

Before and After.

It is astonishing, (says the New York Evening Post,) how quietly some men can change their opinions, when they have occasion to do so. For instance, we read this morning in the Philadelphia correspondence of the Tribune, the following reflections:

"You correctly say in the Tribune, that the success of Shunk, in this State, by the paltry majority of three or four thousand votes, is no criterion by which to judge of the result of the Presidential election. My calculation is, and I have seldom failed in similar calculations, that Pennsylvania would be safe for Clay, should Shunk carry it by 10,000; and now, since his majority is not over half that number, I deem the State as safe for Clay as if the election had already been held, and his success declared. The Shunk men fully calculated upon 15,000 majority two weeks ago—and had the election been deferred two weeks longer, Markle would have undoubtedly been elected.—You may set down Pennsylvania certain for Mr. Clay and the Tariff, by at least 5000 majority."

This, he it remembered, was written on the 12th of October, after the political character of the State was well ascertained. But the Philadelphia correspondent of the Tribune had unfortunately written on the 2nd of October, when the politics of the State were not so well known. His opinion at that time was thus given:

"Some of our whig friends seem to imagine that Mr. Clay's vote, or rather majority, will exceed Gen. Markle's, both in the city and county as well as in the State. This, I think is a great mistake, and it would be well for them to take warning in time, as many, I observe, exhibit a disposition, if not an anxiety, to bet upon it. I will speak honestly and candidly my solemn conviction upon this subject, and when I say that if Gen. Markle fails to carry the State of Pennsylvania, it is madness for our friends to risk any wagers that Mr. Clay will. You must give me the credit at least of being sincere, and as well informed upon the subject as any man who professes more than I do."

What a difference! "It is madness to hope for Mr. Clay's success, if Markle fails," says the Tribune writer, on the 2nd of October; but "Pennsylvania is safe for Clay by 5,000," says he, on the 12th of October. Our opinion (continues the Post,) is that the statement of the 2nd of October is the one nearest the truth. There is little reason to expect to carry the State for Clay, when Markle has so signally failed. And we are pleased to be confirmed in this judgment by an authority so distinguished among the whigs as Daniel Webster. In the speech which he lately made in Pennsylvania, he uses this language, in every word of which we fully concur:

"I came among you only to tell you the deep interest I feel in your ensuing State election. The election of a President of the United States depends on the next gubernatorial vote of Pennsylvania. A letter has just been read from Gov. Ritner, showing the important bearing of the election for Governor in this State upon the next November contest, and I concur in every word of that letter. I know there is nothing in the North which interests all so much—there is nothing to which a man so quickly and intently turns his attention, after the exercise of his daily devotional duties, as to inquire into the prospects of your next ensuing election. For it will be ominous of the contest next November."

In the enthusiasm of his oratory, Mr. Webster uttered the truth. The result in Pennsylvania is ominous of the more important result to be brought about next November.

AN OLD BIRD.—The Albany Atlas says there is in the possession of one of the old Dutch families of the city, a parrot, known to be 82 years old! The bird is now blind; but, notwithstanding, it can walk to any part of the house without difficulty, and recognizes the different members of the family by their footsteps. It whistles tunes with great exactness, and is quite fond of sacred music.

PURIFY THE BLOOD.—As the blood in its life-preserving course is subject to continual waste, nature has provided for the supply of the exhausting fountain, by the conversion of our food into new blood. But whilst such simple means are provided for the manufacture of new blood, nature has been no less solicitous in providing for the expulsion of that which is useless and decayed. This important office is performed by the bowels, and when Nature (who is always struggling to throw off offending matter) requires assistance in her benevolent intention, Brandt's Vegetable Universal Pills will be found singularly adapted to the purpose, because they remove through the stomach and bowels all corrupt humors from the body, in an easy, safe and effectual manner, producing no effect but what will finally conduce to the perfect purification of the Blood, and thereby cure the disease, (by whatever name it may be called,) and give perfect health to the whole system.

SHUGERT'S PATENT WASHING MACHINE. THIS Machine has now been tested by more than thirty families in this neighborhood, and has given entire satisfaction. It is so simple in its construction, that it cannot get out of order. It contains no iron to rust, and no springs or rollers to get out of repair. It will do twice as much washing, with less than half the wear and tear of any of the late inventions, and what is of greater importance, it costs but little over half as much as other washing machines.

The subscriber has the exclusive right for Northumberland, Union, L. comorg, Columbia, Luzerne and Clinton counties. Price of single machine \$6. H. B. MASSER.

The following certificates is from a few of those who have these machines in use. We, the subscribers, certify that we have used to use, in our families, Shugert's Patent Washing Machine, and do not hesitate saying that it is a most excellent invention. That, in washing, it will save more than one half the usual labor. That it does not require more than one third the usual quantity of soap and water; and that there is no rubbing, and consequently, little or no wearing or tearing.—That it keeps off the buttons, and that the finest clothes, such as collars, coats, top's, frocks, &c., may be washed in a very short time without the least injury, and in fact without any apparent wear and tear, whatever. We therefore, cheerfully recommend it to our friends and to the public, as a most useful and labor saving machine.

CHARLES W REGINS, A. JORDAN, CHS WEAVER, CHS. PLEASANTS, GIBSON MARKLE, Hon. GEO. C. WILKER, MENI. BENDRICKS, GIBSON LEISNER.

HENRY HERRICK, formerly of Pennsylvania, No. 118 Chestnut street, Philadelphia, September 24th, 1844. I have used Shugert's Patent Washing Machine in my house upwards of eight months, and do not hesitate to say that I deem it one of the most useful and valuable labor-saving machines ever invented. I formerly kept two women continually occupied in washing, who now do as much in two days as they then did in one week. There is no wear or tear in washing, and it requires not more than one-third the usual quantity of soap. I have had a number of other machines in my family, but this is so decidedly superior to every thing else, and so little liable to get out of repair, that I would not do without one if they should cost ten times the price they are sold for. DANIEL HERRICK.
