it daily for several cars past, cannot be induced to make a substiute of any other spring. As a cathartic and alterative, my past experi-

nce compels me to say, that in my opinion it iss no superior here or elsewhere. Its exempion from clay, and the small relative quantities d iron which enter its composition, render it one d the best if not the very best mineral water for ommercial purposes; while its ability to with-tand the trying influences of warm climates and en voyages, make it a very desirable water for ottling purposes.

These properties, together with the gentlenauly cure of its present proprietors, have given t a circulation and use abroad which has heratoore been unprecedented in the history of celeirated mineral waters.
