

AGRICULTURAL.

The Fodder Sweet Corn. The readers of the Telegraph will not doubt remember that we long ago advocated the sowing of sweet corn for feeding green to cattle in August and September, being convinced that it made a much better feed than the common corn of the farm.

"Mr. Spear, the occupant of the Welles Farm, in Dorchester, considers the fodder sweet corn very valuable. He stated, that in feeding his cows last winter on the fodder of sweet corn, the supply became temporarily exhausted, and instead of the fodder a full supply of the best hay was given, the keeping in other respects being the same that it was before; but the quantity of milk decreased considerably, till by removing some hay another supply of confodder was reached, and on returning to it, the cows soon gave the former quantity of milk. This was the dried stalks from the green corn."

"He planted three-fourths of an acre of sweet corn, in the latter part of May, dropping the seed with a corn planter, in rows three feet apart, and in the drills about two feet apart. The cultivation was done with a cultivator, sixty barrels of corn were sent to Boston from the lot, and on the 15th of September the crop was cut close to the ground and shocked—the stalks being quite green, as the variety was late. It remained on the field till about the middle of November, when it was housed. Mr. N. states that he has fed the fodder to a cow and to his horses, which eat it with evident relish, and without the least waste, although the stalks were not cut. He is so well convinced of the value of fodder of sweet corn, that he intends to plant a large acre in the future to keep his horses through the winter."

Timely Hint. When the fruit of your Strawberry beds is swelling, they should be plentifully watered in the absence of rain, and a thorough shower effect upon the perfectness and size of the berry.

Rub of all the sprouts upon the stocks which you have set with grafts this week. It will not push along the growth of the scion—Not infrequently grafts, after they have started, will not grow, or will sap to sustain them from the parent stem.

The trees transplanted this spring should now be mulched. For this purpose grass is as good as anything. Don't put around the tree too much at a time, and repeat the mulch when it gets dry. In removing the mulch once or twice during the summer and stir up the ground well; then replace it. It will save many a tree, if the season should be hot and dry, which we think it will be.

Your Raspberry and Blackberry beds should also be well mulched. Any quantity of dry stuff about a place, especially leaves, is excellent. An application of the contents of a hotbed is very beneficial.

A few radish seed planted around your cucumber hills will meet the vine against the striped bug. This dangerous enemy of the melon prefers the radish to the melon leaves; and thus, while feeding on the radish, the other gets the start of it and pushes on out of reach of danger, as the leaf of the melon is attacked only when very young and tender.

When your flower plants get from an inch and a half to two inches high, they can be thinned out and transplanted. It should be done after a rain, or the ground from which they are taken and where they are put should be thoroughly moistened.

Radishes grow best when planted in new ground, or at least ground where they have not heretofore been. Old gardens are the worst places in the world for radishes. You will rarely obtain any sound ones in Tomatoes, and the same may be said of the other plants, after being set out, generally become somewhat withered in their leaves, and lose some of them from the effects of the sun, before they become established. This can be prevented by setting over the plant, say from 8 or 9 to 4 or 5 o'clock in the day, boxes in the shape of cones about fourteen inches in height, open at the top. They also protect the plants against frost. In the use of these boxes a week is gained in time, and sometimes the plants saved from severe or frosty weather. We have had a set fully that length of time.

If you find any of your evergreens to become lighter in color than is natural for them; or, rather do you wish the deepest green attainable, give them a liberal dressing of good barnyard manure, extending as far out as the extremity of the branches, and you will accomplish the wish.

If shrubbery or fruit trees transplanted this season look sickly or backward in growing, give them a liberal dressing of manure, and you will save them. If they are set out in the spring, they will be setting out their roots, and you will find them to be better than those which were set out in the fall.

All Raspberry and Blackberry canes set out this spring, should be cut down to within six inches of the ground, if not already done. It will increase their growth, and they will come into fine bearing in order next year; whereas, should the canes be allowed to remain only partially pruned, as often bearing wood, there may be a small crop of poor fruit, and only about half a crop next year. Some people are so eager to get fruit at once from their canes that they totally neglect this advice.

Those who have not set out "cuttings" of grapes, shrubbery, &c., can now lay the branches down, say two inches under ground, letting the end of the branch appear. Sometimes it will require a forked stick to hold them in their places. A grapevine can be laid down its whole length, and if carefully done will throw out a sprout from each joint. We raised six extremely fine Maxima vines by this process, last year. —Germantown Telegraph.

THE SEX OF EGGS.—M. Genin lately addressed the Academic des Sciences on the subject of "The Sex of Eggs." He affirms that it is now able, after having studied the subject for upwards of three years, to state with assurance that all eggs containing the germ of males have wrinkles on their smaller ends, while female eggs are smooth at the extremities.

SULPHUR FOR POTATOES.—A correspondent of the London Gardener's Chronicle dusted his potato sets with sulphur, and found that it not only drove away slugs, worms and insects, but that the crop was entirely free from the disease, while others in the adjoining rows, sown with sets of the same sulphur were "seriously damaged by disease."

TO KEEP BUTTER SWEET.—In May of June, when butter is plenty, work the butter two or three times, add at the last working nearly one grain of saltpetre, and a teaspoonful of pulverized loaf sugar to each pound of butter. Pack it tightly in stone jars to within two inches of the top, and fill the remaining space with strong wine. Cover the jars tightly, and store them in the cellar bottom, where the butter will keep unadulterated for a long time.

DR. SWEET'S

INFALLIBLE

LINIMENT,

CATHARTIC PILLS

THE GREAT REMEDY

FOR RHEUMATISM, GOUT, NEURALGIA, LUMBAGO, STIFF NECK AND JOINTS, SPRAINS, BRUISES, CUTS AND WOUNDS, PILES, HEADACHE, AND ALL RHEUMATIC AND NERVOUS DISEASES.

