The particular attention of Painters, Dealers and others, is called to the new patent method of puttinkup Lead and Zinc Paints in metallo Caus, of which Massury & Whit m are the sole proprietors.

These Caus are intended by the inventor to obviate the difficulty heretofore existing in putting up of Lead and Zinc in small kegs. All constmers of paint are awaren that the loss on Lead and Zinc put up in small woulden packages, is from five to ten per cent; and in miany cases much more, owing to the absorption of the oil, and the consequent hardening of the paint against the wood—face synching of the paint against the wood—face synching of the paint against the wood—face synching of the paint is labour prequired to mix paint randy for use, after it has become hard in the keg. The loss of the keg, too, is a consideration which should not be lost shirts of. The patent CAN not only obviates these difficulties, but in additional through the paint saferon and convention trainings the consumer with a strong and convention to that the difference of cost between Them are pasked in saw dut; in strong cases or boxes, which contain 200 be such that is 25 the Cans, or 150 ib.
