Your Real Horoscope

Aries: (Mar. 21–Apr. 19) You don't need to make yourself noticed. You're hydroencephalic, and you spout obscenities at will, so you're hard to ignore.
Taurus: (Apr. 20–May 20) Your artistic skills will come in handy when you spray-paint "KKK" on a local children's center.
Gemini: (May 21–June 21) Your love life is flaring up—and so are your hemorrhoids. Apply a soothing ointment to the grapefruit-like appendage that was once your anus.
Cancer: (June 22–July 22) Your future is so bright you'll try to claw out your eyes.
Leo: (July 23–Aug. 22) Don't overlook someone's romantic intentions. Rod Milbrant, your physics teaching assistant, has a crush on you.
Virgo: (Aug. 23–Sept. 22) You will embark on an incredible journey. Take plenty of Braunschweiger.
Libra: (Sept. 23–Oct. 23) A loyal

friend will surprise you with a candid admission. From now on, never trust anyone named Hitler.
Scorpio: (Oct. 24–Nov. 21) Take time to reflect on what an incredible moron you are.
Sagittarius: (Nov. 22–Dec. 21) The loss of loved ones will be shattering to you after you kill them.
Capricorn: (Dec. 22–Jan. 19) Your future begins today, as does a painful bout with the clap. Don't worry—it'll be fun.
Aquarius: (Jan. 20–Feb. 18) Open your mind to new ideas, especially those involving paste and empty potted-meat tins.
Pisces: (Feb. 19–Mar. 20) Bridge the gaps of culture today with understanding and acceptance. Talk to some swarthy, greasy foreigner.
