Smurfette joins BMG

By Jerry Pohl
assistant humor page editor

The newest member of the Blue Man Group only meets half of the requirements. She sure is blue, but she's not a man. Also, she's not bald. She's Smurfette, and her musical talent overcame the fact that the group will now have to change their name. The newly renamed Blue Group Experience will be touring with opening act Eiffel 65, to promote their new album, Red Blues.

Smurfette will be playing one of the group's trademark wacky invention instruments. She will run through small plastic tubes as the three men blow into the tubes and hit them with drumsticks. The group's manager, Papa, assures listeners that this produces a unique sound and is the most innovative instrument since the group invented the drum bone.

Smurfette was narrowly chosen for the group over Harmony Smurf. Harmony was disgruntled by the decision, saying, "I have years more smurfing experience than her, I'm the only smurfing one who knows how to play the Shalakazoo, she's a total smurfing sellout." The night Smurfette's selection was announced, Harmony reportedly spent the night drinking smilax with Grumpy Smurf. In a statement to the press, Harmony said, "The Blue Man Group only chose her in the hope that an attractive woman would elevate their blueness. This shows a lack of integrity on their part, and you should have seen that cow before the plastic surgery."

Smurfette's fans definitely weren't blue after her charismatic performance.

ident has resurrected Senator Joseph McCarthy to investigate them. McCarthy has uncovered that Smurfette spent much of her life living in an isolated socialist commune in the forest. In this community, each person was assigned a job to benefit the collective. Calling her character into question, McCarthy has accused Smurfette of living off of her only marketable skill, being a woman. Smurfette responded to these allegations in a press briefing stating, "I have never smurfed anyone for money."

Watchdog groups suspect that McCarthy is working with black arts practitioner, Gargamel. Gargamel's apprentice, Scruple, let it slip during an interview that they are working on a scheme called Soylent Blue. The interview was cut short when there was a colorful explosion, and wacky yet unfrighting chaos ensued. However, this all turned out to be a commercial for the new Intel Pentium B, the smallest, bluest microchip yet.
