

THE SILVER SKIRT.
MORE DURABLE,
MORE ELASTIC,
MORE QUICKLY
And will keep its shape and retain its place
better than any other Skirt.

This new and original style of Skirt (Patented March 7, 1865) was awarded by the Great American Institute Fair, held in New York, October, 1865, a

SILVER MEDAL,
being the highest Premium ever given for a Skirt.
The Steel Springs are wound with fine plated wire—in place of a cotton covering—which will not wear off or become soiled, and the whole skirt may be washed without injury or loss of rusting, and will be as good as new.

The Combination Silver Skirt
This invention combines with the ordinary Skirt the advantages of our Silver Skirt. The bottom hoops are the same as those used in the Silver Skirt, the covering of which cannot wear off, while the upper ones are covered with cotton. No lady having once worn one of our Skirts, will be willing to wear any other, as the lower hoops of all other kinds are soon injured and soiled.
The best materials are used in their construction, and from their durability and neatness they are destined to become a

Favorite Skirt.

THE UNDESIGNED WISHES TO say to the public generally, but more particularly to the people of Elk County that he has opened a Blacksmith and Wagon-Shop in St. Mary's, where he will be happy to execute all orders in his line with promptness and neatness. LARGE CAPACITY, GREAT STRENGTH and unequalled speed, simplicity and completeness of operation, are qualities peculiar to the

Nonpareil Washing Machine.
It is a squeezing machine constructed on strictly mechanical principles, and the experience derived from five years extensive use in families, hotels and public institutions proves it to be of lasting value to the purchaser.

The manner of operating the Nonpareil, by rotary motion acting on a crank shaft (with balance wheel), which moves the plungers alternately, is the simplest, least laborious and most powerful that can be devised for the purpose, and accomplishes the work with the greatest rapidity and the least possible labor.

The great speed with which this machine performs work will be understood from the statement that it is geared to give six strokes of the plungers for one turn of the handle, or, when worked leisurely, about four hundred strokes a minute—Safety to the fabric washed is insured by the entire absence of rubbing.

A girl or boy of fifteen can work the machine, and a week's washing for a family of six or eight persons in two to three hours' time; and it may be relied on to cleanse the clothing thoroughly, without assistance from hand rubbing.
