THE COAL TRADE. There is an uneasiness among the opera tors in cost, and the trade at the mines is almost at a "stand-still." Coal sold in New York, during last week, at figures which would scarcely cover the tolls and freight, would scarcely cover the tolls and freight, the cost of mining and the operator's the cost of mining and the operator's leaving the cost of mining and the operator's profit out of the question altogether. The be no other course left. Operators cannot work their mines at a loss of a couple of dollars on every ton of coal taken out, and unless miners will work at wages low enough and railroad companies reduce their freights to figures which will enable the operators to go on without loss, which is not probable, a temporary stoppage appears to be in-

It has long been known that the miners, not the men who delve and dig the coal out of the bowels of the earth, but those who merely superintend such operations, and the railroads reap the largest share of the profits from the productions of coal. It is not the keeping their operatives from suffering. actual cost of coal, but the expense of getding the article to market which bears beavily on the people. If it were not for these causes the present decline in the price of coal could be rendered permanent, but the been exceedingly mild, and had more the appearsuspension of operations at the mines and the increase of demand will speedily enhance the price of coal to its old figures,

A TRIAL UNDER THE STATE DESER TER LAW .- At the recent court in Lycoming county, two election officers in Nippenose township were prosecuted for having refused to take the vote of a deserter from the draft. After a patient and searching trial, and an animated contest between the opposing counsel, the jury returned a verdict of not guilty. Hon. A. Jordan, the Law Judge of this district, charged the jury that the officers had only obeyed their oath, and that the State law had disqualified deserters from voting; and hence the verdict ren-

The New York Herald takes the high and just ground that three-fourths of the loyal or adbering States are sufficient for the ratification of the new constitutional amendment, and that it is the duty of Congress to pass enabling acts, under which the communities that seceded from and fought to destroy the Union, and in their failure to do so became thereby subjugated, may be organized for the purpose of securing "republican government" to such of their inhabitants as were true to the Republic. In this position the Herald is sustained by the ablest jurists of the country.

All other influences were merged in the paramount considerations of duty.—My work was to be done according to law, but, also, without forcetfulness of the great Christian law of

My work was to be done accerding to law, but, also, without forgetfulness of the great Christian law of benevolence. Frankly, but not boastfully, I labored to the utmost of my capacity, albeit feely, nevertheless, to discharge my duty faithfully; yet, I count mysel but an unprofitable servant.

You, gentlemen, were wateful and critical witnesses, competent to notice errors in the discharge of the diversified obligations of duty devolved upon me. To have realized the testimony of your approbation and the respect of my fellow citizens, is more than compensation for my earnest efforts—overpayment to infinite abundance.

I air grateful to my fellow citizens for the uniform kindness and courtesy with which I was everywhere received, notwithstanding the unpleasant and unpopular character of a Sheriff's functions.

Mn. Epiron:—The operations at the Duqueene-Well are still progressing rapidly. In my last letter I stated that they were boring in state-coal, and that the prospects for striking coal of a fine quality were good. Since then their anticipations have been fully realized. On Saturday last, at a depth of the feet, they struck a vein of coal some eight and a half feet in thickness.

half feet in thickness.

Specimens of it have been tested in various ways. Specimens of it have been tested in various ways, and it has been proved, beyond a doubt, to be the simon pure article. It has been generally supposed that if they were so fortunate as to strike coal it would be the outeropping vein of the anthracite Shamokin coal bed. But on a therough examination the conclusion arrived at is that it is of a hitu-

ziato-coal.

This last development has given new energy to the operators, and is creating an unusual excitement in this neighborhood. Many persons visit the well daily, eager to procure specimens of the hidden treasures from the bowels of mother earth. The stockbolders of the company have reason to congratulate themselves on the success, thus far, of the enter-

STRANGE, BUT TRUE.-War, disease and famine are considered the most powerful emissaries of death. There are others, more destructive than the three united. We allude to the deadly poisons sold as rum, gin. brandy, whiskey, wine, &c. A glance at our criminal calendars, police reports and medical statistics proves this. In the State of Maine, the headquarters of the temperance movement, there is no restriction on the sale of Speer's Samburg Wine -a flattering testimonial of its worth and purity. This is an article for washing without rubbing, execut in very dirty places, which will require a very slight rub, and unlike other preparations effered for a tike purpose, will you not the clotters, but will leave them much whiten than ordinary methods, without the usual wear and tear.

This powder is prepared in accordance with chemical science, and upon a process peculiar to itself, which is secured by Letters Patent. It has been in use for more than a year, and has proved itself an universal favorite wherever it has been used. Among the dynantages claimed are the following, vis:—

It suves all the expense of soap usually used on cotton and linen goods.

It saves most of the labor of rubbing, and wear and tear. Also, for cleaning windows it is unsurpassed.

Also, for cleaning windows it is unsurpassed. With one quarter the time and labor anually required it imparts a beautiful gloss and lustre, much superior to any other mode. No water required except to moisten the powder.

Directors with each package
And can be readily appreciated by a single trial. The cost of washing for a family of five or six persons will not exceed runan centra.

The manufacturers of this powder are aware that many useless compounds have been introduced to the public which have retted the cloth, or failed in removing the dist, but knowing the latrinsic axed lense of this artials, they confidently proclaim it as being adapted to meet a domaind which has long existed, and has heretofore remained unsupplied.
