The novelty of modern Medical, Chemical and Pharmacoutical Beience. No nee of any longer taking the large, repulsive and insucous pills, composed of cheap, crude, and bulky ingredients, when we can by a careful application of chemical science, extract all the cathartic and other medicinal properties from the most valuable roots and herbs, and concentrate them into a minute Granule, scarcely larger than a mustard seed, that can be readily swallowed by those of the most ensaitive stomachs and fabilidous assets. Each little Purgative Pellet represents, in a most concentrated form, as much cathartic power as is embedied in any of the large pills found for sale in the drug shope. From their wonderful cathartic power, in propurities to their size, people who have not tried them are ant to suppose that they are harried discrept active medicinal principles of which they are composed being so harmonized and modified, one by the others, as to produce a most scarching and theorems h, yet gently and kindly operating cathartic.
