efit of your many readers.

My idea is (and it has been confirmed by several years' observation,) that our fruit trees are encouraged to blossom to a early, and thus when in blossom are liable to be caught by sudden changes of temperature, and are either totally destroyed or materially

I have on the farm two orchards, one the young one above alluded to, and one now mewhat advanced in years, with the trees of full size. Two years ago I reselved to try at experiment which I thought would most effectually prove or disprove my theory. It was simply to cove the ground with some-thing which would retain the frost as late as possible in the spring. But to select the One of my neighbors had a mili and press for the manufacture of molasses from the Chinese sugar cane, and in the winter had a large pile of "begasse," or crushed cane, which he expressed a desire to be well rid of, and the idea at once struck me that this was the very article for my purpose, and I accordingly employed my teams for one day in hauling it, and by evening had quite a stack in my orchard, where it remained until what I considered would be the last cold spell in the spring. I then spread and tramped it under some of the trees, as far from the trunk as the branches extended,

to a depth of from six to eight inches, Most persons will remember that the year 1861 was not "an apple year," and that (at least in our portion of Chester county) there were but few apples. On the five farms which adjoin mine, all of which have good thrifty orchards, there were, with one exception, which I will bereafter notice, in apples, or at least none of any account. In the spring I watched my orchard with some solicitude, for my theory was to have a fair test, and I had so far committed myself to it that I wished it to be carried out by my experiment. As soon as the apples began to form I saw how it was coming out, but held my peace until my third man (an African) came in from his work near the orchard. with his eyes dilated with the importance of the discovery which he had made, and exclaimed, "Boss, them trees you put that stuff from the molasses mill under is full of apples, and the other haven't got any on." Here was disinterested confirmation of the truth of my theory, and I could no longer doubt it. Whether the benefit derived was due to the protection afforded by the sorg-hum stalks, or to some portion of the cane which was washed out by the copious rains. I will leave others to judge; but until con-vinced of the contrary I shall continue to attribute it to the fact that the crushed cane retained the frost in the ground later (for the trees so treated did not blossom for almost a week after those of the same kind not so treated) and thus kept the blossom back until out of danger of frost,

FRESH BLOWN FLOWERS IN WINTER.—
Choose some of the most perfect buds of the flowers you would preserve, such as are latest in blowing and ready to open, cut them off with a pair of scissors, leaving to each, if possible, a piece of the stem about three inches long; cover the end of the stem immediately with scaling wax, and when FRESH BLOWN FLOWERS IN WINTER .immediately with scaling wax, and when the buds are a little shrunk and wrinkled, immediately with scaling wax, and when the buds are a little shrunk and wrinkled, wrap each of them up separately in pieces of paper, perfectly clean and dry, and lock them up in a dry box or drawer; and they will keep without corrupting. In winter, or at any other time, when you would have the flowers blow that the winter of process in the public generally, that he has just returned from the good people of SUNBURY and the public generally, that he has just returned from the city of Philadelphia with the largest and choicest stock of Confectionaries. Fruit and Toys, that has ever been brought to this section of country. He is also manufacturing all kinds of Confectionaries, &c., Among his shock of CONFECTION ARIES may be the flowers blow, take the buds at night and cut off the ends of the stem sealed with wax, and put the buds into water Burned Almonds, wherein a little nitre or salt has been diffus- Crean White ed, and the next day you will have the pleasure of seeing the budspeen and expand themselves, and the flowers display their most lively colors and breathe their agree- Liquerice,

INCREASE OF RATS.-The Farmer's Gazette (English) asserts and proves by figures that Currants, dried, one pair of rats will have progeny and descendants amounting to no less than 681, 050 in three years. Now, unless this immense family can be kept down, they would then consume more food than would sustain 65,000 human beings. It will be far wiser in the farmer to turn his attention to the destruction of rats than small birds. Certainly it will. Whoever engages in shooting small birds is a cruel man; whoever aids in exterminating rats is a benefactor. We should like some of our correspondents to give as the benefit of their experience in successfully driving out these pests. We used something besides dogs, cats and traps for this business,

