GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER 237

AND THE Latest Impraved Thresher and Triple Gear eil Horse Powers, Driving either by Gent or Belt, all furnished Complete ready to be put on Wayous.

I, the undersigned, desire to call the attention of Farmers and Threstiermen of Frankling and adjoin ing counties to it. This Machine has been before the public for seven years, during which tune it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in re-commending it to the public, knowing that it will give the best of satisfaction. I am manufectuing three different sizes, as follows:

No. 1 is 8 horse Power, will thresh and clean from 200 to 500 bushels per day. No 2 is 5 to 6 horse power, will thresh and clean

No. 3 is 4 to 6 horse power, will thresh and clean look to 200 bushels per day.

No. 3 is 4 to 6 horse power, will thresh and clean from 100 to 200 bushels per day.

These Machines are warranted to do the above, and do it much better in every respect than any

other machine in use.

Grain having much light filth in it cleaned on this
Machine is worth from 2 to 8 cents more per bushel than when cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the gmin as when cleaned on the riddle principle. The last a is freely on all the grain as it leaves the shues, whereas, when cleaned with riddle that ad-

vantage is lost This muchine does not return the tailends asost of the separators do. By returning filthy tailends alternately it is impossible to make merchantagrain, Another important scature in this machine that others of the kind have not, is the Belf-acting Blast Regulator in the fan, which remedies all dif-ficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power-This Machine is also more durable and less tedious to manage than any other Separator and Cleaner, or

the common machine with shaker. Orders to insure their being filled until harves should be sent in immediately.
