Weight.—A sack of wool is 22 stone; a ball of wool is 22 stone; a pack of wool is 17 lbs.; a tod of wool as 2 stone, a clave of wool is 7 lbs.

Stables .- For Cattle and Sheepshould be placed on rollers, so as to be moveable, from one part of the farm to the other.' In this way the liquid nitrogen is distributed around the farm.

Manure-Nitrate of Soda.-Fortytwo lbs. of nitrate of soda, has on a quarte: of an acre of ground, increased the product of wheat 155 lbs., and the weight of straw, 139 lbs. Anti-book-farmers can't furchstuy.

Fodder.--- A working ox requires, of hay. 2 per cent. a day of his own weight. Thus, if he weighs 2000 lbs., he requires 40 lbs. of hay a day. A cow that gives milk, requires 3 per cent. of her own weight. If she weighs 1000 lbs., she requires 30 lbs. of hay.

Potash .--- (the ley of ashes boiled down into a salt,) mixed with grease, forms soft soap. Soda, mized with grease, forms hard soap.—For the want of soda, soap manufacturers use common salt, which is the muriate of ioda, composed of chlorine in about equal parts.

Alkalies .-- Potash, soda, and amonia are called alkalies. Potash and soda are called *fixed* alkalies, as they will not escape in gas. Amonia is called volatile, as it always exists in vapor, unless detain· ·

YANKED FEED CUTTERS, manuaccured for ADRICH & SARGENT, No. 410 Markot street, Philada ALDRICH & SARGENT, No. 410 Market street, Philada This cutter is superior to any now in use, for strength durability, and simplicity of construction; it cuts fast-er, and is the only self-sharponing Hay, Straw and Corn stalk Cutter ever made. It has but ONE STRAIGHT KNIFE, which any person can grind and set with easo, but in ordinary case, is ground in the machine. Thou-sands have already been sold, and the demand is daily increasing. In mest cases an examination is sufficient to convince one of its superjointy. No one after a short trial would part with it for any other. All sizes of the ab we constantly on hand and for sole by J. P. LYNE, oct₁₁ Sole Agent for Cauberland county.

YOU NEED AT PRESENT —The subscriber respectful-ly informs the ladies and gentlemen of Carlisle and vicinity that he has new on hand at his Hair Dressing and at his may now new Yest

HERE IS WHAT

DATENT SELF-SHAPPENING

ed by some substance, as plaster, or charcoal, for which it has an affinity.

Sow Good Seed. -"Whatever a man soweth, that he shall also reap," says the Scripture. If you wish cockle, chess, weeds, and poor wheat, then sow such, and you have the promise of Go, that you shall also reap such. Go it, you poor, anti-book-farming Farmers! Verily you will have your reward!

Subsoiling.-The roots of wheat have been traced four feet. Farmers usually plow four inches. Well, let the other three feet eight inches of root take care of itself! A man must be in small business to be fussing over a place for wheat roots to run! The fact is, they have no business to run so far.

CHANGE OF FEED FOR HORSES .--- The kind of food for animals should be changed frequently. A horse, long kept on shorts, will be affected by a fever in his legs and feet, produding a result similar to founder. Shorts, corn meal, or cob meal, should never be given, except in a mixed state with cut hay, or straw. This will require them to cat slower, and the food is better prepared for digestion. If given alone, it ferments rapidly in the stomach, produces a general fever, injures the digestive powers and finally produces a stiffness throughout the limbs. When these results are discovered, the rmedy is a change of food. Continued feeding on oats, alone, will produce the same results as shorts, or meal; and many a founder is caused by it, as well as by feeding, or drinking, when the horse is warm. If necessity compels a person to feed a horse on shorts, corn meal, oat meal, or cob meal, supply of salt should be added to prevent fermentation in the stomach --Ohio Farmer.

Holding Up the Milk .-- The New England Farmer give the following in an-"swer to an inquiry as a good method of 4 K