A LARGE CHEESE.—It is reported that a dairy firm, Messrs. Steele & Bro., owning seven hundred cows, near San Francisco, Cal., made a cheese weighing 1779 pounds, which sold for 25 cents per pound in San Francisco, amounting to the round sum of

Powerful Sirup,-A model certificate is the following: "Dear Doctor-I will be one hundred and seventy-five years old next October. For ninety-four years I have been an invalid unable to move except when stirred with a lever. But a year ago I heard of the Granicular sirup. I bought a bottle, smelt the cork, and found myself a new man. I can now run twelve miles and a half in an hour, and throw nineteen summersets with out stopping.

Educate the whole man-the head, the heart, the body; the head to think, the heart to feel, and the body to act.

The mail service to Nashville is suspended, the railroad company between that place and Louisville refusing to carry them.

The report that Gen. Grant has fallen back north of the Tallahatchee is confirmed. The main body was at Holly Springs several days ago.

Ex-Governor T. H. Hicks has been appointed Senator from Maryland, to fill the vacancy occasion-ed by the unexpired term of Mr. Pearce, deceased. ALMANAC FOR 1863.

THE ATLANTIC MONTHLY. BEGINNING OF A NEW VOLUME.

The number for January, 1863, begins the Eleventh Volume of the Atlantic Monthly, FAROM the commencement, in 1857, the Atlant has rapidly increased in circulation, and it is FROM the commencement, in 1857, the Atlantic has rapidly increased in circulation, and it now has the largest class of readers since its beginning, five years ago. Its prosperity steadily asgments, and it continues, amid all the fluctuations and dangers incident to our national crisis, to gain ground in the estimation of the public. At a time so pregnant with events which touch the future destines of America in every vital particular, the Publishers and Editors do not deem it necessary to promise that its pages will never swerve for the honest paths of loyal patriotism and universal freedom. Its opinions have always been on the side of Liberty, Progress and Right, and the course it first adopted in its early career, will ever be faithfully maintained!

The Staff of Writers, regularly contributing to the Atlantic Monthly, subtraces all the best known an-Atlantic Monthly, embraces all the best known au-thors in American literature, and warrants the Publishers in promising to its readers,

To Consumptives. TillE Advertiser, having been restored to health in a few weeks, by a very simple remody, after having suffered several years with a severe lung affection, and that drend disease. Consumption—is anxious to make known to his fellow-suffers the means of cure.

To all who desire it, he will send a copy of the rescription used (free of charge), with the directions prescription used (free of charge), with the directions for proparing and using the same, which they will find a Structure for Constitution and Astraca. Reconstruction, Ac. The only object of the Advertiser in sending the Prescription is to benefit the afflicted, and agreed information which he conceives to be invaluable, and he hopes every sufferer will try his remedy, so it will cost thom nothing, and may prove a bluming.

Parties wishing the prescription will please ad-Nov. 1, 1862.—Sm Kings County, New York. BLANK (Parchment Paper.) Deeds and blank Mortgages, Bonds, Executions, Sammons, &s for sale at the office of the "Sunbury American"

HAVE YOU A COUGH? Then use JAYNE'S EXPECTORANT. Do not allow your cold to take its own course. Two thirds of the victims of consumption owe their afflictions to the fatal mistake of "waiting for a cough to get well of itself." Do not fall into this error, but avail yourself at once of a remedy which thirty years' experience has demonstrated is certain to procure a specific case.

HAVE YOU ASTHMA OR PHTHISIS. Then use JAYNE'S EXPECTORANT, which will overcome the sparmodic contraction of the wfr tubes, and cause them to eject the mucroan or matte which clogs them up, and by an easy and free expe-toration remove all difficulty of breathing.

HAVE YOU BRONCHITIS!

