Our own boys have seen hard service since w: have been on the "sacred soil." One day and night on picket, next day working on entrepchments at the Fort, (Ethan Allen.) another on guard, next on murch and so on continually, but the hardest was on picket from last Thursday morning 'till Saturday morning-all the time four miles from camp. and both of the nights the rain poured in torrents, so much so that their clothes were completely saturated with the rain. They stood it nobly-not one complaining; but from the size of their haversacks on their return, it is no wonder they were satisfied and are so eager to go again to morrow. I heard one of them say "there was such nice cabbage, sweet and Irish potatoes, turnips, &c., out where their duty called them, and then there was a likelihood of a Rebel sheep or young porker advancing over our lines and then he could take them as "contraband" and have them for his own use." When they were out they saw about a dozen of the Rebel cavalry and would have had a bout with them, had it not been for an unlucky circumstance-one of the men caught the hammer of his rifle in the strap of his knapsack and caused his gun to fire; the Rebels heard the report and scampered in quick time, much faster than they did at "Falling Waters" when the "Bloody 11th" was after | killing 150 and wounding many.

There was quite an excitement here yes terday; our whole division was called out-all expecting a fight. After supplying the regiments with ammunition the arms were stacked and the men were ordered to hold themselves in readiness, as an attack was were ordered to sleep on their arms and have their ammunition buckled around them ready for action. Coffee was made and provisions cooked for any emergency, but the enemy kept out of danger and we were not molested, however, every precaution is taken and if we get in a fight with them they will with a wrrm reception.

I think it will not be long ere there will be a heavy engagement, if there is one I will write, that is if I don't get "popped," but as you have telegraph and newspaper facilities better than we have I suppose the news would be in the "American" before you could receive a letter from me. NEWS FROM MATTERAS.

FORTRESS MONROE, Oct. 11-The S. R. Spaulding arrived this morning tain that the achievements of the Monticello have disheartened the Rebels, and it is not likely they will try their hand with our boys again very soon. Two hundred shells are by no means a pleasant relish to men who think they are to do "a big thing on Yaukees." The Rebels have lost over two handred men and a General (Barstow), besides several transports. Lieutenant Braine, U. S. N., of the Monticello, showed his skill, as he always does, in throwing shells with such accoracy. The precision with which they were thrown was truly wonderful; one of killed and wounded Rebel soldiers, and of truth.

Our neighbors of the bogus Democra and their friends rejoice at the result of the population, called on Mr. Cameron last late election, as if it was a great victory instead of a very narrow escape from defeat. Their boasted majority of 1000 was reduced to about 100. of the barn the second time : BARN BURNED AGAIN .- We are under the painful necessity of again announcing the outrageous fact that George A. Snyder's new barn was burned down on Thursday evening of this week. Last spring soon after the war proke out and the mob spirit became rife in this place, Mr. Snyder's barn was burned down; subsequently his house was set on fire; after that his bog stable was set on fire; and now his brand new barn, with all its contents of hay, grain, etc., was again burned to the ground. It was covered with \$2000 actual insurance, we believe, but this can never repay all his loss, even aside of all the labor and trouble had all summer in putting up There, fellow citizens, are the fruits of political mobism. *

GERMANS IN THE ARMY .- There are no more true patriots in the world than the Ger. mans. In this country or in Europe they are always ready to battle for freedom. A Gersoon adapts himself to the customs and institutions of this country with an ardor and patriotism as fervid and strong as if he was "to the manor born." The following is given as a very nearly correct statement of the number of Germans in the United States army from the different sections of the country :

New England, 200; New York, 12,000; New Jersey, 2.000; Pennsylvania, 10.000;-Ohio, 5.000; Indiana, 4.000; Illinois, 6.000; Missouri, 13, '00; Minnesota, 900; Wisconsin, 2,000; Michigan, 1,600: lowa, 700; Kansos, California and Oregon, 2,000; Western Virinia, 1.000; Maryland and District of Columbia, 500; Kentucky, 500; Deleware, 100:total, 59,000.

EF The New York Tribune has an able article on the war policy as connected with trator of the incendiarism of Snyder's barn, slavery. We make the following extract in near Selinsgrove, out of which the Selinsgrove regard to the views of the editor of the Times and the Northumberland County Dem- Tribune on this subject. There are many who think that slavery in the rebel States been discovered. The Selinsgrove Times should be abolished, if such a course be of the 4th inst., thus refered to the burning deemed necessary to save the Union. Soch is the opinion of Gen. Cass and other distinguished statesmen :-

"Those who think with us do not ask the Government to turn oside from its great paramount duty of preserving and maintaining the Union in order to abolish Slavery, and we insist that it shall not do so in order to protect and uphold Slavery. Let the Rebels be again proffered a general amnesty if they will lay down their arms and defer to the laws, which are as much theirs as ours; let them be proffered peace on the simple and sufficient basis of mutual deference and obe-dience to the Constitution; but let them at the same time be distinctly notified that, should they persist in their rebellion beyond a day specified, they shall then and thenceforth be held legally negroless-as having forfeited by treason their legal right to bold other human beings in bondage-and they will either succumb, or it will soon be seen that our proffer of emancipation has tied up one of their hands and released one of ours All the world outside of this country see this, and wonder why we persist in fighting in fetters; they cannot imagine why we should he so forbearing toward those who evince no forbearance toward us. THE WONDERS OF THE MICROSCOPE .- WE understand it is through the agency of this marvel viewing machine that Dr. Ayer has at length succeeded in finding the PALUDAL MI ASM and determining its character. Of its effects we in this section have abundant evidence 279 in the FEVER AND AGUE which it alone produ ces when absorbed through the lungs into the blood. It has long been held to be a vapor or something in the vapor of water from decayed and decaying vegetation. Under a great magnifying power, the Doctor has found this vapor to contain distinct organizations or living bodies, corresponding exactly with those found in the blood of Ague subjects. They are 13,000 times less than visible to the naked eye, but have distinct character and form. He thinks they are reproductive in decaying matter or in the blood, and hence their long continued life or the remote effects of them in the system. He maintains that they resemble in character the other fermentative poisons, or such as the virus or rabies of a dead body, &c., all of which are known to reproduce themselves with great rapidity like yeast in moistened flour, so that the slightest quantity impregnates the whole mass. Yeast through a powerful magnifier is seen to be a forest of vegetation which grows, blossoms, and goes to seed in a short time. Missm is not so distinctly vegetable, but has more of the appearance of animal life, although its motions cannot be perfectly distinguished. What the Doctor claims to have settled is that it is an organic substance, and he has further found and embodied in his "Ague Cure" what will destroy it .- Leader, St. Louis, Mo.
