### AGRICULTURAL.

FLAX CULTURE.-From all parts of the Union we see the statement that the farmers intend to pay more than usual attention this year to the cultivation of flax. The high price of cotton and woolen fabrics are leading the people to talk of the older style of domestic manufacture; and the brake and the swingle, and the hatchel and wheel will be heard on many farms and in many houses where such sounds have for many years been silent.

#### Planting Cuttings.

We are constantly hearing people say that they have no tuck in making grape or other cuttings grow—just as if "luck" had anything to do with it. They fail in not giving due attention to the matter; in other words, the cause is neglect and indifference. The old adage should never be forgotten. apply it wheresoever we may-"A that is worth doing at all is worth doing

There should be properly three eyes to every cutting then dig a trench-set the cuttings at an angle of 45 degrees, (at least six inches apart) so that the apper eye shall be an inch above the ground—and press the earth around the wood firmly with the foot. It is well to mulch them with grass or straw, and if need be water them ocensionally in the dryest weather.

Some varieties of the grape are propagated much more freely than others. For instance the Concord, Maxatawny, Isabella, Hartford Prolific, Telegraph, Clinton, Cassiday, &c. take root readity; white the Delaware and Diana are difficult to propagate in open culture unless great care is paid to them, and a good portion of wood is used. We believe all the raspberry family can be propagated in the same way. We have

the Catawissa, many of them in leaf! The mulberry can be grown in the same way. We all know how easily currents and gooseberries are thus grown. We have had both the latter to bear the year after setting out. Currents and gooseberries should be set out just where they are wished to stand permanently. -- If you prefer a tree, cut out all the eyes be neath the surface of the ground; if a bush, let the eyes remain. These cuttings ought to be planted at least eight inches deep, and the earth pressed firmly around

A large proportion of flouring shrubs can also be propagated by cuttings-and this should be known by all who have "luck" in multiplying their stock in this way .- Germantou a Telegraph. \*\*\*\*

TURKEY RAISING.—First, I never allow a turkey to set until about the Middle of They will commence to lay early in April, but I take their eggs away as fast as laid, and keep them until they lay their second batch, which will be finished about the second or third week in May. I then give her some eighteen or twenty eggs and let her set. Along the middle of June she will be off. I then put her and her young on an old barn floor, or other LARGE STOCK of well Selected ontbuilding that is dry, and feed on curd and on cracked corn. Curd is the best for a continual feed when the farmer has plenty, but cracked corn or coarse meal mixed with lobbered milk, will answer just as well. After they have been in-cloors for two

or three days, or long enough to get fairly on their lega-for the turkey is the weakest of all fowls when yet young-I let them out providing the weather is fine and there is no dew on the grass.

The great reason why people cannot or do not raise turkeys, is because they turn them out as soon as batched, and about the

first wetting they get they keel over and fore, you must keep them dry until at least ten weeks old, when they will stand about as much water as any fowls, geese and ducks excepted. Of course they must be driven in every night, and on all occasions when a storm is threatening.

EXCELLENT WHITEWASH .-- As the house be the best that can be used :-- White chalk is the best substitute for lime as a white wash. A very fine and brilliant white lows: wash preparation of chalk is called "Paris" White" This we buy at the paint stores for three cents a pound, retail. For each six-teen pounds of Paris White, we procure teen pounds of Paris White, we procure bull a pound of the white transparent glus, costing twenty-five cents (fifty cents a pound.) The sixteen pounds of Paris White is about as much as a person will use in a truth their God has made of one blood all nations of is about as much as a person will use in a day. It is prepared as follows:—The glue is covered with cold water at night and in the morning is carefully heated, without scorching, until dissolved. The Paris White is stirred in with hot water enough to give it the proper milky consistency for applying to the walls, and the dissolved give is then added and thoroughly mixed, it is then applied with a brush like the common lime whitewash. Except on very dark and smoky walls and ceilings, a single coar is sufficient. It is nearly equal in brilliancy smoky walls and ceilings, a single coat is sufficient. It is nearly equal in brilliancy to "zinc white," a far more expensive article .- [We find the above printed anonymously, and give it a place because it looks as if there was something in it.

BLISTERED HANDS AND FREE.--As a remedy against blistering of hands in rowing or fishing, &c., or of feet in walking, the quickest is, lighting a tallow condle and letting the tallow drop into cold water, (to purify it, it is said, from sait,) then rubbing the tallow on the hands or feet -mixed with brandy or any other strong spirits. For mere tenderness, nothing better than the above, or vinegar a little diluted with water.

> S.La. vative.

### JUST OPENED!

E. Y. BRIGHT & SON, I NVITE the early attention of cash pur chasers to their choice, varied and exten sive assortment of FRESH WINTER GOODS which they offer at reasonable

prices. LEMON SYRUP Currents, dried,

of a superior quality, by the single or dozen. A superior quality of Tobacco and Segars, and a variety of Confectionaries, Fruit, Toys, &c., all of which is offered cheap at wholesale and retail. 

Sunbury, April 14, 1861 .- 1y THE ATLANTIC MONTHELY.

BEGINNING OF A NEW VOLUME. BEGINNING OF A NEW VOLUME.

The number for January, 1803, begins the Eleventh Volume of the Atlantic Monthly.

PROM the commencement, in 1857, the Atlantic has rapidly increased in circulation, and it now has the largest class of renders since its beginning, five years ago. Its prosperily steadily augments, and it continues, such all the fluctuations and deagers lacident to our national crisis, to gain ground in the estimation of the public. At a time so pregnant with events which touch the future destiness of America in every vital particular, the Publishers and Editors do not deem it necessary to promise that its ien in every vital particular, the Publishers and Editors do not deem it necessary to promise that its pages will never sworve for the honest paths of loyal patriotism and universal freedom. Its opinions have always been on the side of Liberty, Progress and Hight, and the course it first adopted in its enrig career, will ever be faithfully maintained.