Then use JAYNE'S EXPECTORANT. This wide Then use JAINESEXPECTORANT. This wide-spread discuss which may generally be described as an inflamation of the fine skin which lines the luside of the wind tubes or air vessels, spreading through every part of the lungs, is often taken for consump-tion. The Expectorant subdues this inflamation, relieves the attending cough, pain, and difficulty of breathing, and if the case is not of too long standing, will certainly produce a cure.

HAVE YOU CONSUMPTION? Then use JAYNE'S EXPECTORANN. It cleanses the lungs from all irritating matters, while at the same time it heels and invigorates them. Of all the remedies which have been offered to the public for this dread disease, none have stood the test of time or maintained so universal # popularity as this Expectorant. Thousands who have been given up by their physicians as incurable have been restored to perfect health by its use, and their testimony must carry emoviation to all who read it. goviction to all who read it.

HAVE YOU PLEURISY? Then use JAYNE'S EXPECTORANT. By taking taking two or three large dones in the early stage of the disease in quick succession, and covering up warnly in hed, this preparation acts as a sudorific or sweating medicine, and subdues the inflamation at the

HAVE YOU WHOOPING-COUGH. HAVE YOU WHOOPING-COUGH.

Then use JANNE'S EXPECTORANT. There is no remedy which so effectually overcomes this disease is the Expectorant. What purent can witness the sufferings of her children from this distressing complaint without doing all in her power for their relief? What medicine so pleasant to the taste, or so certain to produce immediate benefit? Give it a trial, and let it prove its efficacy.

HAVE YOU CROUP?

HAVE YOU CROUP? Then use JAYNE'S EXPECTORANT. Children are subject to no disease more sudden in its attacks, or, in the absence of prompt relief, none more fatal in its results than Croup. Parents, therefore, should keep at hand a remedy sure and tharough. Such a remedy may be found in the Expectorant, and every careful mother will keep a supply by her. JAYNE'S EXPECTORANT

Is a standard medicine. For thirty years it has been before the public, and during this period/its curative powers have been testified to by all classes of people in all quarters of the world. Physicians, elergymen, lawyers, merchants, and mechanics have experienced its remedial effects, and have furnished us with their testiment, and it may be found at length in our THE subscriber respectfully informs his old friends and the public generally that he has commenced the public generally that he has commenced. FINKLE & LYON SEWING MACHINE CO-, 538 BROADWAY, NEW YORK. Descriptive Circulars, with Samples of Work, will be sent Mail Free.

OUR "FAMILY SEWING MACHINE," AVING attained a well established and flattering reputation, as being of all machines yet introduced, the one best adapted to ALL KINDS OF FAMILY SEWING, and having met with a success in its sale beyond our greatest anticipation, so much so, that for three months our orders have been ahead of our capacity to supply, we would now announce that we have increased our manufacturing facilities, so that from this time forth, we shall be enabled to supply orders on demand.

from this time forth, we shall be enabled to supply orders on demand.

In the changes brought about by the war, no one thing has played a more important part than the "SEWING MACHINE." Without it three-fourths of our soldiers would to-day be clothed in anything but "Military Costume." All over the land army clothing has been the work required of our patriotic women, and nobly have they responded. Not content to make only so many garments as their hands could accomplish, they have called the "Sewing Machine" to their aid, and by it have rolled out the soldiers' Coars, Pan'rs and Shirts, at a rate astonishing to themselves. Knowing that this work could not long continue, many thoughtful, prudent housewives, were careful to select the unchine of all others, which would do the heavy army work, and when done with would do the heavy army work, and when done with that, then to be used as their FAMILY MACHINE, and in selecting one of the

"FINKLE & LYON SEWING MACRINE COMPANY'S FAMILY MACHINES,"

PAMILY MACHINES,"
with which you may sew from the finest cambric to
the heaviest cloth, without change of feed, needle, or
tension—they have not been disappointed.
Thus having developed the adaptability of our
machine for all kinds of work, we have made another
step in advance, and by several important changes in
our "No. 3 Mentum Machines," have produced a
"Tailoriso Machine," which we confidently claim
to be the "BEST TAILORING MACHINE" yet
introduced, sewing the coarset lines thread with as introduced, sewing the coarsest linen thread with as much ease as the common cotton—and when required may be used to do the very finest cambric work, with 150 or 200 cotton—thus combining in one compact form, every quality required in either a FAMILY OR MANUFACTURING MACHINE.

