## Escaped mental patient stalks Behrend

by Will Jordan  
editor in chief

Have you seen this man? If you haven't, consider yourself lucky. He is an escapee from Western Psych Hospital and is suspected of hiding somewhere in Wintergreen Gorge. His name is Royce Cleaver. He was committed for having multiple personality disorder. At different times he can be the queen of England, a transvestite named Sheryl, Al Capone, Pee Wee Herman, Dr. Kevorkian, and Shania Twain.

Cleaver was committed on April 1 of last year and he escaped on August 18. Stories around the hospital say that one minute he would be parading around giving orders and threatening

other patients in Italian and the next minute he would break out in song.

Cleaver received several treatments of electroshock therapy. That is what gave him the permanent part in his hair that can be seen in the accompanying photo.

Cleaver escaped from Western with the aid of two other patients who posed as orderlies. "He said that he was going to bring back a nude picture of Bea Arthur for me," said one of the patients who wished to remain anonymous.

Cleaver is considered to be very dangerous due to the violent nature of his personalities Al Capone and Pee Wee Herman. "He would become very violent when someone said the word of the day," one orderly stated.

Reports have said that a man

dressed as a woman had been seen riding the EMTA into the city of Erie. "He was wearing a white blouse, white sweater, pink skirt, and he was in desperate need of a shave," said one eyewitness. This person is speculated to be Cleaver's alter ego transvestite Sheryl.

When Cleaver becomes the queen of England, he is completely passive. He can be seen waving to the people passing him as he rides down the street in a taxi. He became Dr. Kevorkian when he was in the hospital. He would manipulate other patients into thinking that he could set them "free."

Cleaver is very unpredictable and at times can be very violent. If you ever see him call the proper authorities immediately.
