Congratulations, Grads! The Beacon wishes you both the best of luck trying to find those jobs!

TOYOTA

Celica— The Inside Story

On the outside, it's easy to see that Celica is race-track inspired. But the real excitement is on the inside...under the hood. Take the Celica GT-S...Toyota worked with Yamaha to build a 180 HP engine redlined at 7800 RPM...equipped it with Variable Valve Timing with intelligence...a computer that constantly monitors and retunes your engine for maximum performance...a cam with two sets of lobes to provide two ranges of valve lift and duration for more usable horsepower. There's direct ignition for greater reliability...iridium-tipped spark plugs for reduced maintenance...a stainless steel exhaust manifold...a water-cooled oil cooler. And mated with Toyota's 4-speed electronically-controlled automatic "Sportshift", you get transmission shift switches on the steering wheel...just like Formula 1 race cars. Sweet.
