OLAS sponsors Friday Fiesta

Tomorrow night members of the Organization for Latin American Students (OLAS) will officially begin the eighth biannual "Friday Fiesta."

In the past, this event was held on only one side of the Wintergreen Cafe but this semester both sides will be open for the festivities.

"The tradition of Friday Fiesta has grown over the last four

years and last semester the space we were using was packed with people" said Yadira DeLaTorre, president of OLAS.

Dia Harris, President of the Association of Black Collegians, is getting ready for his fourth Friday Fiesta. "It's a great program that promotes diversity in the Erie community and on campus and the live Hispanic music is unique," he said.

Luz Gandulla has attended three Friday Fiestas and has fun teaching others how to dance the

"Merenge" and the "Salsa." "They're dances that my father taught me when I was young and it feels good teaching others about my life," she said.

Angel (Rafi) Otero also appreciates the Friday Fiesta for the memories. "It's the only time during the semester that I really feel like I'm back home," he said, "and that makes me feel good."

Friday Fiesta begins at 9:00 p.m. and ends at 1:00 a.m.

dollars you pay, times lost income, plus future earning potential, which are all part of the investment factor. Without using the consultant services available you're losing a great amount of money," Schenker said.

Students must use their student identification number to register for classes and for additional confidentiality may obtain a PAC (personal access code) number.

Diane Nowacinski, coordinator of college registration, said the PAC number is "a four digit number used in conjunction with

the student ID number as a security code."

She said, "At the moment only a few students here at Behrend have one. It's anticipated that in the near future all students will be assigned a personal access code."

Nowacinski suggests for registration that students call on their assigned first day and to make sure that their registration worksheet is completed.

Nowacinski said if students have problems, "We prefer that they come down instead of calling us because we'll get on the phone and work the call through. If there's something

happening we need to know about it and get it fixed."
