INSECTS ON CATTLE.-A correspondent after having experimented to his heart's content with several kinds of greese, tobacco water, kerosene, ashes, anguentum, &c., for killing lice on cattle. has arrived at the conclusion that sulphur sprinkled on the animals, and well rubbed into the hair, and a tablespoonful of ginger in meal daily for a week, is the simplest, safest and surest remedy he has ever tried.

THE MODEL SHEEP MAN .- The best sheep man we ever heard of was a soldier of Stonewall Jackson, who saw somewhere how valuable are sheep for renovating worn out land, and after the cruel war was over, he went home to his poor farm, and bought thirteen ewes-all that, fortunately, he was able to buy. He put them in a small field of briars and weeds, which they soon destroyed. Then he fed them on bran and meal in the winter, and in the spring he had thirteen 9.50 p m 7.30 a m fine lambs. Saving the manure, he planted the fine lambs old briar patch with corn and harvested a fine 2.60 a m 11.15 a m 8.40 p m 12.55 a m crop. All his spare time was devoted to caring 4,50 a m 1,50 p m 10,50 p m 3,05 a m for the sheep. The next spring he had more Washington 10.35 s in 8.30 p m 2.35 a m 8.00 a m lambs; he was able to plant more corn; then Washington 10.35 s in 8.30 p m 6.13 s m 10.35 a m came more lambs, when he sowed clover and grew turnips; and now, to-day, as a result of Gen'l Manager. Gen'l Pass, Agent, Sup't, such small beginnings, he has several hundred fine young sheep, free from disease, bringing him \$2,000 a year, while his farm has become extremely fertile, and he is a rich man. We know thousands and thousands of poor young

men have a free course open to them to become wealthy by beginning in the same way. But the trouble is, the way is too humble and slow; they want to get along faster; they have no patience, no faith, no pluck. Truly, it does seem small business to watch a dozen sheep, as if it were beneath the attention of a bright American youth; but if said youth will look the subject all over, he will see it worthy of all his powers. A young man can well afford to sit down with a dozen sheep on the plains, live in a dugout, and feed on antelope meat, rather than undertake to become independent in a city on a

The weight of this mammoth, should the project be carried out, is set down at twenty-eight thousand pounds, or fourteen tons, and will be thirteen feet broad by eleven deep. It is to be made in two days' time, in May, 1876, and will be embraced by an iron boop made in Pittsburg. A car to carry it will be made expressly for it. The statement goes on to say, "After it has been looked upon sufficiently, it will be cut up and distributed to the four quarters of the globe." Should this proposition be carried out, it will be