OR MANUFACTURING MACHINE.

We have had our Machines before the public long enough to establish their reputation. Dozens of others who started with flying colors "have fallen by the wayside;" and "soon the places that knew them will know them no more." Step by step has the PINKLE & LYON MACHINE won its way to public favor; its success is established, and henceforth our aim shall be, as it has in the past been, to still further improve, simplify and reduce the cost of our towimprove, simplify and reduce the cost of our ran-chines. We shall, in a few days, issue a new price list. For further particulars address, FINKLE & LYON SEWING MACHINE CO.,

MILL. THE subsgribers having taken possession of this first class PLOURING MILL, are prepared to receive grain of all kinds, and to do custom work at the shortest notice. Customers will have their grists ground immediately upon their being left at the Mill. As it is the intention of the firm to stock the Mill, a large supply of grain will be constantly kept on hand, and flour by the quantity can always be obtained. The greatest care will be taken to turn out a superior quality of flour, for which the mill is admirably adapted. Strict attention will be paid to the wants of customers, and the patronage of the public generally is respectfully requested.

Sunbury, June 23, 1800. MORGAN & CO.

VINELAND. TO ALL WANTING FARMS. New Settlement of Vineland.

A REMEDY FOR HARD TIMES A Bare opportunity in the Best Market, and most Delightful and Healthful Climate in the Union. Only Thirty Miles South of Philadelphia, on a Railroad; being a rich, heavy soil, and highly productive wheat land; amongst the best in the Garden State of New Jersey.

It consists of 26,600 acres of 6000 land, divided into Farms of different sizes to suit the purchaser—from 20 acres and upwards—and is sold at the rate of \$15.16.300 per sore for the form land, heavelle one. \$15 to \$20 per acre for the farm land, payable one-fourth cash, and the belance by quarter-yearly instal-ments, with legal interest, within the term of four

Is, in great part, a Rich Clay Loam, sultable for Wheat, Grass and Potatoes—also a dark and rich sandy loam, suitable for Corn, Sweet Potatoes, Tobacco, all kinds of vegetables and root crops, and the finest varieties of fruit such as Grapes, Peaches, Pears, Apricots, Nectarines, Blackberries, Melons, and other fruits, best adapted to the Philadelphia and New York markets. In respect to the soil and srops there can be no mistake, as visitors can examine both, and none are expected to buy before so doing, and finding these statements correct—muler these circumstances, unless these statements were correct, there would be no use in their being made. It is considered

THE BEST FRUIT SOIL IN THE UNION.

The Best Freit Soil in the Union.

[See Reports of Solon Robinson, Esq., of the New Tork Trebene, and the well-known agriculturist, William Parry, of Cinnaminson, New Jersey, which will be furnished inquirers.]

THE MARKET.

By looking over the map the reader will perceive that it enjoys the best market in the Union, and has direct communication with New York and Philadelphia twice a day, being only thirty-two miles from the latter. Produce in this market brings double the price that it does in locations distant from the cities. In this location it can be put into market the same morning it is gathered, and for what the farmer sells he gets the highest price; whilst groceries and other articles he purchases, he gets at the lowest price. In the West, what he sells brings him a pittance, but for what he buys he pays two prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has school for his children, divine service, and all the advantages of civilization, and he is near a large city.

