ARGE CAPACITY, GREAT Stregath and unequalled speed, simplicity and completeness of operation, are qualities peculiar to the

Nonpareil Washing Machine.

It is a squeezing machine constructed on strictly mechanical principles, and the experience derived from five years extensive use in femilies, hotels and public institutions proves it to be of lacting when the street in the second st proves it to be of lasting value to the pur-

The manner of operating the Nonpareil, by recary motion acting on a crank shaft with balance wheel,) which moves the plungers alternately, is the simplest, least laborious and most powerful that can be devised for the purpose, and accomplishes the work with the greatest rapidity and the least possible labor. The great speed with which this machine performs work will be understood from the

statement that it is geared to give six strokes of the plungers for one turn of the handle, or, when worked leisurely, about four hundred strckes a minute--Safety to the fabric washed is insured by the entire absence of rubbing. A girl or boy of fifteen can work the machine, and do a week's washing for a family of six or eight persons in two to three hours'

ime; and it may be relied on to cleanse the clothing thoroughly, without assistance from hand rubbing. Send for free Descriptive Circular and terms to dealers, to whom exclusive right