The Staff of Writers, regularly contributing to the Affantic Monthly, cubraces all the best known authors in American literature, and warrants the Publishers in promising to its readers,

THE BEST STORIES, THE BEST POEMS, Which American talent can furnish. LIST OF REGULAR CONTRIBUTORS. In Prose and Poetry the "Atlantie" Stoff of Writers is an equalled. The following authors are still among the regular contributors:—

James Russell Lewell, Henry W. Longfellow, John G. Whittier, Louis Agassis, E. P. Whippie, Louis Agussiz, Ralph Waldo Emerson, Nathaniel Hawthorue, C. C. Hazewell, T. W. Higginson, Bayard Taylor, Charles E. Norton, George S. Hillard, Henry Giles, Walter Mitchell. Author "Margret Howth,"
Mrs. Julia W. Howe, I
Mrs. A. D. T. Whitney, J.
Mrs. H. B. Stowe, II
Charles Reade, a, Walter Mitchell.
Henry T. Tuckerman,
John Weiss,
Harriet Martineau,
"The Country Parson,"
Harriet E. Prescott, Rose Terry. Robert T. Lowell,

The foregoing list of Contributors includes. Ly The Leading Writers of America A TRUMS .- The Atlantic is for sale by all Book and TRIMS.—The Atlantic is for sale by all Book and Periodical Dealers. Price 25 cents a number. Subscriptions for the year, \$3.05, postage paid. Yearly subscriptions received, or single numbers supplied by any dealer, or by the publishers.

Specimen numbers sent gratis on application to the Publishers.

Inducements for subscribing. Lists of premiums, &c., furnished on application to the Publishers.

BRADY HOUSE.

RECEIVED!! A NEW AND USEFUL ARTICLE. HALEY, MORSE & BOYDEN'S

Patent Self-Adjusting Clothes Wringer Simple, Economical, Durable, and is not Liable to

get out of Order. The Self-Adjusting Clothes Wringer, is one of the greatest improvement of the nineteenth century, and has only to be known and tried, to come into general use. The saving of clothes, in pressing out the water between two rubber rolls, instead of wringing or twisting, will amount to enough in a chort time, to pay for a machine.

Every one is aware, that the twisting or wringing

Every one is aware, that the fibres; but this

Every one is aware, that the twisting or wringing of clothes, stretches and breaks the fibres; but this machine presses them so evenly, that a newspaper thoroughly sonked, can be wrung, without breaking it in the least, and it works so easily, that a child twelve years old can operate it without trouble. Het water does not injure the relis, and woollen goods can be wrung out of boiling water to prevent fulling, which cannot be done by hand.

In Starching, it is invaluable, especially on large articles, such as Ludies Skirts, &c., as it leaves the starch in the clothes perfectly even. It will wring the largest bed quilt or the smallest pocket handkerchief, drier than can possibly be done by hand, without alteration in less than one-eight the time. The machine is so simple that it is not liable to get out of repair.

out of repair.

The great improvement in this, every every other Wringing Machine yet invented is, its Self-Adjusting arrangement, requiring no alteration, to wring a handkerchief or bed quilt consequently, the most ignorant servant can ederate it.

The machine is made of wood, and so arranged, that so, transcent residit comes in contest with the

that re iron can possibly come in contact with the clothes, thereby avoiding all danger of injury to the clothes, thereby avoiding all danger of injury to the clothes, by iron rust.

This is the most simple and effective Clothes Wring-or yet invented. Those purchasing can use them two weeks, and if they are not perfectly satisfied, return them, and their menoy will be refunded.

Il reputation, as being of all machines yet intro-duced, the one best adapted to ALL KINSS OF PANLY. Strains, and having note with a success in bis sale beyond our greatest anticipation, so much so, that for three months our orders have been alread of our capacity to supply, we would now anomance that we have increased our manufacturing buildies, so that from this time forth, we shall be analysed to rapply orders on demand. orders on demand.

orders on demand.

In the changes brought about by the war, no one thing has played a more important part than the "Sewiss Macriss." Without it three-fourths of our soldiers would to-day be elethed in snything but "Military Costume." All over the land army clothing has been the work required of our patriolic women, and nobly have they responded. Not content to make only so many garments as their hands could be complish, they have called the "Sowing Machine" to their and and by it have relied out the soldiers' Coars. Paxts and Shiers, et a rate as onishing to themselves. Knowing that the work could not long continue, many thoughtful, eg., tent housevires, were continue, many thoughtful, papter beasavires were careful to select the machine of all others, which would do the heavy army work, and when done with that, then to be used as their Paully Macrise, and in selecting one of the "FINELE & LYON SERING MACHINE COMPANY'S

with which you may see from the finest cambris to the heaviest closh, without change of fred meetle, or tension—they have not been disappointed.

Thus having developed the adaptability of our machine for all kinds of work, we have made another step in advance, and by several important changes in our "No. 5 Mapters Macriness." have produced a "Tattoning Macrines." which we confidently claim our "No. 3 Medium Machines." have presh "Tathoning Machine," which we confidently to be the "BEST TAILORING MACHINE may be used to do the very finest extratate work, with 150 or 200 cotton—thus combaning in one compact form, every quality required in either a FAMILY OR MANUFACTURING MACHINE.

We have had our Machines before the public long crough to establish their reputation. Poscus of others who started with flying colors, have faltien by the wayside; and "soon the places that knew them will know them so more. Step by step has the Firstler & Livon Machines wen he way to public favor; its success is established, and honestorth our aim shall be, as it has in the past been, to still further improve, simplify and reduce the cast of our machines. We shall, in a few days, bear a new price list. For further particulars address.