THE CLIMATE

THE CLIMATE

na dean more than makewage ina improving it, and when it is done it is a cortain independence and no loss. A few acres in fruit tree will insure a comfortable living. The land is put down to hard time prices, and all improvements can be made at a cheaper rate than any other time.

The whole tract, with six miles front on the Railroad, is being laid out with fine and spacious avenues, with a town in the centre—five acre lots in the town sell at from \$150 to \$200; two and a half acre lots, at \$50 to \$120 to \$200; two and a half acre lots, at from \$85 to \$120, and town lots 50 feet front by 150 feet deep, at \$100—payable one half cash and the balance within a year. It is only upon farms of twenty acres or more that four years time is given.

To Manufacturers, the town affords a fine opening of the Shoe manufacturing business, and other articles, being near Philadelphia, and the surrounding country has a large population, which affords a good market.

This settlement, in the course of several years, will be one of the most bauttful places in the country,

This settlement, in the course of several years, will be one of the most basutiful places in the country, and most agreeable for a residence.

It is intended to make a Vine and Fruit growing country, as this culture is the most profitable and the best adapted to market. Every accountings and convenience for settlers will be introduced, and will insure the prosperity of the place. The hard times throughout the country will be an advantage to the settlement, as it compels people to resort to agriculture for a living.

ture for a living.

REPORT OF SOLON ROBINSON, OF THE NEW YORK TRIBUNE, UPON THE VINELAND SETTLEMENT. To The following is an extract from the report of Solin Robinson, Eq. , published in the New York Tribune, in reference to Vinciand. All persons can read this report with interest:

Advantages of Farming user home-Vineland-Remarks upon Mort-Soil, it's great Fertility-The Cause of Pertility-Amount of Crops Produced-Practical Evidence It is certainly one of the most extensive fertila tracis, in an almost level position, and suitable condition for pleasant farming that we know of this side of the western prairies. We found some of the oldest farms apparently just as profitably productive as when first cleared of forest fifty or a hundred years

ago.

The geologist would soon discover the cause of this continued fartiflity. The whole country is a marin deposit, and all through the soil we found evidence of calcareous substances, generally in the form of indurated calcareous marl, showing many distinctions of ancient shells, of the tertiary formation; and this marly substance is scattered all through the soil in a very communited form, and in the exact condi-tion most ensity assimilated by such plants as the farmer desires to cultivate.

Mart, in all its forms, has been used to fertilizerops in England, from the time it was occupied by the Romans; and in France and Germany a mart be is counted on as a valuable hed of namure, that ca

be dug and carried and spread over the field. Hos much more valuable, then, it must be, when foun already mixed through the soil, where new particle will be turned up and exposed, and transformed t the owner's use every time he stirs the earth.

Having then satisfied our minds of the cause, the will not be excited with wonder at seeing indubitable evidence of fertility in a soil which in other situations, having the same general characteristics or a

zation.

A few words about the quality and value of th land for cultivation, of which we have some stro our first visit was to William D. Wilson. Frankli township, Gloneester county, who purchased son eight miles north of Millville, about three years ag for the purpose of combilebring a sterm mill, to wer up the timber into lumber, to seed off by the per railroad, as well as the firewood and coal, for which he built a branch track a mile and a laff long. It also furnished sixteen miles of the road with thes, as has no doubt made the mill profitable, though h her no doubt made the mill prefitable, though he main object was to open a farm, having become covered that the soil was valuable for entitivation? I this he has not been disappointed, as some of herops prove. For instance, her year, the second in of eropping, 200 bushels of jedwices on one are, wer 60 cents a bushel in the field. This year, sevarance without manure, produced 556 bushels of cuts, one field, the first crop was pointees, planted amounter roots, and yielded 75 bushels. The posterows dur and wheat sown, and yielded 19 bushels; at

The fertilizers applied to these crops were, first shes from clearings; second, 225 paunds of super-phosphate of lime; third, 200 pounds Poruvian guano; then 50 bushels of slaked lime has been spread upon the clover since it was mowed, and turned in for wheat.

spiral upon the cover since it was howed, and turned in for wheat.