For all of which it is a speedy and certain remedy, and never fails. This Liniment is prepared from the recipe of Dr. Stephen Sweet, of Connecticut, the famous bone setter, and has been used in his practice for more than twenty years with the most astonishing success.

As an Alleviator of Pain, it is unrivaled by any preparation before the public, of which the most skeptical may be convinced by a single trial.

This Liniment will cure rapidly and radically, Rheumatic Disorders of every kind, and in thousands of cases where it has been used it has never been known to fail.

For Neuralgia, it will afford immediate relief in every case, however distressing.

It will relieve the worst cases of Headache in three minutes, and is warranted to do it.

Toothache also will cure instantly.

For Nervous Debility and General Lassitude, arising from impudence or excess, this Liniment is a most happy and unfailing remedy. Acting directly upon the system, it strengthens and revivifies the system, and restores it to elasticity and vigor.

For Piles, as an external remedy, we claim that it is the best known, and we challenge the world to produce an equal. Every victim of this distressing complaint should give it a trial, for it will not fail to afford immediate relief, and in a majority of cases will effect a radical cure.

Quincy and Sore Throat are sometimes extremely malignant and dangerous, but a timely application of this Liniment will never fail to cure.

Sprains are sometimes very obstinate, and enlargement of the joint is liable to occur if neglected. The worst case may be conquered by this Liniment in two or three days.

Bruises, Cuts, Wounds, Sores, Ulcers, Burns and Scalds, yield readily to the wonderful healing properties of Dr. Sweet's Infalible Liniment, when used according to directions. Also, Chilblains, Frosted Feet, and Insect Bites and Stings.

DR. STEPHEN SWEET, of Connecticut, the Great Natural Bone Setter.

DR. STEPHEN SWEET, of Connecticut, is known all over the United States.

DR. STEPHEN SWEET, of Connecticut, is the author of "Dr. Sweet's Infalible Liniment."

Dr. Sweet's Infalible Liniment Cures Rheumatism, and never fails.

Dr. Sweet's Infalible Liniment Is a certain remedy for Neuralgia.

Dr. Sweet's Infalible Liniment Cures Burns and Scalds immediately.

Dr. Sweet's Infalible Liniment Is the best known remedy for Sprains and Bruises.

Dr. Sweet's Infalible Liniment Cures Headache immediately, and was never known to fail.

Dr. Sweet's Infalible Liniment Affords immediate relief for Piles, and seldom fails to cure.

Dr. Sweet's Infalible Liniment Cures Toothache in one minute.

Dr. Sweet's Infalible Liniment Cures Cuts and Wounds immediately and leaves no scar.

Dr. Sweet's Infalible Liniment Is the best remedy for Sores in the known world.

Dr. Sweet's Infalible Liniment Has been used by more than a million people, and all praise it.

Dr. Sweet's Infalible Liniment Taken internally cures Colic and Cholera Morbus.

Dr. Sweet's Infalible Liniment Is truly a "friend in need," and every family should have it at hand.

Dr. Sweet's Infalible Liniment Is for sale by all Druggists. Price 25 and 50 cents.

A FRIEND IN NEED. TRY IT.

DR. SWEET'S INFALLIBLE LINIMENT, as an external remedy, is without a rival, and will alleviate pain more speedily than any other preparation. For all Rheumatic and Nervous Disorders it is truly infalible, and as a curative for Sores, Wounds, Sprains, Bruises, &c., its soothing, healing, and powerful strengthening properties, excite the just wonder and astonishment of all who have ever given it a trial. Over one million of bottles of this remarkable cure, performed by it within the last two years, attest the fact.

TO HORSE OWNERS!

DR. SWEET'S INFALLIBLE LINIMENT FOR HORSES is unrivaled by any, and in all cases of Lameness, arising from Sprains, Bruises or swelling, its effect is magical and certain. Harness or Saddle Galls, Scratches, Mange, &c., it will also cure speedily. Spavin and Ringbone may be easily prevented and cured in their incipient stages, but confirmed cases are beyond the possibility of a radical cure. No case of the kind, however, is so desperate or hopeless but it may be alleviated by this Liniment, and its faithful application will always remove the Lameness, and enable the horses to travel with comparative ease.

EVERY HORSE OWNER should have this remedy at hand, for its timely use at the first appearance of Lameness will effectually prevent those formidable diseases, to which all horses are liable, and which render so many otherwise valuable horses nearly worthless.

A large stock of Sew Wall Paper.

A new stock of Stone and Earthware.

And thousands of articles not enumerated.

All the above will be sold cheap for Cash or Country Produce.

Sunbury, May 17, 1862.

HIGHLY IMPORTANT NEWS.

HAS RETURNED WITH A NEW STOCK OF CONFECTIONERIES, FRUIT AND TOYS.

It seems as if a new age, a new life was opening upon us, animating every heart to nobler deeds and higher aims. Art, Literature and Science will grow apace, and seek to develop sublimer beauties and grander conceptions.

The business world, too, must feel the new influence and every part be quickened and strengthened by an increased vitality, which shall urge us on with electric speed to the consummation of greater things than we ever dreamed of in the Philosophy of the past.

Animated by the enthusiasm which pervades all classes, and desiring of doing his share toward "The great events of the Age," the subscriber would respectfully inform the good people of SUNBURY and the public generally, that he has just returned from the city of Philadelphia with the largest and most complete stock of Confectioneries, Fruit and Toys, that has ever been brought to this section of country. He is also manufacturing all kinds of Confectioneries, &c., and has on hand a large stock of
