Dr. REESE DAVIS and family, of Wilkes-Barre, have been visiting his parents at Neath, this county. The Doctor and wife were the guests of his brother, Senator DAVIES, last night.

We were mistaken in stating that the gentlemen who were treated to a ride on Col. R. A. PARKER'S yacht, "Emily," spent the night on Cayuga lake. They embarked at Fair Haven and were taken to Alexandria Bay, remaining over Sunday at the Thousand Islands and returning to this place yesterday.

Dr. WILLIAM H. MERCUR and sister, Miss ELISA, took a pleasant drive up to Sayre, to visit their sister, Mrs. ROSENMULLER, yesterday. The Doctor returned in the evening, accompanied by Miss MINNIE WOODRUFF, of New York, who will remain the guest of M. C. MERCUR'S family for a few days.

C. T. MCKINNEY'S new house on Third street is approaching completion. It is nearly enclosed, the siding has already received a coat of paint, and the building will be ready for occupancy in a few weeks. With his usual enterprise, CHARLIE is just "pushing things." In location and general appearance the house is a great improvement on the old one, which was burned a few weeks since.

Prof. CHARLES W. SHELDON, of Hamilton, N. Y., has been added to the faculty of the Collegiate Institute, in this place. Mr. SHEL-

DON is a graduate of Madison University, led his class from the time he entered college, took several of the prizes, and was valedictorian at graduation. Being a teacher by profession and a man of high moral and religious character, he can not prove otherwise than a valuable addition to the faculty.

We appropriate from the Wyalusing correspondence to the Elmira Advertiser the following:

Dr. Brown, of Syracuse, with his lively wife, returned home this evening after a pleasant visit of a week at his old home. The doctor is set down as a boss fisherman, but it is said his brother Theodore gave him a back seat as to both numbers and weight of bass caught during the present campaign.

F. G. Churchill, wife and little girl, of Harrisburg, are stopping a few days at Mr. Howard's. By the way, our professional fishermen had better look after their laurels, as Mrs. Churchill, on Tuesday last, landed in the boat a bass whose weight was 4 1-2 pounds, the largest one reported at this place this season. "Harrisburg papers please copy."

The Extensive Rosery and Nursery House of R. G. Chase & Co., of Geneva, N. Y., is represented in Towanda and vicinity by Mr. J. T. MOORE, of Ithaca. This is one of the oldest and most reliable Nursery Concerns in the State of New York. Their large and increasing trade is due solely to their honorable method of doing business. Many of our best citizens will cheerfully testify to the very satisfactory manner of their dealings with them in the past, always receiving their orders in the best condition and True to name. Parties giving Mr MOORE their orders can do so with the utmost confidence. We bespeak for him a large patronage.

The President's Condition.

OFFICIAL BULLETINS.

8:30 A. M.

The President slept well during the night and this morning is cheerful and expresses himself as feeling better than at any time since he was hurt. After the slight rise of yesterday afternoon, his temperature again became normal in the evening and so continued. He appears strong and has evidently made progress in the road to recovery during the past few days. His pulse is now 94; temperature 98; respiration 18.

7 P. M.

The President remained with his head and shoulders elevated until the time for dressing the wound this evening. It continues to progress in a satisfactory manner, and discharges healthy pus freely from the deeper as well as the superficial portions. He has taken nourishment well and in sufficient quantity, and in all respects continues to do well. The rise in temperature this afternoon was slight. At present his pulse is 104, temperature 99.5, respiration 20.

THE BALL LOCATED.

By the aid of Prof. Bell's instrument, constructed for the purpose, the location of the ball was yesterday determined. It lies 4 1/2 inches to the right and below the naval, at the point where a blue spot was visible some days after the shooting.—The exact depth of the ball was not definitely determined. It is imbedded not less than two nor more than five inches. No effort will be made to remove it at the present time as it is causing no trouble. Prof Bell is delighted at his new achievement in the field of science.

To those who have heard of the "Imitation Glass," and have not seen it, we extend a cordial invitation to examine into its real merits, and ask the prices for which it can be obtained, we are prepared to contract with churches, halls, or other public buildings, and warrant all of our work to surpass in beauty the genuine stained glass and our prices are less than one-fourth the cost of the same.