Mr. Wilson's growing crops, and the wheat stubble of the present season, all indicate his land as productive as any part of the State.

At Mary Barrow's, an old style Jersey woman former, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to inquire of the hiped man how it was produced. We found that the fand had been the year but one before in which, sown with clover, and this cut one season, and last spring plowed once, with one "poor old nug," and planted with corn. "Yes, but you manured high, we suppose?" we said interrogatively, and got this reply:—
"Waal, you see, we couldn't adone that; cause we hadn't but forty one-hoste leads altogether, for 23 acres, and we wanted the most on't for the struck."

The truck consisted of beets, carrots, cabbage, cu-combers melons, &c., and a very productive patch of Lima beans, grown for marketing. So we were satisfied that the soil was not infertile, even unaided by clover, which had fed the corn, because the "truck patch" had not been clovered, and had been in cultivation long enough to obliterate all signs of the Our next visit was to the farm of Audrew Sharp. Our next visit was to the farm of Andrew Sharp, five miles north of Miliville, from half to a mile east of the railroad, and just about in the centre of Vine-iand. Mr. Sharp commenced work here in December, 1858, upon 270 seres. In less than three years, he has got 234 acres cleared and in crops this season, all well enclosed and divided into several fields, with order rail or pole fence; has built a two story dwelling, about 36 by 40 feet, and a smaller house for farm laborers, and a stable and granary and some other out-buildings.

Considerable part of the land was cleared for the plow at \$9 an acre, and on some of it the first crop

Considerable part of the land was cleared for the plow at \$9 an acre, and on some of it the first crop was backwheat, lined with 50 bushels in powder per acre. This crop may be put in July 4th, to 20th, and yields 20 to 30 bushels per acre, harvestad is November; when the land being sowed with 150 ths. of Peruvian guano and seeded with rye, yielded 12 to 15 bushels per acre and \$10 worth of straw. There stubble turned, after knocking off a large growth of oak sprouts, and dressed again with guano and seeded to wheat, gave 15 or 16 bushels. The crop which he was threshing while we were there premised more of a very plump grain, and the straw is very heavy We went over the stubble and found the clover and timothy, from seed sowed last spring, on the wheat, we went over the stubble and found the clover and timothy, from seed sowed lastspring, on the wheat, without harrowing, looking as well as we over saw it upon any old cultivated farm, and with a little work done in the winter to slear off some roots and rotten stumps, and setting stakes to mark permanent ones, he will be able to cut the crop the next year with a mowing machine, and we will guarantee two toms per acre. If he will give the overplus if it overruns the estimate.

estimate.

Part of the land was planted with potatoes for a first crop, which yielded 120 bushels per acre. It was then limed with 50 bushels per acre, and seeded with wheat and clover, yielding an average of over 15 bushels per acre, and the clover new tooks beauti-

THE CLIMATE

Is delightful; the winters being aslubrious and open, which the summers are no warmer than in the North of the location is upon the line of latitude with northern Virginia.

Persons wanting a change of climate for health, would be much benefitted in Vincland. The mildiness of the climate and its bracing influence, makes it excellent for all pulmonary affections, dyspepsia, or general debility. Visitors will notice a difference in a few days. Chilis and fevers are unknown.

CONVENIENCIES AT HAND.

Building material is plenty. Fish and Oysters are plentiful and cheap.

Visitors must expect, however, to see a new place. WHY THE PROPERTY HAS NOT BEEN SETTILED BEFORE.

This question the reader naturally asks. It is because it has been held in large tracts by families not disposed to sell, and being without railroad has initiated because it has been held in large tracts by families not disposed to sell, and being without railroad has initiated being without railroad has initiated being without railroad has initiated being the property this senson, for the first time.

Visitors are shown over the land in a carriage, free of expense, and afforded time and opportunity for the respective of the country of the property this senson, for the first time.
