The walely renowned S. S. STEVENS, M. D., of Wentworth, K. H., writes:

In all cases where a gargative remedy is required, I confidently recommend these Pills to the public, as superior to any other I have ever found. They are sure in their operation, and perfectly safe—qualifies which make them an invaluable article for public use. We have had our Machines before the public long enough to establish their reputation. Descens of others who started with flying colors -have fallen by the wayside; and "soon the places that knew them will know them no more." Step by step has the Finkle & Liyon Machine won its way to public favor; its success is established, and henceforth our aim shall be, as it has in the past been, to still further improve, simplify and residues the cost of our machines. We shall, in a few days, issue a new price list. For further particulars address.

"Dr. J. C. Aven — Dear Sir: I have been afflicted from my bailt with screenia in its worst form, and now, after twenty years' trial, and an untoid of amount of suffering, have been completely cured in a few weeks by your Pills. With what feelings of rejoicing I write can only be imagined when you realize what I have suffered, and how long.

"Never until now have I been free from this loathsome disease in some shape. At times it attacked my eyes, and made me almost blind, besides the unendurable pain; at others it settled in the scalp of my head, and destroved my hair, and has kept me partly hald all my days; semetimes it came out in my face, and kept it for months a raw sore.

"Alsont mase weeks ago I commenced tasking your Cathartic Fills, and mow am entirely tree from the complaint. My eyes are well, my skin is fair, and my hair has commenced a healthy growth; all of which makes me feel already a new person.

The Self-Adjusting Clothes Wringer, is one of the greatest improvement of the mineteenth century, and has only to be known and tried, to come into general use. The saving of clothes, in pressing out the water between two rubber rolls, instead of wringing or twisting, will amount to enough in a short time, to pay for a machine.

Every one is aware, that the twisting or wringing of clothes, stretches and breaks the fibres; but this machine.

of clothes, stretches and breaks the fibres; but this machine preses them so evenly, that a newspaper thoroughly soaked, can be wrung, without breaking it in the least, and it works so easily, that a child twelve years old can operate it without trouble. Het water does not injure the rolls and woollen goods can be wrung out of beiling water to prevent fulling; which cannot be done by hand.

In Starching, it is invaluable, especially on large articles, such as Ladies' Skirts, &c., as it leaves the starch in the clothes perfectly even. It will wring the largest bed quilt or the smallest pocket handkerchief, drier than can possibly be done by hand, without alteration in less than one-eight the time. The machine is so simple that it is not liable to get out of repair.

The machine is so simple that it is not liable to get out of repair.

The great improvement in this, every every other Wringing Machine yet invented, is, its Self-Adjusting strangement, requiring no alternation, to wring a handkerchief or bed quilt consequently, the most ignorant servant can oderate it.

The machine is made of wood, and so arranged, that no iron can possibly come in contact with the clothes, thereby avoiding all danger of injury to the clothes, by iron rust.
