On Saturday about one thousand colored men were gathered by the police from different sections of the city, causing much excitement among that portion of our population as they were marched out to the different locations for the defensive works. At night another force was secured to relieve those who had been at work throughout the day, and another relief gang was provided yesterday morning and evening, so that rapid progress has been made, and the works are now ready for immediate use. We visited the different points yesterday and found the men working in fine spirits, especially after it was appounced that the City Councils had appropriated 100,000 to pay them for their labor.
